Preparing for Ministry George M. Hillman, Most seminaries now require their students to get real world training by way of supervised theological field education This volume presents the wide array of issues that must be understood in order to integrate theological education and practical ministry including the importance of theological field education its purpose and challenges the need for flexibility in meeting different students needs and the resources available to create a meaningful and educational experience

Developing a Process for Christian Leaders Dr. Johnny J. Boudreaux, 2009-12-30 This book will lower your excitement about religion but will intensify your pursuit to establish the kingdom here on earth I never cease to be amazed at how so many who say they are followers of Jesus Christ can believe that Jesus has stopped forgiving healing and calling leaders into His vineyards when there is so much to do This book is here to let everyone know that He Jesus has not returned yet but His power still generates in those who have accepted Him as their Lord and savior and are willing to hold on to the faith Leadership style does not mean that the agenda is different Many leaders today are uncomfortable with the presence of another approach to ministry It calls for us to observe that all the apostles had different styles in approaching situations and difficulties yet the ministry of Jesus was their priority alone Leadership just as everyone else will have to make adjustments as long as leading is on the agenda and in process

A critical engagement with theological education in Africa Johannes J. Knoetze, Alfred R. Brunson, 2022-02-07 The higher education landscape has arguably become one of the most arduous to traverse More so in the African context where a host of variables continuously challenge educators to reflect critically on their philosophies and practices as they engage an ever changing audience In this book a critical engagement with theological education in Africa is offered As the book originates from South Africa it is presented as a South African perspective although contributors are situated across the African continent and abroad The common denominator is that all contributors are in some way or another invested in theological education in Africa The main contribution of this collaborative work is to be sought in the insights it offers on four main areas of theological education A historical and current orientation on theological education in Africa some paradigm shifts in theological education in Africa ministerial formation needs versus theological education challenges and a critical reflection on elective models and methods The book presents the original and innovative research of scholars for fellow scholars involved in theological higher education as it is grounded in the respective fields of interest of each contributor It contributes to a better understanding of the complex African theological higher education landscape that is also mindful of post COVID 19 realities Methodologically the work draws on a combination of methods including literature studies empirical work and in some cases sectional offerings from doctoral studies as indicated in the various chapters

In the Fray David P. Gushee, 2014-05-12 In the Fray collects David Gushee's
