

MEMOIRS OF A MERCHANT MARINE CHIEF ENGINEER

**“WHEN YOU CHOOSE A LIFE FULL OF ADVENTURES,
SOMETHING OUT OF THE ORDINARY IS BOUND TO HAPPEN.”**

Guramrit Singh Kahlon started his maritime career as a trainee marine engineer. He rose through the ranks to become Merchant Marine Chief Engineer.

Part I of his memoir recounts his ancestors' humble beginnings after India's partition. The subsequent segments describe his journey from his childhood on merchant ships with his father—to some lighthearted tales of his growing up years—to turning the page and describing some very interesting portrayals of mentorship and learning the tricks of the trade.

Part II recounts several on-site troubleshooting narratives that he witnessed firsthand. Some of the book's gripping short stories depict dramatic moments and nail-biting tension on the high seas, such as losing control of the main engine, being adrift in a merciless sea for days, and even retrieving a dead ship after a prolonged blackout.

The accounts reveal that the shipboard routine is nothing short of a battlefield. Not a day goes by without running into a problem that does not have the potential to get on your nerves. Like torpedoes and shells, the gremlins ambush from all directions. One might find himself addressing a multitude of problems daily, along with the never-ending saga of vetting and inspections. It is commendable to see the ship crews take an indifferent and, at times, impromptu approach to clearing out the obstacles. Part II of the memoir concludes with an account of a wonderful vacation that every seafarer dreams of.

In Part III, he delves into the history of the Indian shipping industry, beginning with the British India Steam Navigation Company. He goes on to explain how the Scindia Steam Navigation Company came to be and how they collaborated with the Government of India to establish the Eastern Shipping Corporation. The formation of the Western Shipping Corporation, followed by the merger of the two corporations to form the Shipping Corporation of India, has also been illuminated.

Red Prometheus Dolores L. Augustine, 2007 This analysis of the relationship between science and totalitarian rule in one of the most technically advanced countries in the East bloc examines professional autonomy under dictatorship and the place of technology in Communist ideology In Cold War era East Germany the German tradition of science based technology merged with a socialist system that made technological progress central to its ideology Technology became an important part of East German socialist identity crucial to how Communists saw their system and how citizens saw their state In Red Prometheus Dolores Augustine examines the relationship between a dictatorial system and the scientific and engineering communities in East Germany from the end of the Second World War through the 1980s Drawing on newly opened archives and extensive interviews Augustine looks in detail at individual scientists interactions with the East German system examining the effectiveness of their resistance against the party's totalitarian impulses She explains why many German scientists and engineers who were deported to the Soviet Union after World War II returned to East Germany rather than defecting to the capitalist West traces scientists attempts to hold on to some aspects of professional autonomy and describes challenges to their professional identity on the factory floor Augustine examines the quality of science and technology produced under Communist rule looking at failed research projects and clashing cultures of innovation She looks at technological myth building in science fiction and propaganda She explores individual career strategies including the role played by gender in high tech professions and the ways that both enterprises and individuals responded to increasing state and party control of research during the 1980s We cannot understand the economic choices made by East Germany Augustine argues unless we understand the cultural values reflected in the East German belief in technology as

indispensable to progress and industrial development

A Victorian Scientist and Engineer Gillian Cookson, Colin Hempstead, 2017-10-19 This title was first published in 2000 In a life of only 52 years Fleeming Jenkin established his reputation as a pioneer in the new world of electrical engineering known for his work on undersea telegraphs and later on the electrical transportation system known as telpherage Equally at ease in the realms of theory and practice from 1850 until his death in 1885 Jenkin engaged in every field of Victorian engineering As a young adult he worked on intercontinental submarine telegraphy the cutting edge technology of its day which was inextricably bound to the new science of electricity Jenkin was both a scientist and an engineer a prototype of the modern experimental research engineer He was also a distinguished academic professor of engineering in the University of Edinburgh admired as an inspired and innovative teacher and for his interest in the philosophical tenets underpinning his subject Yet in spite of his influence as an early electrical engineer and his other intellectual achievements despite the celebrity of his associates Robert Louis Stevenson Mrs Gaskell and leading engineers of the day were among his close friends and the way that submarine telegraphs seized the Victorian popular imagination Jenkin himself has remained an obscure figure He deserves to be better known The story of Jenkin is of a life lived to the full It illuminates many aspects of Victorian intellectual society and of the organisation of science and engineering in his time The central purpose of this biography is to show Jenkin s achievements in engineering and in other fields and to judge his

significance in these diverse activities Memoir of a Gulag Actress Tamara Petkevich, 2010-10-15 In an abridged translation that retains the grace and passion of the original Klots and Ufberg present the stunning memoir of a young woman who became an actress in the Gulag Tamara Petkevich had a relatively privileged childhood in the beautiful impoverished Petrograd of the Soviet regime's early years but when her father a fervent believer in the Communist ideal was arrested 17 year old Tamara was branded a daughter of the enemy of the people She kept up a search for her father while struggling to support her mother and two sisters finish school and enter university Shortly before the Russian outbreak of World War II Petkevich was forced to quit school and against her better judgment she married an exiled man whom she had met in the lines at the information bureau of the NKVD People's Commissariat of Internal Affairs Her mother and one sister perished in the Nazi siege of Leningrad and Petkevich was herself arrested With cinematic detail Petkevich relates her attempts to defend herself against absurd charges of having a connection to the Leningrad terrorist center counter revolutionary propaganda and anti-Semitism that resulted in a sentence of seven years hard labor in the Gulag While Petkevich became a professional actress in her own right years after her release from the Gulag she learned her craft on the stages of the camps scattered across the northern Komi Republic The existence of prisoner theaters and troupes of political prisoners such as the one Petkevich joined is a little known fact of Gulag life Petkevich's depiction not only provides a unique firsthand account of this world within a world but also testifies to the power of art to literally save lives As Petkevich moves from one form of hardship to another she retains her desire to live and her ability to love More than a firsthand record of atrocities committed in Stalinist Russia *Memoir of a Gulag Actress* is an invaluable source of information on the daily life and culture of the Soviet Union at the time Russian literature about the Gulag remains vastly underrepresented in the United States and Petkevich's unforgettable memoir will go a long way toward filling this gap Supplemented with photographs from the author's personal archive Petkevich's story will be of great interest to general readers while providing an important resource for historians political scientists and students of Russian culture and history *Proceedings of the American Society of Civil Engineers* American Society of Civil Engineers, 1928 **History of the Workplace** Lars Bluma, Judith Rainhorn, 2016-04-14 Interest in the history of the workplace is on the rise Recent work in this area has combined traditional methods and theories of social history with new approaches and new questions It constitutes a topical contact zone a particularly dynamic field of research at the junction of social history history of occupational health and safety history of technology and the industrial environment This book focuses on the new approaches in this important and growing area and their possible range of influence These new attempts to rewrite a history of the workplace are multiple and in some cases disparate but share many key characteristics They are turning away from the assumption that class and class conflict is the prime mover in social history abandoning the traditional binomial workers vs entrepreneurs perspective which had long sustained the historical perspective on labour Moreover as this collection outlines these new attempts concentrate on the

analysis of complex social networks of actors that defined and configured industrial workplaces suggesting a broadening of possible social actors This book was originally published as a special issue of the European Review of History
