**Metacognition in Science Education** Anat Zohar, Yehudit Judy Dori, 2011-10-20 Why  
 is metacognition gaining recognition both in education generally and in science learning in particular What does  
 metacognition contribute to the theory and practice of science learning Metacognition in Science Education discusses  
 emerging topics at the intersection of metacognition with the teaching and learning of science concepts and with higher  
 order thinking more generally The book provides readers with a background on metacognition and analyses the latest  
 developments in the field It also gives an account of best practice methodology Expanding on the theoretical underpinnings  
 of metacognition and written by world leaders in metacognitive research the chapters present cutting edge studies on how  
 various forms of metacognitive instruction enhance understanding and thinking in science classrooms The editors strive for  
 conceptual coherency in the various definitions of metacognition that appear in the book and show that the study of  
 metacognition is not an end in itself Rather it is integral to other important constructs such as self regulation literacy the  
 teaching of thinking strategies motivation meta strategies conceptual understanding reflection and critical thinking The book  
 testifies to a growing recognition of the potential value of metacognition to science learning It will motivate science  
 educators in different educational contexts to incorporate this topic into their ongoing research and practice
