Prevention of Coronary Heart Disease: Diet, Lifestyle and Risk Factors in the Seven Countries Study Daan Kromhout,Alessandro Menotti,Henry Blackburn,2012-12-06 In the 1940s I was struck by reports about many apparently healthy middle aged men who dropped dead instantly from heart attacks The causes of these sudden deaths were unknown I was interested to discover physio chemical characteristics of individuals with predictive value for the occurrence of these fatal heart attacks The discovery of preventive variables would point ways to prevent this disease In order to find relationships between mode of life and susceptibility to heart disease contrasting populations had to be studied Variety not a high degree of homogeneity in culture and habits must be sought After exploratory surveys in countries with supposed differences in dietary patterns lifestyle and heart disease rates in the early 1950s the Seven Countries Study took off in 1958 This study established relationships between risk factors and development of heart disease in middle aged men in health examined in countries with cultures we demonstrated to contrast in diet and lifestyle The results obtained in the Seven Countries Study from its inception till now are presented in this book entitled Prevention of coronary heart disease Diet lifestyle and risk factors in the Seven Countries Study Long ago I realized that our concern should not be restricted to the prevention of coronary heart disease but should be extended to all diseases and premature death

Stroke Prevention in Clinical Practice Daryll M. Baker,2007-11-24 Stroke is a brain attack and a major cause of disability and the third biggest

killer Active intervention can prevent stroke especially in high risk groups Patients who have transient ischaemic attacks TIAs are at an increased risk of stroke and should be targeted Primary care physicians are the first to diagnose the TIA and are therefore vital in helping reach these people they are the doctors who can undertake a considerable amount of stroke prevention treatment Stroke Prevention in Clinical Practice fills the need for a short clear text to explain how to accurately diagnosis a TIA determine what investigations are indicated and how and when to intervene to reduce the risk of stroke Short chapters written in point form with clear diagrams and figures each chapter written by an expert in the field Behavioral Medicine Approaches to Cardiovascular Disease Prevention Kristina Orth-Gomer,Neil Schneiderman,2013-05-13

Cardiovascular disease CVD is the number one killer of men and women in industrialized countries In older age groups CVD is also the most important cause for hospitalization and in many countries it is the basis of early retirement from work Thus CVD is associated with enormous costs for care and loss of productivity as well as for disabilities pensions etc All this has motivated clinicians and scientists to develop and implement new methodologies and technologies to better care for patients who are hospitalized for heart disease Efforts to improve care in the acute phases of coronary heart disease CHD have been successful During the last decade the immediate mortality risk of a patient admitted to coronary care for a suspected myocardial infarction or other acute coronary syndrome has decreased to less than 10% Despite these achievements CVD continues to represent a major threat to the health of middle aged and elderly men and women This volume addresses myriad aspects of CHD prevention including biobehavioral and psychosocial factors behavioral epidemiology behavioral intervention models and policy The first section of the text provides an introduction to CVD prevention and behavioral medicine The second section introduces two theoretically different approaches to preventive action high risk and population based strategies The third section describes and discusses the important questions of how behavioral sciences can be conceptually integrated into traditional medically based preventive efforts The fourth section presents both population and high risk behavioral intervention approaches In summary this volume examines the social environment and its potentials for preventive actions reviews the psychosocial and biobehavioral mechanisms involved in these effects and describes concrete and practical implementations of behavioral medicine knowledge as they have been applied to CHD prevention
