

UNITED STATES FOREIGN POLICY

- A doctrine in foreign policy is a statement of how the government is planning on acting toward foreign governments in certain situations. The U.S. had the Monroe Doctrine for about 100 years. This stated that the U.S. would treat any European involvement in Latin American matters as an act of aggression and war.

11 **The Christian Right & US Foreign Policy in the 21 st Century** Mohd Afandi Salleh,2020-01-07 This book is about the role of the Christian Right in the US foreign policy decision making process It reveals that the Christian Right has long been fascinated with some international issues in general and US foreign policy in particular The interest of the movement in international issues increased markedly during the George W Bush administration 2000 2009 During this period the movement successfully widened its activism from domestic social conservative issues to foreign policy issues by participating in articulating and lobbying for its religious version of American foreign policy In assessing the role of the Christian Right in US foreign policy making this dissertation examines aspects of US foreign policy namely Israel international religious freedom and global humanitarianism Based on these three aspects the Christian Right is seen as skilled in framing and defining issues The Christian Right seems effective in selecting and prioritizing international issues that have a reasonable chance of being picked up on by foreign policy decision makers especially in Congress Moreover the Christian Right has shown its maturity in seeking engagement and cooperation with other organizations regardless of whether they are secular or religious to advance its international goals Finally in pursuing and conveying its international agenda the Christian Right has adopted a more moderate and mundane approach Instead of using its traditional religious rhetoric the Christian Right has successfully projected its foreign policy preferences into the conventional realist discourse of American foreign policy

Turkish-American Relations in the 21st Century Ozan Örmeci, Herbert R. Military Decision-Making Processes Kevin Dougherty, 2013-11-08

President Bill Clinton speaking as might any commander in chief on the eve of his decision to deploy ground troops to Bosnia in 1995 declared he had no responsibility more grave than putting soldiers in harm's way. Such a statement suggests that a study of the decision making process associated with the weighty matters of using force would be enlightening. Indeed it is. The decision making process is far from standardized nor is it simple. While all individuals associated with important decisions about national security and the lives of America's service members take their responsibilities seriously, the processes by which they reach their conclusions are varied and complicated. The book traces eight traditional and emerging theories or models of decision making by first explaining the components of each model and then by analyzing its practical application through three case studies. Each chapter concludes with a discussion of the utility and explanatory power of the particular model.
