Cold War Submarines Norman Polmar, Kenneth J. Moore, 2004 Submarines had a vital if often unheralded role in the superpower navies during the Cold War Their crews carried out intelligence collection operations sought out and stood ready to destroy opposing submarines and from the early 1960s threatened missile attacks on their adversary's homeland providing in many respects the most survivable nuclear deterrent of the Cold War For both East and West the modern submarine originated in German U boat designs obtained at the end of World War II Although enjoying a similar technology base by the 1990s the superpowers had created submarine fleets of radically different designs and capabilities Written in collaboration with the former Soviet submarine design bureaus Norman Polmar and K J Moore authoritatively demonstrate in this landmark study how differing submarine missions antisubmarine priorities levels of technical competence and approaches to submarine design organizations and management caused the divergence *Reader's Guide to Military History* Charles Messenger, 2013-10-31 This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th century intervention operations Designed for a wide variety of users it encompasses general reviews of aspects of military organization and science as well as specific wars and conflicts The book examines naval and air warfare as well as significant individuals including commanders theorists and war leaders Each entry includes a listing of additional publications on the topic accompanied by an article discussing these publications with reference to their particular emphases strengths and limitations *Churchill's Arctic Convoys* William Smith, 2022-09-21 The threat of Operation Barbarossa Hitler's surprise invasion of Russia in June 1941 succeeding prompted Churchill to decide to send vital military supplies to Britain's new ally The early sailings to Northern Russia via the Arctic Ocean between August 1941 and February 1942 were largely unopposed

But this changed dramatically during the course of 1942 when German naval and air operations inflicted heavy losses on both merchantmen and their escorts Problems were exacerbated by the need to divert Royal Navy warships to support the North African landing Strained Anglo Soviet relations coupled with mounting losses and atrocious weather and sea conditions led to the near termination of the program in early 1943 Again competing operational priorities namely the invasion of Sicily and preparations for D Day affected the convoy schedules In the event despite often crippling losses of lives ships and supplies the convoys continued until shortly before VE Day This thoroughly researched and comprehensive account examines both the political maritime and logistic aspects of the Arctic convoy campaign Controversially it reveals that the losses of merchant vessels were significantly greater than hitherto understood While Churchill may not have described the convoys as the worst journey in the world for the brave men who undertook the mission often at the cost of their lives it most definitely was

fit conventional narratives This book lays out the tradition background experiences and thinking of the man as they relate to the development of the Soviet Navy that Gorshkov commanded for almost three decades and that was able to directly challenge the maritime dominance of the United States a traditional sea power His influence persists to this day as the Russian Navy that is at sea in the twenty first century is to a significant degree based on the fleet that Admiral Gorshkov built
