Preventing Crime What Works What Doesn't What's Promising:

Preventing Crime, 1998 Crime Prevention Stephen Schneider, 2014-12-16 In *Crime Prevention Theory and Practice* Second Edition Dr Schneider has updated every chapter in this reliable text using the latest research the most recently published articles and books and feedback from professors and students using the first edition Providing an introduction to dominant approaches key concepts theories and research the book supplies concrete advice on planning implementing and evaluating a crime prevention plan This edition includes a new chapter applying crime prevention through social development principles to adolescents and young adults This chapter is a recognition of the disproportionate rate of offending by adolescents and young adults as well as the distinctive risk factors faced by these groups It also emphasizes the unique nature of applying social problem solving solutions to adolescents and young adults who have been in formal contact with the criminal justice system The focus is on recidivism prevention an often ignored but critical aspect of crime prevention Laying out a systematic blueprint for a successful crime prevention project the book also updates the extant literature on crime prevention in particular the addition of research that has been published since the first edition of this book Updated case studies reflecting new data present real examples of crime prevention programs and organizations and illustrate the conceptual theoretical and empirical elements of the book Learning objectives discussion questions and exercises facilitate learning and retention and a companion website provides ancillary material for students and professors **Behind the Mask** Tony Emmett, Alexander Butchart, 2000 This book argues for a proactive approach that focuses on preventing acts of crime and violence before they occur rather than the punishment of perpetrators after the fact It sees crime as embedded in the social structure in the disintegration of families and communities in the breakdown of authority and social trust and in the inequalities of society that breed hostility and disempowerment This theme of social disintegration is linked to recent developments in the field of social capital and in particular to recent empirical findings that link violence with economic inequality and the breakdown of social cohesion The book presents a number of strategically selected case studies of crime and injury prevention projects in South Africa including case studies of community responses to crime Preventing Crime Lawrence W. Sherman, Denise Gottfredson, Doris Mackenzie, John Eck, 1997-07-01 This report found that some prevention programs work some do not some are promising some have not been tested adequately Given the evidence of promising effective programs the report finds that the effectiveness of government funding depends heavily on whether it is directed to the urban neighborhoods where youth violence is highly concentrated Substantial reductions in national rates of serious crime can only be achieved by prevention in areas of concentrated poverty where the majority of all homicides in the nation occur where homicide rates are 20 times the national average *What Works (and Doesn't) in Reducing Recidivism* Edward J. Latessa, Shelley J. Listwan, Deborah Koetzle, 2014-09-19 This book offers criminologists and students an evidence based discussion of the latest trends in corrections Over the last several decades research has clearly shown that rehabilitation

efforts can be effective at reducing recidivism among criminal offenders. However, researchers also recognize that treatment is not a one-size-fits-all approach. Offenders vary by gender, age, crime type, and other factors, and these individual needs must be addressed by providers. Finally, issues such as leadership quality of staff and evaluation efforts affect the quality and delivery of treatment services. This book synthesizes the vast research for the student interested in correctional rehabilitation as well as for the practitioner working with offenders. While other texts have addressed issues regarding treatment in corrections, this text is unique in that it not only discusses the research on what works but also addresses implementation issues as practitioners move from theory to practice as well as the importance of staff leadership and evaluation efforts.

Successful Prevention and Youth Development Programs Laura Ferrer-Wreder, Håkan Stattin, Carolyn Cass Lorente, Jonathan G. Tubman, Lena Adamson, 2012-02-02. From a European Perspective. This book charts territory that is profoundly important and yet rarely fully understood. The authors have attempted a task that has relevance to the widest possible range of professionals working with children and adolescents. In describing and assessing the fields of prevention and promotion, they have performed an immense service to researchers in this field but also to practitioners across the spectrum from mental health nurses and doctors to teachers and psychologists, from social work professionals to psychiatrists and youth counselors. There are two other key elements that should be emphasized from the outset. The first is that the approach in this book is truly multidisciplinary, with the authors making a genuine attempt to draw upon knowledge and practice derived from all the relevant disciplines. The second element, which makes this book so important, is that the authors have worked across countries to ensure that work in the field of intervention from both North America and from Europe should be included. This is as welcome as it is refreshing. There appear to be so many barriers to true collaboration between the two continents and so many examples of either North American or European social scientists appearing blind to what is going on across the border that the approach taken here should be wholeheartedly commended. This book is essentially a review, but a rather special review.
