Presupposition And Discourse Functions Of The Japanese Particle Mo:

Presupposition and Discourse Sachiko Shudo, 2002 First Published in 2002 Routledge is an imprint of Taylor Francis an informa company **The Presupposition and Discourse Functions of the Japanese Particle Mo** Sachiko Shudo, 2013-12-16 First Published in 2002 This volume is part of the Outstanding Dissertations in Linguistics series This study focuses on the Japanese particle mo The particle is probably best described as roughly equivalent to the English too or also although the difference between the Japanese particle and the English counterparts will be soon revealed as an important part of this study This study has two goals which are related to one another The first goal is to prescribe a monosemous account for what is presupposed by the usage of mo by investigating its constraints on the context The second goal is to develop a model in which the discourse level contribution of a linguistic form is explained by its instruction on the hearer's processing the sentence at the propositional level **The Japanese Particle Mo** Sachiko Shudo, 1999 **Emotive**

Communication in Japanese Satoko Suzuki, 2006-01-01 It has become well recognized that affective dimensions of language constitute an integral part of the linguistic system Japanese provides a prime example of the significance of emotivity as it has grammaticalized a wide variety of expressions to communicate affective information The collected articles demonstrate the rich diversity of emotive communication in Japanese and analyze various expressions with theoretical perspectives that are often independent from Western models This volume reflects the influence of traditional Japanese scholars for whom examining affective relational aspects of language has long been a central concern The authors are also influenced by more recent scholars in Japanese pragmatics such as Susumu Kuno Akio Kamio and Senko K Maynard They also draw on anthropological notions such as the inside vs outside dichotomy that have been used to describe Japanese society Logic and Engineering of Natural Language Semantics Daisuke Bekki, Koji Mineshima, Elin McCready, 2024-05-30 This book constitutes the refereed post conference proceedings of the 20th International Conference LENLS20 held in Osaka Japan during November 18-20 2023 The 19 full papers presented were carefully reviewed and selected from 46 submissions The conference aims to cover the topics at the Intersection of Language and logic and so Centers Around Linguistics both Theoretical and Computational Logic Philosophy and other sorts of Formal Approaches to these topics such as Game Theory

The Syntax of Possession in Japanese Takae Tsujioka, 2013-12-16 First Published in 2002 This volume is part of the Outstanding Dissertations in Linguistics series The aim of this thesis is to investigate the syntax of possession expressions in Japanese at the sentential level It starts with a background of possessive syntax and illustrates how Japanese presents us with an interesting case study of possessive syntax *Causes and Consequences of Word Structure* Jennifer Hay, 2004-08-02 This book explores effects of speech perception strategies upon morphological structure Using connectionist modeling perception and production experiments and calculations over lexica Jennifer Hay investigates the role of two factors known to be relevant to speech perception phonotactics and lexical frequency Hay demonstrates that low probability phoneme

transitions across morpheme boundaries exert a considerable force toward the maintenance of complex words and argues that the relative frequency of the derived form and the base significantly affects the decomposability of complex words While many have claimed that high frequency forms do not tend to be decomposed Hay asserts that this follows only when such forms are more frequent than the bases they contain The results of Hay's experiments illustrate the tight connection between speech processing lexical representations and aspects of linguistic competence The likelihood that a form will be parsed during speech perception has profound consequences from its grammaticality as a base of affixation through to fine details of its implementation in the phonetics

The Semantics of the Future , Vietnamese Tone Andrea Hoa Pham,2004-06

This new book offers research that will affect further study of tone in Vietnamese and other tonal languages

The Phonetics and Phonology of Gutturals Amanda Miller-Ockhuizen,2004-06-01 This book is the first detailed investigation and description of phonotactic sound patterns affecting Khoesan click consonant inventories It also includes the first quantitative study of phonation types in Khoesan languages and the first study of phonation types associated with pharyngeal consonants all around Although bases of OCP constraints have been presumed to be perceptual this is the first quantitative study showing the acoustic basis of a particular OCP constraint in a specific language Amanda L Miller Ockhuizen describes the phonetics and phonology of gutturals in the Khoesan language of Ju hoansi Hers is the first study of voice quality cues associated with epiglottalized vowels Thus it is the first study to show that laryngeal and pharyngeal vowels are unified phonetically by non modal voice qualities associated with them It is also the first study to show that in addition to laryngeal coarticulation whereby voice quality cues associated with laryngeal consonants are spread to a following vowel pharyngeal coarticulation also involves spreading of voice quality cues Thus guttural consonants are united in that they all spread voice quality cues onto a following vowel Voice quality cues found on vowels following guttural consonants are as large as similar cues associated with guttural vowels This acoustic similarity is shown to be the basis of a novel Guttural OCP constraint found in the language which is demonstrated to exist via co occurrence patterns found over a recorded database of all of the known roots Thus this is the first book to provide a detailed perceptual basis of an OCP constraint The database study also reports several other novel phonotactic constraints involving gutturals as well as a reanalysis of the well known Back Vowel Constraint This book describes both phonetics and phonology of the natural class of guttural consonants and shows through a quantitative acoustic investigation how the phonetic cues associated with these sounds are the bases of phonotactic constraints involving them

Working Memory in Sentence Comprehension Shravan Vasishth,2003-05-09 The first ever investigation of sentence processing in Hindi Working Memory in Sentence Comprehension studies the predictions of three existing wide coverage sentence processing models In experiments that apply these models to Hindi Shravan Vasishth develops a new sentence processing model that builds on existing theories and overcomes their empirical problems Advancing the understanding of human parsing processes this book is a landmark in cross linguistic research presenting a

challenging set of sentence processing facts that will impact future theories Manifestations of Genericity Yael Greenberg, 2004-11-23 In this book Yael Greenberg discusses and clarifies a number of controversial issues and phenomena in the generic literature including the existence of episodic genericity existential presuppositions and contextual restrictions of generics *True to Form* Christine Gunlogson, 2004-06-01 This book is concerned with the meaning and use of two kinds of declarative sentences 1 It s raining 2 It s raining The difference between 1 and 2 is intonational 1 has a final rise indicated by the question mark while 2 ends with a fall Christine Gunlogson s central claim is that the meaning and use of both kinds of sentences must be understood in terms of the meaning of their defining formal elements namely declarative sentence type and rising versus falling intonation Gunlogson supports that claim through an investigation of the use of declaratives as questions On one hand Gunlogson demonstrates that rising and falling declaratives share an aspect of conventional meaning attributable to their declarative form distinguishing them both from the corresponding polar interrogative Is it raining and constraining their use as questions On the other hand since 1 and 2 constitute a minimal pair differing only in intonation systematic differences in character and function between them in particular the relative naturalness of 1 as a question compared to 2 must be located in the contrast between the fall and the rise To account for these two sets of differences Gunlogson gives a compositional account of rising and falling declaratives under which declarative form expresses commitment to the propositional content of the declarative Rising versus falling intonation on declaratives is responsible for attribution of the commitment to the Addressee versus the Speaker respectively The result is an inherent contextual bias associated with declaratives which constitutes the crucial point of difference with interrogatives The compositional analysis is implemented in the framework of context update semantics Heim 1982 and others using an articulated version of the Common Ground Stalnaker 1978 that distinguishes the commitments of the individual discourse participants Restrictions on the use of declaratives as questions as well as differences between rising and falling declaratives as questions are shown to follow from this account Gunlogson argues that neither rising nor falling declaratives are inherently questioning rather the questioning function of declaratives arises through the interaction of sentence type intonation and context *Input-based Phonological Acquisition* Tania Zamuner, 2004-11-23 This book provides an analysis of two theories of language acquisition the theory that acquisition is primarily mediated by innate properties of language provided by universal grammar and the opposing theory that language is acquired based on the patterns in the ambient language A problem not often considered is that these two theories are confounded because the structures that are frequent across languages are also typically the most frequent within a specific language In addition the innate theory of language acquisition is difficult to quantify and qualify Using cross linguistic corpus and experimental approaches this book attempts to contrast these theories through an examination of the acquisition of word final consonants in English **Origins of Predicates** Tomio Hirose, 2004-06 This book offers a new perspective on natural language predicates by analyzing data from the Plains Cree language Contrary to

traditional understanding Cree verbal complexes are syntactic constructs composed of morphemes as syntactic objects that are subject to structurally defined constraints such as c command Tomio Hirose illustrates this in his study of vP syntax event semantics morphology syntax mappings unaccusativity noun incorporation and valency reducing phenomena **The Effects of Duration and Sonority on Countour Tone Distribution** Jie Zhang, 2013-12-16 First Published in 2002 Part of the Outstanding Dissertations in Linguistics series this is an in depth investigation of the effects of duration and sonority on contour tone distribution The term tone language usually refers to languages in which the pitch of a syllable serves lexical or grammatical functions In some tone languages the contrastive functions of pitch are sometimes played by pitch changes within a syllable Pitch changes of this kind are called contour tones The distribution of contour tones in a language are when under what phonological contexts contour tones are more readily realized Existential Faithfulness Caro Struijke, 2014-04-23 First Published in 2003 Initially a doctoral dissertation submitted to the University of Maryland at College Park in August 2000 this book is a revised version with an expanded discussion on dissimilation as well as looking at existential faithfulness relations in reduplicative TETU and feature movement Compensatory Lengthening Darya Kavitskaya, 2014-06-03 First Published in 2002 This volume is part of the Outstanding Dissertations in Linguistics series and focuses on phonetics phonology and diachrony of compensatory lengthening The term compensatory lengthening CL refers to a set of phonological phenomena wherein the disappearance of one element of a representation is accompanied by a corresponding lengthening of another element This study focuses on descriptive and formal similarities and divergences between CL of vowels triggered by consonant and by vowel loss Japanese Language and Literature, 2001 *Books on Japan in Western Languages Recently Acquired by the National Diet Library* Kokuritsu Kokkai Toshokan (Japan), 2001
