Simon, 2017-01 *You're One of Us!* Marianne Franke-Gricksch, 2022-07-19

In this gripping account of her work Marianne Franke Gricksch speaks from her experience as a teacher and therapist describing how systemic ideas enable fundamentally new and effective learning and encourage creative cooperation between students teachers and parents Rather than viewing the participants in this process as isolated individuals she shows how people and their environment constantly influence and change each other Franke Gricksch's own systemic view connects Bert Hellinger's work on the power of one's bond with his or her family of origin with various other approaches within systemic theory The author's reports are consistently supported by practical examples from the everyday classroom situation Especially fascinating is the children's enthusiasm and array of ideas that they use to pick up and transfer the new impulses and procedures Readers who are new to these methods will also be amazed at the powerful effect that is released by systemic thinking and action

Hairy Hippies and Bloody Butchers Juliane Riese, 2017-05-01 In the popular imagination no issue has been more closely linked with the environmental group Greenpeace than whaling Opposition to commercial whaling has inspired many of the organization's most dramatic and high profile direct actions as well as some of its most notable failures This book provides an inside look at one such instance Greenpeace's decades long campaign against the Norwegian whaling industry Combining historical narrative with systems theory analysis author Juliane Riese shows how the organization's self presentation as a David pitted against whale butchering Goliaths was turned on its head She recounts how opponents successfully discredited the campaign while Greenpeace struggled with internal disagreements and other organizational challenges providing valuable lessons for other protest movements
