European Rural Landscapes Hannes Palang, 2004-05-31 This book a compendium of 28 papers selected from two recent conferences on the topic focuses on aspects of rural landscape broadly related to issues of language representation and power These are issues that have not been addressed on a pan European landscape level before The aim is to offer a deeper interdisciplinary understanding of historical and contemporary processes in European landscapes **The New Dimensions of the European Landscapes** R.H.G Jongman, 2004-12-09 The European Landscape is under stress of changing land use and a changing attitude of its users Globalization the disappearance of the iron curtain and the recent EU enlargement to 25 countries have changed the economic and environmental dimensions of Europe Europe is changing its face from a western and eastern part to one European Union and to fast connections between its centres of activity The rural and cultural heritage of Europe has to be adapted to cope with this change However its landscape is worth to be conserved as well because it represents the European history in the same way as castles and churches It even more represents the history of the common people because it has been the tradition of the rural population that made these landscapes It cannot be prevented that Europe is changing and it is good that Europe adapts to the new dimensions of the world We in Europe have to define what we think is important and what must be conserved what can be adapted to be used for new functions and what can be abolished because it has no value These decisions will determine the new dimensions of the European landscapes The Frontis Workshop on the New Dimensions of the European Landscape was held on 10 12 June 2002 Wageningen University and Research Centre organized this workshop aiming to develop visions on the landscape in Europe its development and design in the future and to strengthen the international network in landscape planning **European Landscapes in Transition** Teresa Pinto-Correia, Jørgen Primdahl, Bas Pedrolí, 2018-01-25 European rural landscapes as we experience them today are the result of ongoing processes and interactions between nature and society These are changing fast the future landscapes will be different from those we know currently Written for academics policy makers and practitioners this book is the first to explore the complex histories of rural landscapes in Europe as a basis for their sound

governance in future Tensions between the needs of agricultural spaces driven by economic incentives and a variety of non agricultural functions are explored to demonstrate current challenges and the shortfalls in the policies that address them Using inspiring case studies that highlight the roles of regional agents and communities the authors go further than the usual analyses to illustrate the importance of local context Written by experts currently working to revitalise the rural landscapes of Europe the text concludes with suggestions for improving landscape policy and planning practice *Europe's Living Landscapes* Bas Pedroli, Anne van Doorn, Geert de Blust, 2014-12-22 This book is the result of three symposia of the Dutch Society for Landscape Ecology The first symposium in 2005 was about the National Ecological Network in the Netherlands The reason was that the implementation of the NEN decided upon in 1990 was halfway The second symposium in 2006 was about urban ecology and the third one to be held in 2007 will be about civil infrastructure This book does not cover the conferences completely and new contributions are added The three themes are important contexts in which landscape ecologists do their research and apply their knowledge and skills Of course there are many more subjects to hold conferences about for example climate change urbanisation agriculture landscape ecology itself etc The focus of the conferences is on the Netherlands with its urbanisation intensive land use and water management as characteristic features Although many WLO members do their work abroad or in an international context these conferences offer a window on what happens in the Dutch context The experiences may be of value for other contexts and that is why we present the results in English The selected themes and the focus on the Dutch context are serious demarcations of what landscape ecology in the Netherlands is all about The book does not represent all research and applications of landscape ecology *Preserving and Constructing Place Attachment in Europe* Oana-Ramona Ilovan, Iwona Markuszewska, 2022-10-10 This book offers a variety of theoretical and methodological approaches to place attachment from a European perspective Starting from a dynamic relational and participatory concept of place attachment the book discusses place making and place attachment processes through place based development and community place driven actions It also presents examples of creating place attachment through nature and culture based contexts and focuses on how sustainable planning and territorial identities enhance place attachment Finally this book presents and discusses re constructing place attachment within transition processes and through strategic solutions for urban recovery and regeneration of post industrial areas By considering the social environmental economic and political effects of building strengthening and maintaining place attachment this book is a valuable read for all those working with and interested in learning more about place attachment geographers landscape planners sociologists psychologists environmental and political scientists and members of community movements

interactions resting on and taking shape through millennia of continuity in tradition have been striving to adapt to technological advances while currently juggling with manifold and multilayered socioeconomic and climate environmental crises
