

## A LESSON FROM NATURE

One day, a boy was playing in a garden. He was running after butterflies and trying to catch them. He was very happy to see the colourful flowers. Then he saw a frog. It was skipping and jumping. As he ran behind the frog, it jumped into the pond.

Then he saw a cow in the garden. It was chewing grass. A fly came there and buzzed over the cow. The cow swung her tail to make the fly move away. The child clapped and laughed.

The boy was enjoying the beauty of nature. He said, "Nature is wonderful. Its beauty attracts everyone."

When he saw a squirrel he ran after it and reached near the bed of roses. He tried to pluck some of the roses, but a thorn pierced his finger. It was very painful. The boy started crying and ran to his house.

His mother asked him, "What is the matter? Why are you crying?" The boy said, "The thorn of the rose pierced my finger while I was plucking it and now I feel severe pain."

His mother said, "It is your mistake. You should not have tried to pluck the flower. The flowers are meant to be seen and not to be plucked. Besides, natural beauty should never be harmed. One should not interfere with the natural processes. Instead, we should help to maintain nature."

The son said, "I will always follow what you have just told me, mum."

The Mother said, "What have you learnt today?"

Her son explained, "We should protect all living beings, whether animals or plants. We should never harm them. Harming Nature may harm human beings in the long run."

## **Reading Of Time In The Text Of Nature:**

The Reading of Time in the Text of NATURE Klaus Merkel,2000      Time and Uncertainty Paul Andre Harris,Michael Crawford,2004-01-01 The essays in this volume all originated at the 2001 conference of the International Society for the Study of Time The theme Time and Uncertainty sounds redundant but the contributions try to come to terms with the irreducible openness of time and the impermanence of life The essays from various disciplines have been grouped around fracture and rupture grappling with time and uncertainty as a breach and rapture and structure solving uncertainty into pattern      **Reading: Its Nature and Development** Charles Hubbard Judd,William Scott Gray,Clarence Truman Gray,Katherine McLaughlin,Adam Raymond Gilliland,1918      **God and the Book of Nature** Mark Harris,2023-12-19 God and the Book of Nature develops theological views of the natural sciences in light of the recent theological turn in science and religion scholarship and the science engaged theology movement Centered around the Book of Nature metaphor it brings together contributions by theologians natural scientists and philosophers based in Europe and North America They provide an exploration of complementary and even contesting readings of the Book of Nature particularly in light of the vexing questions that arise around essentialism and unity in the field of science and religion Taking an experimental and open ended approach the volume does not attempt to unify the readings into a single plot that defines the Book of Nature still less a single theology of nature but instead it represents a variety of hermeneutical stances Overall the book embraces a constructive theological attitude toward the modern sciences and makes significant contributions to the research literature in science and religion      **Rain and Resurrection How the Talmud and Science Read the World** Irun Cohen,2010-02-12 This book presents a set of essays interpreting excerpts from the Talmud that illustrate values essential to Western science It includes another set of essays interpreting the function of interpretation in the method of science to associate Talmudic and post modern concepts      **The Nature of Biblical Criticism** John Barton,2007-01-01 Biblical criticism faces increasing hostility on two fronts from biblical conservatives who claim it is inherently positivistic and religiously skeptical and from postmodernists who see it as driven by the falsities of objectivity and neutrality In this magisterial overview of the key factors and developments in biblical studies John Barton demonstrates that these evaluations of biblical criticism fail to do justice to the work that has been done by critical scholars over many generations Traditional biblical criticism has had as its central concern a semantic interest a desire to establish the plain sense of the biblical text which in itself requires sensitivity to many literary aspects of texts Therefore he argues biblical criticism already includes many of the methodological approaches now being recommended as alternatives to it and further the agenda of biblical studies is far less fragmented than often thought      **The Books of Nature and Scripture** J.E. Force,R.H. Popkin,2013-03-09 Dick Popkin and James Force have attended a number of recent conferences where it was apparent that much new and important research was being done in the fields of interpreting Newton s and Spinoza s contributions as

biblical scholars and of the relationship between their biblical scholarship and other aspects of their particular philosophies This collection represents the best current research in this area It stands alone as the only work to bring together the best current work on these topics Its primary audience is specialised scholars of the thought of Newton and Spinoza as well as historians of the philosophical ideas of the late seventeenth and early eighteenth centuries      **Tracking Thoreau** John Dolis,2005 Arguing against the most recent trend in Thoreau studies Dolis contends that for Thoreau nature is primordially a construct it cannot be understood apart from language through cultural constructions techniques by means of which the subject composes the object Both nature and the very nature of nature itself are subject to this single configuration Subjectivity in turn entails its own technology its style It figures out both nature and the composition of its self as well Jacket
