Theistic Evolution J. P. Moreland, Stephen C. Meyer, Christopher Shaw, Ann K. Gauger, Wayne Grudem, 2020-06-20. Winner of the ECPA Book of the Year Award for Bible Reference Works. Many prominent Christians insist that the church must yield to contemporary evolutionary theory and therefore modify traditional biblical ideas about the creation of life. They argue that God used, albeit in an undetectable way, evolutionary mechanisms to produce all forms of life. Featuring two dozen highly credentialed scientists, philosophers, and theologians from Europe and North America, this volume contests this proposal, documenting evidential, logical, and theological problems with theistic evolution, making it the most comprehensive critique of theistic evolution yet produced. Explains why theistic evolution is not congruent with a biblical worldview. Features nineteen essays written by well-known experts in their fields. Designed to be used as a textbook for courses on religion and evolution. Accessible for those without expertise in the subject.

Kepler's Cosmological Synthesis Patrick J. Boner, 2013-06-17. The cosmology of Johannes Kepler remains a mystery. On the one hand, Kepler's speculations on spiritual faculties are seen as the remnants of Renaissance philosophy. On the other, his comparison of the cosmos to a clock summons the mechanical metaphor that shaped modern science. This book explores the inseparable connections between Kepler's vitalistic views and his more enduring accomplishments in astronomy. The key argument is that Kepler's celestial biology served as a bridge between his revolutionary astronomy and other less scientific interests, particularly astrology. Kepler's Cosmological Synthesis sheds new light on one of the foundational figures of the Scientific Revolution. By uncovering a new form of coherence in Kepler's world picture, it traces the unlikely intersections of mechanism and vitalism that transformed the fabric of the heavens.

The Fall of Man and the Foundations of Science Peter Harrison, 2007-12-20. See **Nature and Scripture in the Abrahamic Religions: Up to 1700** (2 vols.) Scott Mandelbrote, Jitse van der Meer, 2009-01-31. The four companion volumes of *Nature and Scripture in the Abrahamic Religions* contribute to a contextual evaluation of the mutual influences between scriptural exegesis and hermeneutics on the one hand, and practices or techniques of interpretation in natural philosophy and the natural sciences on the other. We seek to raise the low profile this theme has had both in the history of science and in the history of biblical interpretation. Furthermore, questions about the interpretation of scripture continue to be provoked by current theological reflection on scientific theories. We also seek to provide a historical context for renewed reflection on the role of the hermeneutics of scripture in the development of theological doctrines that interact with the natural sciences.
