Presidential Power Robert Y. Shapiro, Martha Joynt

Kumar, Lawrence R. Jacobs, 2000-08-31 Richard Neustadt's seminal work *Presidential Power: The Politics of Leadership* has endured for nearly four decades as the core of academic study of the American presidency. Now building on and challenging many of the arguments in Neustadt's work *Presidential Power: Forging the Presidency for the Twenty-first Century* offers reflections and implications from what we have learned about presidential power as the new century dawns. These essays, including a new contribution by Neustadt himself, forge a solid reexamination of Neustadt's *Presidential Power* that addresses questions raised but not resolved by his work. A notable aspect of this volume's analysis is the transformed institution of the presidency in the wake of the impeachment hearings of the country's last twentieth-century president, Bill Clinton. From the portrayal of presidents as persuaders to the politics of presidential transitions, each of the constituent essays in this volume provides an engaging look at the state of the American presidency. *The Presidential Difference* Fred I.

Greenstein, 2001-02-28 As Americans choose and install a new president for a new century, they could do no better than to read this work by one of our keenest observers of the modern presidency. Drawing on a quarter-century's immersion in the presidential record and scores of interviews, Fred I. Greenstein provides a fascinating and instructive account of the qualities that have served well and poorly in the Oval Office from Franklin D. Roosevelt's first hundred days to the end of the Clinton administration. Greenstein offers a series of bottom-line judgments on each of his eleven subjects and a bold new explanation of why presidents succeed or fail. Previous analysts have placed their bets on the president's political prowess or personal character. Yet by the first standard, LBJ should have been our greatest president, and by the second, the nod would go to Jimmy Carter. Greenstein surveys each president's record in public communication, political skill, vision, cognitive style, and emotional intelligence. He concludes that the last is by far the most important. According to Greenstein, FDR provides endless positive lessons but is a source of warnings; Truman let his bizarre readings of history lead him astray; Eisenhower was wise but failed to communicate a vision; Kennedy had no vision; Reagan was Carter in reverse. It is Ford who is most unappreciated and genuinely interesting. Ford balanced many conflicting demands, kept his poise, and left the office much stronger than he found it. Presidents can avoid failure if they are willing to accept the warnings of failures past and act accordingly. But it is not only presidents who should read this book with care. Some flaws cannot be overcome, no matter how otherwise talented the man. Only three of Greenstein's eleven modern presidents were fundamentally free of distracting emotional perturbations. When we choose our presidents, we will do well to listen to Greenstein and beware the presidential contender who lacks emotional intelligence. In its absence, all else may turn to ashes. *The President and His Inner Circle* Thomas Preston, 2001-02-14 Few would argue that presidential policies and performance would have been the same whether John F. Kennedy or Richard Nixon became president in 1960 or if Jimmy Carter instead of Ronald Reagan had won the White House in 1980. Indeed, in recent elections, the character, prior policy experience, or personalities of candidates have played an increasing role in our assessments of their fit for the Oval Office. Further, these same characteristics are often used to explain an administration's

success or failure in policy making Obviously who the president is and what he is like matters This book a new approach to the study of the personal presidency links the characteristics of six modern American presidents their personalities and their prior policy making experience to their leadership styles advisory arrangements and decision making in the White House Thomas Preston uses M G Hermann s Personality Assessment at a Distance PAD profiling technique as well as exhaustive archival research and interviews with former advisors to develop a leadership style typology He then compares his model s expectations against the actual policy record of six past presidents using foreign policy episodes Korea 1950 for Truman Dien Bien Phu 1954 for Eisenhower Cuba 1962 for Kennedy Vietnam 1967 68 for Johnson the Gulf War 1990 91 for Bush and North Korea Haiti Bosnia 1994 95 for Clinton

Why Presidents Fail And How They Can Succeed Again Elaine C. Kamarck, 2016-07-26 Failure should not be an option in the presidency but for too long it has been the norm From the botched attempt to rescue the U S diplomats held hostage by Iran in 1980 under President Jimmy Carter and the missed intelligence on Al Qaeda before 9 11 under George W Bush to most recently the computer meltdown that marked the arrival of health care reform under Barack Obama the American presidency has been a profile in failure In *Why Presidents Fail and How They Can Succeed Again* Elaine Kamarck surveys these and other recent presidential failures to understand why Americans have lost faith in their leaders and how they can get it back Kamarck argues that presidents today spend too much time talking and not enough time governing and that they have allowed themselves to become more and more distant from the federal bureaucracy that is supposed to implement policy After decades of imperial and rhetorical presidencies we are in need of a managerial president This White House insider and former Harvard academic explains the difficulties of governing in our modern political landscape and offers examples and recommendations of how our next president can not only recreate faith in leadership but also run a competent successful administration

The Politics of the Presidency Joseph A. extraconstitutional powers during national crises are contentious points of debate among constitutional and legal scholars The Constitution is silent on the matter yet from Abraham Lincoln's suspension of habeas corpus during the Civil War to George W Bush's creation of the enemy combatants label a number of presidents have invoked emergency executive power in defense of actions not specifically endorsed in the Constitution or granted by Congress Taking up the debate Clement Fatovic digs into the intellectual history of the nation's founding to argue that the originators of liberal constitutional theory explicitly endorsed the use of extraordinary extralegal measures to deal with genuine national emergencies He traces the evolution of thought on the matter through the writings of John Locke David Hume William Blackstone and the founding fathers finding in them stated support for what Locke termed prerogative tempered by a carefully construed concept of public oriented virtues Fatovic maintains that the founders believed that moral character and republican decency would restrain the president from abusing this grant of enhanced authority and ensure that it remained temporary This engaging carefully considered survey of the conceptions of executive power in constitutional thought explains how liberalism's founders attempted to reconcile the principles of constitutional government with the fact that some circumstances would demand that an executive take normally proscribed actions Scholars of liberalism the American founding and the American presidency will find Fatovic's reasoned arguments against the conventional wisdom enlightening Ernest B Abbott *Public Opinion and Polling around the World*

John G. Geer,2004-07-21 Covering the intricate facets of America's most important democratic tradition this book serves as an important resource to understand how citizens' views are translated into governmental action *Public Opinion and Polling around the World* presents a thorough review of public opinion from its roots in colonial America to its role in today's emerging democracies More than 100 entries prepared by top scholars examine the 200 year history of public opinion

measurement methodologies with an emphasis on telephone interviews and Internet polls and key figures like George Gallup and Elmo Roper who created their own polling systems An analysis of theories compares schools of thought from the fields of psychology sociology and economics and explores how people form opinions A fascinating snapshot of the public's current views on economic issues foreign policy gender gay rights and other hot button topics observes patterns across genders race ethnic origins class and religion in regions all over the world Students academicians and political observers will discover answers to such questions as does public opinion shape the behavior of government
