Proceed To Judgement:

In Sensible Judgement Max Deutscher, 2016-05-23 Taking its bearings from classic texts including Plato Kant Hegel and Arendt this thoughtful and intriguing book provides philosophical reflection on what it is to judge and what judgement achieves alongside and sometimes in competition with thinking and willing Opening with the landmark Mabo High Court case in Australia and with detailed reference to other significant debates of judgement of the twentieth century Max Deutscher seeks to explore and explain approaches to the concepts of what is good right and legal Describing a connection between reason and grounds intrinsic to judgement he analyses and explores the tendency towards absolutism that displaces proper judgement By weaving concrete instances of judgement with philosophical thought Deutscher provides a fascinating phenomenology of practices of judgement that should appeal to all readers with an interest in legal philosophical and political thought *An Exact Abridgement of the Records in the Tower of London* Great Britain. Kingship of the Scots, 842-1292 A A M Duncan, 2016-08-30 First published in 2002 and here introduced by Dauvit Broun as a core text in Scottish medieval history this classic work is considered one of the most invaluable critiques of kingship in Scotland during the nation's foundations In the early years of the period a custom of succession within one royal lineage allowed the Gaelic kingdom to grow in authority and extent The Norman Conquest of England altered the balance of power between the north and south and the relationship between the two kingdoms which had never been easy became unstable When Scotland became kingless in 1286 Edward I exploited the succession debate between Balliol and Bruce and set claim to overlordship of Scotland until Bruce's coronation fixed the right of succession by law for Scottish kingship In a meticulous account of this period Professor Duncan disentangles the power struggles during the Great Cause between the Balliols and the Bruces and of the actions motives and decisive interventions of Edward I The Kingship of the Scots is historical scholarship at its best thoughtful challenging incisive and readable **Reports of Cases Argued and Determined in the Supreme Court of Louisiana and in the Superior Court of the Territory of Louisiana.**

practical action The book describes a system and uses case studies to help sustainability practitioners and researchers consider the long term consequences of our actions in a methodical way The system integrates scientific and practical knowledge about time and temporal developments to help break down the sometimes overwhelming complexity of sustainability issues Combining theoretical conceptual thinking and practical applications this book will be of great interest to students and researchers of sustainability science environmental sciences sustainable development environmental economics political sciences and practical philosophy

[Philosophical Questions in Art Education](#)

Dorit Barchana-Lorand, 2025-08-21 This book examines the rationale of incorporating the arts in the school curriculum from a philosophical rather than pedagogical perspective Educational resources are frequently under scrutiny and education policy makers wish to maximize the use of public funds and children s time at school leaving the arts as a lower priority To understand the logic behind this Lorand revisits milestones in the history of the philosophy of art to address core questions in art education namely what are the challenges of teaching the arts And why teach the arts at all Lorand draws on the work of a broad range of philosophers including Dewey Eisner Greene Hume Plato Kant Langer Read and Schiller The book aims to show how attempts to justify art as a tool for societal and individual improvement fail in advocating art education Ultimately she claims that the arts should be taught because children have the right to receive art education That right stems from the unique nature of art
