In the foreground, a large, dark, silhouetted structure, possibly a bridge or a large building, dominates the lower half of the frame. Megaprojects And Risk An Anatomy Of Ambition:

Megaprojects and Risk Bent Flyvbjerg, Nils Bruzelius, Werner Rothengatter, 2003-02-13 Megaprojects and Risk provides the first detailed examination of the phenomenon of megaprojects. It is a fascinating account of how the promoters of multi-billion dollar megaprojects systematically and self-servingly misinform parliaments, the public, and the media in order to get projects approved and built. It shows in unusual depth how the formula for approval is an unhealthy cocktail of underestimated costs, overestimated revenues, undervalued environmental impacts, and overvalued economic development effects. This results in projects that are extremely risky but where the risk is concealed from MPs, taxpayers, and investors. The authors not only explore the problems but also suggest practical solutions drawing on theory, experience, and hard scientific evidence from the several hundred projects in twenty nations and five continents that illustrate the book. Accessibly written, it will be the standard reference for students, scholars, planners, economists, auditors, politicians, and interested citizens for many years to come.

Encyclopedia of Power Keith Dowding, 2011-02. Collects 381 entries that discuss political science, international relations, and sociology.

The Art of City Making Charles Landry, 2012-05-16. City making is an art, not a formula. The skills required to re-enchant the city are far wider than the conventional ones like architecture, engineering, and land use planning. There is no simplistic ten-point plan, but strong principles can help send good city making on its way. The vision for 21st-century cities must be to be the most imaginative cities for the world rather than in the world. This one change of word from 'in' to 'for' gives city making an ethical foundation and value base. It helps cities become places of solidarity where the relations between the individual, the group, outsiders to the city, and the planet are in better alignment. Following the widespread success of *The Creative City*, this new book, aided by international case studies, explains how to reassess urban potential so that cities can strengthen their identity and adapt to the changing global terms of trade and mass migration. It explores the deeper fault lines, paradoxes, and strategic dilemmas that make creating the good city so difficult.

A Practical Guide to Successful Construction Projects Arent van Wassenhaer, 2017-04-21. Written by experienced and innovative projects lawyer Arent van Wassenhaer, this book explains what the critical success factors are for construction projects to be completed on time, within everyone's budget, to the right quality, with all stakeholders satisfied, and without disputes. In so doing, van Wassenhaer discusses how such projects could be structured, tendered, executed, and completed, and what legal and non-legal mechanisms are available to achieve success in construction projects. Using examples of real projects, *A Practical Guide to Successful Construction Projects* provides tools for those in leading and managerial positions within the construction

Megaproject Organization and Performance The Myth and Political Reality delves into the complex world of organizing megaprojects and investigates the extent to which the performance of these projects could be traced back to their organizational structure Through multiple case study research including the London Olympic Park and Heathrow Airport Terminal 2 the authors show how megaprojects are unique in how they are organized They explore core periphery relationships between promoters who control strategic choices and suppliers the contracted experts who provide the actual resources to get the project done The implications of these structural performance relationships within a robust economy are then compared with railroad and highway development projects in the developing economies of Nigeria Uganda and India This in depth study brings a complementary perspective to megaproject literature and enables us to reconcile conflicting explanations for the regularity with which megaprojects miss performance targets With pluralism at the core of the megaproject s organizational structure the authors argue that megaprojects work best when accountability is shared and everyone has a stake in the final outcome **Megaproject Risk Analysis and Simulation** Prince Boateng,Zhen Chen,Stephen O. humanistic topics are not separated from technical ones this way of reading and interpreting Megaprojects through the cross pollination of various disciplines reflects the MeRIT approach Addressing the complexity involved in Megaprojects requires the use of a hermeneutic circle of sorts understanding the project as a whole is achieved by referring to the specific parts while each part can only be understood in relation to the whole This circular approach appears to be the only one applicable to Megaprojects no final destination no final synthesis can be achieved This volume consists of eight chapters written by researchers in law economics sociology business organization engineering architecture and landscaping The topics covered will be relevant to researchers practitioners involved in the development of Megaprojects and policymakers at the EU level
