medical thought He points to a great paradigm shift in the first third of the twentieth century driven especially by Freud that transferred behavioral disorders from neurology to psychiatry spotlighting the mind not the body The catch all term depression now applies to virtually everything a jumble of non disease entities created by political infighting within psychiatry by competitive struggles in the pharmaceutical industry and by the whimsy of the regulators Depression is a real and very serious illness he argues it should not be diagnosed so promiscuously and certainly not without regard to the rest of the body Melancholia he writes the quintessence of the nervous breakdown reaches deep into the endocrine system which governs the thyroid and adrenal glands among other organs In a learned yet provocative challenge to psychiatry Shorter argues that the continuing misuse of depression represents nothing less than the failure of the scientific imagination
