Contemporary French Security Policy in Africa Benedikt Erforth, 2019-07-25 Despite efforts to normalize its post colonial relationship and the downsizing of its permanent military presence France remains a sought after security provider in Africa This book uncovers individual and collective motivations that drive French foreign and security policy in Africa It explains French interventionism by drawing on actors subjective perceptions of reality and seeks to answer why French decision makers are ready to accept the considerable risks and costs involved in guaranteeing the security of African countries Adopting an actor centric constructivist ontology the author traces the emergence and subsequent development of ideas throughout the decision making processes that led to Operation Serval in Mali and Operation Sangaris in the Central African Republic

Canuel, 2021-04-15 *The Fall and Rise of French Sea Power* explores the renewal of French naval power from the fall of France in 1940 through the first two decades of the Cold War The Marine nationale continued fighting after the Armistice a service divided against itself The destruction of French sea power at the hands of the Allies the Axis and fratricidal

confrontations in the colonies continued unabated until the scuttling of the Vichy fleet in 1942 And yet just over twenty years after this dark day Charles de Gaulle announced a plan to complement the country's nuclear deterrent with a force of nuclear powered ballistic missile carrying submarines Completing the rebuilding effort that followed the nadir in Toulon this force provided the means to make the Marine nationale a fully fledged blue water navy again ready to face the complex circumstances of the Cold War An important continuum of cooperation and bitter tensions shaped naval relations between France and the Anglo Americans from World War II to the Cold War The rejuvenation of a fleet nearly wiped out during the hostilities was underpinned by a succession of forced compromises often the least bad possible reluctantly accepted by French politicians and admirals but effectively leveraged in their pursuit of an independent naval policy within a strategy of alliance Hugues Canuel demonstrates that the renaissance of French sea power was shaped by a naval policy formulated within a strategy of alliance closely adapted to the needs of a continental state with worldwide interests This work fills a distinct void in the literature concerned with the evolution of naval affairs from World War II to the 1960s The author drawing upon extensive research through French British American and NATO archives including those made public only recently regarding the sensitive circumstances surrounding the French nuclear deterrent maps out for readers the unique path adopted in France to rebuild a blue water fleet during unprecedented circumstances
