Preserving The Person A Look At The Human Sciences:

Preserving the Person C. Stephen Evans, 2002 The human quest for self understanding is ancient It transcends sociology philosophy and theology Actually the quest is not essentially academic it is a human quest pursued by persons in every age With this in mind philosopher C Stephen Evans takes a look at the human sciences and their contribution to this self understanding Evans first presents a basic problem in these sciences today the attack on the concept of personhood He reviews the contemporary understanding of mind and brain Is a person only a thinking machine or a programmed organism Then he evaluates the impact of Auguste Comte Sigmund Freud J B Watson B F Skinner and Emile Durkheim on what Evans terms *Preserving the Person* C. Stephen Evans, 1979 Shaping a Digital World Derek C. Schuurman, 2013-05-02 Building on the work of Jacques Ellul Marshall McLuhan and Neil Postman as well as a wide range of Reformed thinkers Derek Schuurman provides a brief theology of technology rooted in the Reformed tradition and oriented around the grand themes of creation fall redemption and new creation Trinitarian Personhood Bill Ury, 2002-02-01 The concept of the person is a crucial yet elusive component in the development of Western thought Few concepts are as replete with definitional difficulty Equally important is the application of a proper definition to all major Christian doctrinal commonplaces This work recognizing the insufficiency of modern theology to offer a cogent concept of person proposes a thorough historical and theological evaluation of Trinitarian personhood presented in three critical paradigm shifts by which one can measure the development of the idea of true personhood presented The three watershed eras of discernment of divine personhood presented are seen here as first the Cappadocian position of the mutual indwelling perichoresis of the divine persons is contrasted with Augustine's view of the place of relations in defining divine persons Second the ideas of Richard of St Victor whose *caritas consummata* and its relational implications met the nemesis of the Thomistic category of subsistent relations And last as an example of this important discussion in modernity the German Heribert Mühlen's dynamic phenomenological approach to Trinitarian personhood is offered as a means of countering the implicit modalisms of Barth and Rahner If the personhood of God is in essence Being in Another then Christianity must apply that ontology to all sectors of reality to be fully Christian **Making Sense of Your World** W. The Boundaries of Technique Andrew Yuengert, 2004-01-01 In this engaging and thought provoking new work Andrew Yuengert uses the moral philosophy of Thomas Aquinas to offer a fresh perspective on the sharp distinctions currently drawn between economics and ethics In contract to modern philosophical approaches which focus on the contrast between is and ought statements a Thomistic analysis begins with the actions of economic researchers This approach reconciles two popular extreme positions economics as ethical at every turn and economics as morally neutral Exploring recent controversies over the role of ethics in economics The Boundaries of Technique encourages scholars and students to discover and debate the ways in which economics is insulated from ethics and the ways in which it is dependent upon it Ultimately by bringing readers to a deeper awareness of the intrinsic involvement of the individual and the responsibility of moral choice Yuengert makes an invaluable contribution to the study and practice of economics

"Education Has Nothing to Do with Theology" Edward J. Newell, 2006-08-01 Does education have any relation to theology How do the educator's worldview commitments speak to his or her practice of education James Michael Lee brought a definite answer to these questions a firm no to the relations question and an advocacy for empirical findings over and against any speculative or theoretical positions in reply to the commitments question Lee claimed to have a universal neutral metatheory for all religious education a theory that would apply to all religious educators in any and every religion But in proposing his theory he overlooked the way that empirical facts express worldviews This book is a detective story tracing commitments that lay underneath empirical neutrality In the process the reader will see avenues that unmistakably link education to theology Education turns out to be a thoroughly worldview conditioned process This new work is essential reading for professors and students in both religious and general education
