Presidency And A World In Change:

Presidential Leadership in an Age of Change Michael Genovese, 2017-09-08 The American public hungers for a heroic leader From John F Kennedy to George W Bush every American president has left office either under a cloud or as a failed leader Michael A Genovese argues that presidents are set up for failure it is not specific presidents but the presidency itself that is the problem The presidency was designed to prevent tyranny through a system of separation of powers that inhibits presidents from exercising sufficient power to meet the demands and expectations that developed over time Each new president dreams of success only to be crushed by the paralytic weight of vetoes and roadblocks As they fail to meet expectations Americans turn on them making their already precarious position much worse Given the perilous nature of the office Genovese examines the skills required to achieve success and the roles of power and persuasion He also examines how globalization and the rapid pace of change contribute to the decline of presidential power This accessible synthesis of scholarship is geared toward an audience that is hungry to unravel the dilemmas of presidential leadership Students of the presidency will find it insightful general readers will find it illuminating

The World Bank in a Changing World Ibrahim F.I. Shihata, James D. Wolfensohn, 2023-12-18

The Post-Heroic Presidency Michael A. Genovese, Todd L. Belt, 2016-06-13 This book examines how presidents from Nixon to Obama have faced the challenges of global leadership in a dramatically changing world one with more limited resources and an increasing number of threatening challengers The immediate post World War II era was undeniably a period of American power and influence Even during the Cold War the United States was the leader of the West exerting wide ranging power internationally But beginning with the Vietnam War America began experiencing a series of setbacks and challenges to its power The Post Heroic Presidency Leveraged Leadership in an Age of Limits examines how U S presidents have attempted to reverse or contend with this new era of limited power in which presidential leadership is hamstrung due to an increasingly globalized and interdependent world one where power is more diffuse and the system of checks and balances bind a president in an age of hyper partisanship The book examines presidents of the 20th and 21st centuries explaining how the first U S president to confront this new age was Richard Nixon who along with Henry Kissinger developed a sophisticated approach to deal with the recalibration of American power It documents how other recent presidents have either tried to make peace with limited power Jimmy Carter reverse the decline Ronald Reagan ignore the implications of limits George W Bush or find ways to lead that were less ambitious more prudent and less unilateral George H W Bush Bill Clinton and Barack Obama In the cases of Clinton and Obama this shift to using soft power persuasion and multilateralism earned them criticism that they are weak thereby undermining their efforts to lead both at home and abroad

Congress,1911 The Global 2000 Report to the President: The technical report ,1981 Presidents, Secretaries Of State, And Crises In U.s. Foreign Relations Lawrence Falkowski,2019-06-21 This book presents a new approach to analyzing the impact of individuals on U S foreign policy and reports the results of this analysis for all post World War II presidents and secretaries of state including President Carter and Secretary of State Vance Its compelling but fundamentally simple theme suggests that it may be unnecessary to adopt traditional models of psychology in order to predict the behavior of foreign policy decision makers Earlier studies based on these models are either too judgmental to be predictively useful or too abstract to be relevant to the policy process itself In contrast the underlying assumption here is that the information necessary to make accurate predictions is more easily obtainable and understandable than once thought The methods employed to test Dr Falkowski s predictive model are easy to understand and to replicate The results indicate a strong relationship between variations in the memories of leaders and their abilities to adopt flexible courses of action when faced with crisis situations This relationship exists for all presidents and secretaries of state studied suggesting that it is possible to predict the behavior of new or potential leaders before they are faced with crisis decisions The implications of these results are far reaching and might be directly applicable to the selection of new leaders *Politics in a Changing World* Mr. Rohit Manglik,2024-02-16 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels **The Global 2000 Report to the President of the U.S.** Gerald O.
