Preventing Hiv In Developing Countries Biomedical And Behavioral Approaches:

Preventing HIV in Developing Countries Laura Gibney, Ralph J. DiClemente, Sten H. Vermund, 1999-01-31 Until now planners seeking to create HIV prevention programs in developing countries relied on published interventions successfully implemented in the industrialized world This volume brings together HIV researchers and activists who describe intervention strategies employed primarily in developing countries With the battle to control HIV continuing the contributors provide insights from the field as they summarize implementation problems successes and failures End of chapter summaries and references are key features HIV program planners medical and social workers researchers and activists will benefit from

Preventing HIV in Developing Countries Laura Gibney, Ralph J. DiClemente, Sten H. Vermund, 2006-04-11 Globally action to prevent HIV spread is inadequate Over 16 000 new infections occur every day Yet we are not helpless in the face of disaster as shown by the rich prevention experience analyzed in this valuable new compendium Best practice exists a set of tried and tested ways of slowing the spread of HIV of persuading and enabling people to protect themselves and others from the virus Individually features of best practice can be found almost everywhere The tragedy on a world scale is that prevention is spotty not comprehensive the measures are not being applied on anywhere near the scale needed or with the right focus or synergy The national response may concentrate solely on sex workers for example Elsewhere efforts may go into school education for the young but ignore the risks and vulnerability of men who have sex with men Action may be patchy geographically AIDS prevention may not benefit from adequate commitment from all parts and sectors of society compromising the sustainability of the response In some countries matters are still worse there is still hardly any action at all against AIDS and scarcely any effort to make HIV visible It is no wonder that the epidemic is still emerging and in some places is altogether out of control

Dawning Answers Ronald O. Valdiserri, 2003 Dawning Answers looks at the global HIV AIDS epidemic through the lens of its evolving influence on public health theory and practice Losses from the epidemic have been devastating but the many lessons learned have positively influenced other domains of public health and will continue to generate new approaches to health assessment policy development and assurance Students and teachers of public health and preventive medicine will find in this singular volume useful analyses from the various disciplines comprising public health

Perspectives in Social Research Methods and Analysis Howard Lune, Enrique S. Pumar, Ross Koppel, 2010 This book shows students the steps involved in the research process the various strategies for conducting a valid social inquiry and most importantly the persuasiveness and elegance of reliable social research It highlights the link between academic research and the real world Included are carefully chosen examples of each of the major methodological techniques survey interviews fieldwork observations experiments content analysis secondary analysis and program evaluation Also included are selections on sampling strategies research ethics and both qualitative and quantitative data analysis

Urban Action Networks Howard Lune, 2007 Urban Action Networks is a

study of how communities organize in response to threats to their lives and well being As HIV AIDS wreaked havoc on the worlds of some of the most marginal and disenfranchised people in New York they came together to create a shared response forming a new organizational field within which their various efforts were coordinated How the communities of the most affected people organized reorganized and redefined the social and political context of HIV AIDS offers an encouraging glimpse into the way in which marginal communities can convert shared needs into collective action *Promoting Young People's Sexual Health* Roger Ingham, Peter Aggleton, 2006-09-27 Valuable contributions on different aspects of sexual and reproductive health among young people are presented in this book with a focus on developing country contexts Key discussions on issues relating to young people and their sexual activities are brought together in one volume exploring how these issues are affected by the wider contexts in which they live The interdisciplinary team of contributors examine the practical and ideological barriers that inhibit progress in the development of educational and service level improvement of young people s sexual health as well as presenting examples of efforts made to overcome such difficulties *Promoting Young People s Sexual Health* looks to the future proposing ways forward in terms of policy and legislative changes necessary for long term improvements in young people s sexual health *Mobility, Sexuality and AIDS* Felicity Thomas, Mary Haour-Knipe, Peter Aggleton, 2009-10-16 Over the past two decades population mobility has intensified and become more diverse raising important questions concerning the health and well being of people who are mobile as well as communities of origin and destination Ongoing concerns have been voiced about possible links between mobility and HIV with calls being made to contain or control migrant populations and debate linking HIV with issues of global security and surveillance being fuelled This volume challenges common assumptions about mobility HIV and AIDS A series of interlinked chapters prepared by international experts explores the experiences of people who are mobile as they relate to sexuality and to HIV susceptibility and impact The various chapters discuss the factors that contribute to the vulnerability of different mobile groups but also examine the ways in which agency resilience and adaptation shape lived experience and help people protect themselves throughout the mobility process Looking at diverse forms of migration and mobility covering flight from conflict poverty and exploitation through labour migration to sex tourism the book reports on research findings from around the world including the USA the UK sub Saharan Africa Australia Central America and China *Mobility Sexuality and AIDS* recognises the complex relationships between individual circumstances population mobility and community and state response It is invaluable reading for policy makers students and practitioners working in the fields of migration development studies anthropology sociology geography and public health *Infectious Disease Epidemiology* Kenrad E. Global Advances in HIV / AIDS Monitoring and Evaluation Greet Peersman, Michel Carael, 2004-11-18 The focus of this issue is on global advances in conducting monitoring and evaluation M E of the global response to the HIV AIDS epidemic Only by implementing comprehensive and sustainable M E systems will we know how much progress we are making as nations and as a global community in combating this pandemic The chapters primarily focus on developing nations and are presented largely from the perspective of evaluators working for donors international agencies and national governments Although it is clear that a comprehensive M E system must eventually include both monitoring and evaluation the initial aim has been to establish a foundation derived largely from surveys and monitoring information To date much of the focus in M E has come from the global level because new global funding initiatives been launched and required rapid scale up and the development of technical guidance international standards and indicators for monitoring progress and determining success At the regional and country levels the challenge has been to implement national M E plans and systems within a context of overall low M E capacity and a range of M E needs

Maternal and Child Health John Ehiri, 2009-10-03 Our current era of globalization war and socioeconomic unrest has revealed public health as a worldwide concern and a major frontier for social justice with maternal and child health at its epicenter Yet there has been a relative scarcity of training resources specifically dedicated to this crucial area Maternal and Child Health Global Challenges Programs and Policies addresses this gap in current knowledge by analyzing the range of socioeconomic and environmental factors health care disparities politics policies and cultural practices that impact the health

and safety of mothers as well as the well being and optimum development of their children Individual sections focus on unequal distribution of the world s resources politics and power specific disease concerns programs policies and emerging concerns with a focus on what is currently being done and what needs to be done to improve the health status of women children and adolescents The book s contributors are some of the world s most respected experts carefully selected to represent different global geographic regions and diverse professional disciplines related to maternal and child health from both academic and field practice perspectives Among the topics in this authoritative volume The impact of war globalization gender inequity and harmful traditional practices e g female genital mutilation Specific health concerns including tuberculosis malaria HIV and malnutrition Child and adolescent health issues from abuse and neglect to children in difficult circumstances Pregnancy related issues safety abortion and post abortion care teen pregnancy and more Strategies for planning developing and maintaining maternal and child health systems in developing countries The status of global initiatives such as Integrated Management of Childhood Illnesses and the Millennium Development Goals The status of evidence based maternal and child health in the developing world With such a wealth of information on both practical and conceptual levels Maternal and Child Health Global Challenges Programs and Policies is as relevant to students and researchers in the field as it is to policy makers and those working for global health and development organizations It also makes an excellent stand alone text for courses in global health in general and global maternal and child health in particular

The Emergence of AIDS Kenneth H. Mayer,Hank Pizer,2000 The contributors of this volume explore the history of HIV and its enormous impact on today s understanding of how viruses undergo their processes on the nonhuman and human It explains how the HIV research has taught us about the human immune system and possibilities for new therapies for handling viruses This book highlights the lessons learned over the past 20 years about AIDS and the lessons learned from AIDS and highlights the knowledge that may advance worthwhile strategies for combating HIV and AIDS in the future The 11 chapters include The Virus Versus the Immune System How Infectious is Infectious The Race Against Time The Challenge for Clinical Trials Sex and Drugs and the Virus and more Handbook of HIV Prevention John L. Peterson,Ralph J. DiClemente,2000-02-29 The Handbook of HIV Prevention is intended to provide a comprehensive overview of the theories methods and approaches for reducing HIV associated risk behaviors It represents the first single source of information about HIV prevention research in developed and developing countries The Handbook addresses the subject of HIV prevention from two interrelated perspectives First it presents the seminal theories currently used to guide the development and implementation of HIV prevention interventions Second it describes prevention approaches for diverse populations at risk of HIV infection This Handbook provides a compilation of knowledge on HIV prevention by the leading authorities in the field and will be an important resource for students researchers and clinicians in the field *No Time to Lose* Institute of Medicine,Division of Health Promotion and Disease Prevention,Committee on HIV Prevention Strategies in the United

States,2001-02-02 The United States has spent two productive decades implementing a variety of prevention programs While these efforts have slowed the rate of infection challenges remain The United States must refocus its efforts to contain the spread of HIV and AIDS in a way that would prevent as many new HIV infections as possible No Time to Lose presents the Institute of Medicine s framework for a national prevention strategy [Rethinking AIDS Prevention](#) Edward C.

Green,2003-11-30 This is not another book about how AIDS is out of control in Africa and Third World nations or one complaining about the inadequacy of secured funds to fight the pandemic The author looks objectively at countries that have succeeded in reducing HIV infection rates along with a worrisome flip side to the progress The largely medical solutions funded by major donors have had little impact in Africa the continent hardest hit by AIDS Instead relatively simple low cost behavioral change programs stressing increased monogamy and delayed sexual activity for young people have made the greatest headway in fighting or preventing the disease s spread Ugandans pioneered these simple sustainable interventions and achieved significant results As National Review journalist Rod Dreher put it Rather than pay for clinics gadgets and medical procedures especially in the important earlier years of its response to the epidemic Uganda mobilized human resources In a New York Times interview Green cited evidence that partner reduction promoted as mutual faithfulness is the single most effective way of reducing the spread of AIDS That deceptively simple solution is not merely about medical advances or condom use It is about the ABC model Abstain Be faithful and use Condoms if A and B are impossible Yet deeply rooted Western biases have obstructed the effectiveness of AIDS prevention Many Western scientists have attacked the ABC approach as impossible and moralistic Some Western activists and HIV carriers have been outraged thinking the approach passes moral judgment on their behaviors But there is also a troubling suspicion among a growing number of scientists who support the ABC model that certain opponents may simply be AIDS profiteers more interested in protecting their incomes than battling the disease This book is a bellwether in the escalating controversy offering persuasive evidence in support of the ABC approach and exposing the fallacies and motivations of its opponents [AIDS in Asia](#) Jai P Narain,2004-11-16 This

volume discusses the many advances in HIV research new initiatives and their promise for application in the Asian region It highlights the critical need for national commitment and adequate resources and for addressing the underlying HIV risk related behaviours and vulnerabilities The contributors also examine the concept of comprehensive care from home and from the community to the institutional level as well as providing up to date information on HIV drug and vaccine development

[AIDS in Africa](#) Max Essex,Souleymane Mboup,Phyllis J. Kanki,Richard G. Marlink,Sheila D. Tlou,2007-05-08 This comprehensive reference book addresses the unique challenges facing many African nations as poor infrastructure and economics continue to obstruct access to advanced treatments and AIDS care training It takes into account the context of settings with limited resources Information on how to best utilize existing resources and prioritize scaling up of infrastructure is a critical aspect of this book for those working in HIV AIDS related fields in Africa [Biomedical Index to](#)

HIV Prevention Kenneth H. Mayer, H.F. Pizer, 2009-03-13 HIV/AIDS continues to be the pandemic of our times, and there has not been a comprehensive medically based AIDS prevention book published in the last 5 years. It is estimated that 36 to 45 million people, including 2.3 million children, already are infected worldwide, and an additional 4.7 million more are infected each year. There are about 6,000 new infections daily, and about 12 million AIDS orphans. People receiving AIDS treatments feel well and have no detectable viral load but still can infect others. And even when a vaccine is found, it will take many years before it can be administered across the developing world. Discusses all aspects of AIDS prevention from epidemiology, molecular immunology, and virology to the principles of broad-based public health prevention interventions. Special focus on the array of interventions that have been proven effective through rigorous study. Identifies new trends in HIV/AIDS epidemiology and their impact on creating and implementing prevention interventions. Incorporates virology, biology, infectious diseases, vaccinology, microbicides, and research methodologies into AIDS prevention.
