

CLASSROOM READING TESTS AS TEACHING TOOLS

MUHAMMAD KALEEM RAZA KHAN

Introduction

Testing presupposes teaching and if it is incorporated in the teaching it can give good results in real learning. Besides, since most of the prevalent English language tests are summative, learners seldom learn about their mistakes in the tests. It has often been thought that testing is a specialized field and that there are experts who design and administer them. Testing is also regarded as a technical and tedious job because it involves assessment of scripts, preparation and announcement of results. The aim of this paper is to suggest that classroom tests, designed and used by the classroom teacher, can become effective tools of language teaching and learning.

Language Testing in Pakistan

In Pakistan the words test and examination often strike terror in the hearts of the majority of students. In my opinion, this is so because of various reasons:

- * Sometimes, tests are used as a form of "punishment".
- * Learners are always afraid of tests because they are more concerned with the results: they either fail or pass. In most cases, this anxiety kills all interest in learning.
- * Usually tests are given at the end of the term and learners never learn about their errors. They only know whether they have passed the test or have failed.

Presently the tests of English language in Pakistan consist mainly of discrete point grammar items and questions based on prescribed texts. This requires simple mechanical skills and a good memory as the focus is on testing textual knowledge of English rather than the use of English. All teaching/learning in Pakistan is examination oriented and in the majority of classroom only those language elements are taught which are likely to be asked in the examination, real learning, therefore, does not take place. The objective of the test-taker is to pass the test and get the certificate or degree. The aims and objectives of the test are never mentioned, some senior teachers set the examination papers and more or less the same pattern is repeated in future examination, which makes more than sixty percent test predictable. Those who want to pass the test can do so "by solving" test papers of the last
