Memoirs Of Robert Dollar Volume 4:

Memoirs of Robert Dollar Robert Dollar, 1928 *Memoirs of Robert Dollar* Robert Dollar, 1928 *Memoirs of Robert Dollar* Robert Dollar, 2000 American Merchant Ships on the Yangtze, 1920-1941 David H. Grover, 1992-11-17 This work describes the activities of a handful of American companies and about eighty American captains who were trying to run ships on China's great river during the treacherous days between the two world wars. The considerable physical dangers of the Yangtze itself were compounded by the greater human hazards imposed by constant fighting among warlords, piracy, brigandage, kidnapping, opium and munitions smuggling, corruption, seizures, and other forms of intimidation. The events recall and surpass anything of the Wild West in American frontier history. No American steamship company survived longer than twelve years in this environment, but Standard Oil, which was sheltered from the worst of the violence, was able to operate its ships throughout the entire period. More than a naval, military, or even economic history, this book is also a commentary on a significant but largely unsuccessful American commercial venture overseas, one that was eventually scuttled by the actions of the Chinese and the American companies themselves. Ship buffs, maritime historians, students of the evolution of modern China, and those interested in American commercial history will find this study useful and entertaining. *Catalog of Copyright Entries. National Union Catalog Subcommittee, 1971 *California: Oxcart to airplane*, by R.D. Hunt John Russell McCarthy, 1929 Sea Power and the American Interest John F. Morton, 2024-04-15 From the Civil War to the Great War, the transatlantic commercial trading system that dated from the nation's colonial times continued in America. By 1900, the sustainability of this Atlantic System was in the material interest of an industrial America on which its aggregate national prosperity depended. The principal beneficiary of this political-economic reality was the American moneyed interest centered in the Northeast with New York City at the heart. Author John F. Morton explains how this country came to put a value on commercial opportunities overseas in support of America's steel industry. Europeans and Americans alike pursued informal empires for resource acquisition and markets for surplus capital and output. Morton looks at how U.S. policy found consensus around the idea of empire, taking stock of the opening of Latin American and Chinese markets to American commerce as a means for averting socially destabilizing economic depressions. Republican administrations reflected Wall Street finance and America's other three Madisonian interests: commercial manufacturing and agrarian with the Open Door and Dollar Diplomacy policies to establish fiscal protectorates in Central America and the Caribbean. Undergirding Dollar Diplomacy was their commitment to a great navy that would be the insurance for an ongoing American interest that Dollar Diplomacy represented. With the strategic arrival of the petroleum sinew and the Wall Street reassessment of the Open Door in China, the Wilson administration tilted toward protecting American investments in the hemisphere, notably in Mexico with a Big Navy. With

Wilson a progressive foreign policy establishment arrived while continuing to reflect the transatlantic internationalism of the Northeast moneyed interest As a twentieth century progressive institution the Navy would thus sustain an American expansion that was now progressive The Navy story from the Civil War to the Great War reveals a truth The foundational and dynamic sectors of a great nation s economic base its sinews give rise to policy consensus networks that drive national interest long term strategy and the characteristics of its elements of national power It follows that the attributes of sea power must be material expressions of those sinews allowing a navy better to serve as a sustainable and actionable tool for a great nation s interest

Deep Woods Frontier Theodore J. Karamanski,1989 Examines the interplay between men and technology in the lumbering of Michigan s rugged Upper Peninsula In *Deep Woods Frontier* Theodore J Karamanski examines the interplay between men and technology in the lumbering of Michigan s rugged Upper Peninsula Three distinct periods emerged as the industry evolved The pine era was a rough pioneering time when trees were felled by axe and floated to ports where logs were loaded on schooners for shipment to large cities When the bulk of the pine forests had been cut other entrepreneurs saw opportunity in the unexploited stands of maple and birch and harnessed the railroad to transport logs Finally in the pulpwood era weed trees despised by previous loggers are cut by chain saw and moved by skidder and truck Narrating the history of Michigan s forest industry Karamanski provides a dynamic study of an important part of the Upper Peninsula s economy
