A European Security Architecture after the Cold War G. Aybet, 2000-06-05

A European Security Architecture after the Cold War provides a critical account of the re projection and redefinition of Western values and security institutions in the post Coldwar era This transformation is explored in three stages The first stage covers the period 1990 91 and explains the preservation of a western security community inherited from the Cold War through a process of institutional reconstruction largely carried out on paper The second stage from 1991 to 1992 sees the incorporation of a purpose for these institutions as a framework for the implementation of collective security The third stage explores the emerging questions of legitimacy surrounding the new tasks of these institutions as they become embroiled in the war in the former Yugoslavia The precedents of legitimate intervention in upholding democracy free markets and human rights in the post coldwar era are examined from the perspectives of international law and Gramscian derived concepts of legitimacy focusing on the acceptance of military power by civil society and how intervention in these terms becomes a cultural practice

Issues in EU and US Foreign Policy Münevver Cebeci, 2011-01-06

Issues in E U and U S Foreign Policy edited by M nevver Cebeci aims at analyzing the perceptions interests and policies of the EU and the US on various international issues It portrays their convergences and divergences and reflects on their interplay The book has a geographical focus rather than a thematic one however some themes such as weapons of mass destruction dual use technology transfer energy security and democratization are unavoidable within their respective geographical contexts For example the authors inquire into the case of Iran with a special focus on nuclear proliferation they investigate Russia with a significant emphasis on energy security Iraq is examined with a discussion on the withdrawal of occupation troops and finally the authors address the case of China with a debate on dual use technology transfer

Issues in European Union and U S Foreign Policy is composed of two parts The first involves an inventive theoretical framework for understanding EU and US foreign policy The analysis extends beyond traditional approaches that seek to explain US and EU foreign policy through various dichotomies such as soft power versus hard power without overlooking the significance of such dichotomies This section further discusses how European and American scholars approach transatlantic relations in different ways The second section covers an intensive comparative analysis of EU and US foreign policy on specific issue areas Some chapters also deal with the impact of their policy divergences and convergences on transatlantic relations and NATO Nevertheless the book aims to go beyond the parochial debates of burden sharing or division of labor in transatlantic relations It focuses on and actually proposes a broader framework of cooperation and coordination for the EU and the US

Overview of Security Issues in Europe and Eurasia United States. Congress. House. Committee on Foreign Affairs. Subcommittee on Europe and Eurasia, 2011

New Challenges for the EU Internal Security Strategy Maria O'Neill, Ken Swinton, Aaron Winter, 2013-07-16

In recent years the EU and its member states have experienced a number of changes as well as

challenges in the areas of politics economics security and law As these areas are interconnected changes and challenges to any of them have implications for the others as well as implications for the populations and institutions of the EU or those coming into contact with its international power and influence This edited collection focuses primarily on security and law particularly the EU s internal security strategy The EU s Internal Security Strategy adopted by the Spanish presidency early in 2010 followed the Lisbon Treaty in 2009 building on previous developments within the EU in the Area of Freedom Security and Justice AFSJ policy The focus of the EU Internal Security Strategy is to prevent and combat serious and organised crime terrorism and cybercrime in strengthening the management of our external borders and in building resilience to natural and man made disasters The Internal Security strategy intersects and overlaps with the European Union s Counter terrorism strategy the Strategy for the External Dimension of JHA and the EU s Security Strategy The role of and interaction between these strategies their supplementing documents and their implications for crime victims the law political relations democracy and human rights form the backdrop against which the chapters in this collection are written Building on original research by its contributors this collection comprises work by authors from a wide variety of academic and professional areas and perspectives as well as different countries on a variety of areas and issues related to or raised by the EU s Internal Security Strategy from intelligence led policing to human trafficking and port security This book examines from a wide variety of disciplinary perspectives including law geography politics and practice both this further refinement of existing internal provisions on cross border crime and the increasing external relations of the EU in the AFSJ

The German Problem Transformed Thomas Banchoff, 2010-05-06 Does the new more powerful Germany pose a threat to its neighbors Does the new German Problem resemble the old The German Problem Transformed addresses these questions fifty years after the founding of the Federal Republic and ten years after the fall of the Berlin Wall Many observers have underscored the reemergence of Germany as Europe s central power After four decades of division they contend Germany is once again fully sovereign without the strictures of bipolarity its leaders are free to define and pursue national interests in East and West From this perspective the reunified Germany faces challenges not unlike those of its unified predecessor a century earlier The German Problem Transformed rejects this formulation Thomas Banchoff acknowledges post reunification challenges but argues that postwar changes not prewar analogies best illuminate them The book explains the transformation of German foreign policy through a structured analysis of four critical postwar junctures the cold war of the 1950s the détente of the 1960s and 1970s the new cold war of the early 1980s and the post cold war 1990s Each chapter examines the interaction of four factors international structure and institutions foreign policy ideas and domestic politics in driving the direction of German foreign policy at a key turning point This book will be of interest to scholars and students of German history German politics and European international relations as well as policymakers and the interested public Thomas Banchoff is Assistant Professor of Government Georgetown University

Central European Security Concerns Jacob Kipp, 2021-01-26 This book

first published in 1993 examines the security concerns of the Central European countries in the immediate aftermath of the Cold War. The collapse of the Soviet Union brought considerable uncertainty and instability to its satellite states now free from Moscow's influence. This collection of essays by leading Central European experts analyses the problems and difficulties faced by these countries as well as the opportunities offered in forging new security doctrines and alliances.

The Challenges of the U. S. -Japan Military Arrangement Anthony DiFilippo, 2002. This is an in-depth analysis of the U.S.-Japan security alliance and its implications for Japan and the Asia Pacific region. It moves away from the official line that the alliance is a vital aspect of Japan's security policy and introduces issues and arguments that are often overlooked. American security policy has failed to achieve its goals; Japan's interests are not fully served by the alliance; the alliance itself is a source of instability in the region; and the arrangement has placed constraints on Japan's own political development. The author measures current developments in U.S. foreign policy against Japan's role in the region and Japan's own political development. He assesses the consequences of the alliance for the current regional situation in Northeast Asia, looks at future policy options for Japan, and makes the case for a neutralist security policy.

Theorizing Internal Security in the European Union Raphael Bossong, Mark Rhinard, 2016-10-20. This edited volume offers different theories useful for understanding and explaining European Union cooperation on internal security matters. Cooperation on such matters has not only flourished over the past two decades but more recently has also become one of the most politicised or contested areas of European integration. Yet academic studies in the field remain predominantly empirical or not readily accessible to new scholars. The book addresses this major gap by providing a theoretical primer with a palette of options for explaining a complicated issue area reaching across the divide of critical and more mainstream scholars that typically fragments discussion and debate. *Theorizing Internal Security: Cooperation in the European Union* offers accessible and authoritative contributions by some of the most distinguished scholars in the field. Each chapter reviews the emergence of a major theoretical approach, the current state of the art for that approach, and the accompanying methodological considerations before providing an empirical illustration and an outlook on further research and dialogue with other perspectives. This book will serve as a central reference for developing our understanding of EU internal security cooperation for exploring the ongoing transformation of statehood and for illuminating the contemporary evolution of the European Union.

Arab Spring Challenges for Democracy and Security in the Mediterranean Patricia Bauer, 2016-01-22. This volume presents essential aspects of Mediterranean politics to be reconsidered in the light of the Arab upheavals since 2010. The focal point of the book is the question in how far European Mediterranean relations are challenged by the various developments. It explores the relationship between security and democracy within the Arab countries and in European Mediterranean relations. The ambiguity between the promotion of democratic values and the preservation of common interests in cooperation in economic and security affairs is stirred up by changing political actors and new conflictual constellations inside the Arab countries. All

these changes evoke new challenges for all areas of the European Mediterranean cooperation. Thus the volume assembles contributions from different angles on the re-formulation of the European Neighbourhood Policy as well as the Democracy Assistance towards the Southern Mediterranean. It discusses the major security issues of a cooperative security architecture: counter-terrorism, action, migration control and security sector reform in order to explore the relevant challenges in the field. The contributions analyse the recent developments and challenges, provide critical insights into those fields and endeavour to provide some proposals for improving Mediterranean cooperation on democracy and security. This book was published as a special issue of *Democracy and Security*. *China, Europe and International Security* Frans-Paul van der Putten, Chu Shulong, 2012-02-20. This book examines the roles played by China and Europe in the domain of international security in the 21st century. Bringing together Chinese and European expertise on the Sino-European Security relationship, this book positions Europe both the EU and the major national actors and China in a global security context. It offers not merely an elaboration of the theme of bilateral security relations but also introduces a wider view on Europe and China as global security actors. The chapters cover four main themes: the perceptions of and actual relations between Europe and China as security actors; relations of China and Europe with third parties such as the US, Russia and Iran; Europe and China as actors in multilateral security approaches; Europe and China as potential security actors in each other's technological domain or region. Given the increasingly prominent roles that both China and Europe play in international security as permanent members of the UN Security Council in the European case through the informal and partial representation of the UK and France through their extensive global economic interests and their important relations with the USA, this book provides a timely examination of the current state and future developments in the Sino-European relationship. This book will be of much interest to students of international security, Chinese politics, EU studies and IR in general. Problems of Communism, 1991.

European Peace and Security Policy Michael Brzoska, 2015-03-26. After the attacks of 9/11, terrorism and other forms of transnational risks of violence dominated official security policy. Researchers at the Institute for Peace Research and Security Policy at the University of Hamburg investigated the consequences of this change for security governance in a multi-annual research program. Case studies show that transnational security policies changed but that national governments remained dominant. In other words, the transnationalisation of threat perceptions only led to a limited internationalisation of security policies. The volume presents results of the research program. It combines conceptual work on security governance with empirical research, for instance on counterterrorism, changing perceptions of security in international organizations such as the European Union and the Organization for Security and Co-operation in Europe. *Building Security in Europe's New Borderlands* Renata Dwan, 2016-07-08. While European integration advances, many of the countries along Europe's eastern and southern periphery have fallen prey to chronic conflict punctuated by a series of small wars. Exacerbating the situation has been the lack of effective organizational means for mediating local conflicts, facilitating regional development and

structuring cooperation with larger regional and international institutions What are the prospects for enhancing security in the most volatile subregions of post communist Europe This text examines the external and internal factors that impede or foster subregional cooperation in South Eastern and East Central Europe and the Caucasus It includes chapters situating these borderlands in the context of a wider Europe with an evolving security architecture *US Department of State Dispatch* ,1994
