**Money, Power, and Elections** Rodney A. Smith, 2014-04-07 Have campaign finance reform laws actually worked Is money less influential in electing candidates today than it was thirty years ago when legislation was first enacted Absolutely not argues Rodney A Smith in this passionately written fact filled and provocative book According to Smith the laws have had

exactly the opposite of their intended effect They have increased the likelihood that incumbents in the House and Senate will be reelected and they have greatly diminished the chances that candidates who are not wealthy will be elected Smith's claims are supported by convincing data he collected and analyzed information about all federal elections since 1920 These data show clearly that money matters now more than ever Smith thinks that reform legislation has created a new inequality for candidates that if left unchecked threatens to destroy the American electoral process by obliterating the foundational principle of free speech He argues that money buys speech and when candidates lack money to buy media time and space they are effectively silenced Their inability to speak freely violates the most significant intentions of our nation's founders that a sovereign citizenry elect its own leaders based on a free exchange of ideas For Smith campaign finance reform has unwittingly unbalanced the checks and balances created by the Framers of the Constitution After presenting a detailed historical overview of how we have reached the present crisis Smith proposes a simple solution institute a process that completely discloses relevant information about campaign donors and recipients of donations All disclosures would be available to the media which would be able to investigate and report them fully Only then Smith believes will the United States have the opportunity to be the democratic republic that its founders intended

**What are Campaigns For? The Role of Persuasion in Electoral Law and Politics** James A. Gardner, 2009-06-19

Election campaigns ought to be serious occasions in the life of a democratic polity For citizens of a democracy an election is a time to take stock to reexamine our beliefs to review our understanding of our own interests to ponder the place of those interests in the larger social order and to contemplate and if necessary to revise our understanding of how our commitments are best translated into governmental policy or so we profess to believe Americans however are haunted by the fear that our election campaigns fall far short of the ideal to which we aspire The typical modern American election campaign seems crass shallow and unengaging The arena of our democratic politics seems to lie in an uncomfortable chasm between our political ideals and everyday reality What Are Campaigns For is a multidisciplinary work of legal scholarship that examines the role of legal institutions in constituting the disjunction between political ideal and reality The book explores the contemporary American ideal of democratic citizenship in election campaigns by tracing it to its historical sources documenting its thorough infiltration of legal norms evaluating its feasibility in light of the findings of empirical social science and testing it against the requirements of democratic theory

**Elections Guide 2004 , Political Competition, Economic Reform and Growth** Ivan Pavletic,2010 Which political and institutional factors trigger reforms that enable the poor to benefit from the process of economic growth How can the incentives of policy makers be influenced in order to achieve such a dynamic These are the questions this study seeks to address by examining the transition process in post communist countries The author argues that political competition within an accepted and respected institutional environment has been a driving force in shaping the direction and success of transition reforms Evidence shows that in countries with a sufficient degree of political competition citizens responded to economic crises by calling for economic liberalization Economic liberalization removed existing distortions increased economic efficiency and raised public welfare This activated a dynamic self enforcing reform process that also strengthened the political and economic power of the poor In the absence of political competition such a process failed to emerge thereby contributing to the persistence of poverty Based on these findings there is good reason to postulate that some level of political competition is essential for transition reforms to improve economic efficiency and public welfare in a sustainable manner
