Rand J. Spiro, Michael DeSchryver, Michelle Schira Hagerman, Paul M. Morsink, Penny Thompson, 2015-03-05 The Internet is transforming the experience of reading and learning through reading Is this transformation effecting a radical change in reading processes as readers synthesize understandings from fragments across multiple texts Or conversely is the Internet merely a new place to use the same reading skills and processes developed through experience with traditional print based media Are the changes in reading processes a matter of degree or are they fundamentally new And if so how must reading theory research and instruction adjust This volume brings together distinguished experts from the fields of reading research teacher education educational psychology cognitive science rhetoric and composition digital humanities and educational technology to address these questions Every question is not answered in

every chapter How could they be But every contributor has many thoughtful things to say about a subset of these important questions Together they add up to a comprehensive response to the issues the field faces as it approaches what may well be or not a crossroads A website devoted to extending discussion around the book in creative and disjunctive ways readingatacrossroads net moves it beyond the printed page     The Book's Road in the Age of Digitization Janina Krieger,2023-01-28 Although every area of life is permeated by digital processes the majority of Germans seem to resist digital alternatives with regard to the activity of reading The printed book continues to enjoy much greater popularity than the eBook This seems surprising since the entire communication behavior has moved to digital devices So what lies behind this Why are there still printed books in digital times Previous studies of the printed book have focused primarily on its media future as this seemed threatened by digitization In this work Janina Krieger instead examines the past from three perspectives in order to gain insights into the present While other studies always chose one method and these mostly belonged to the quantitative approach here three subjects are identified which are examined with different methods and in their combination can provide an answer to the research question the consumers of literature the readers literature itself the selected genre is the novel and the media theories of the 20th century which have already dealt with media change     **Fifty Ways to Practice Reading** Belinda Young-Davy,2016-05-10 This book is made for students of English as a Second or Foreign Language revised and updated for 2023 Learn 50 ways to practice and improve reading skills By applying these methods you will read faster and better and remember information longer The book is divided into six sections 1 Good Habits 2 Finding Reading Material 3 Reading Strategies 4 Handling Vocabulary 5 Working with Longer Texts 6 Reading for Pleasure You do not need to be living in an English speaking country or be currently taking an English class to use this book However students who are already in a class can also use this book to study and learn more effectively     *Text Complexity* Douglas Fisher,Nancy Frey,Diane Lapp,2016-01-28 There is a big difference between assigning complex texts and teaching complex texts No matter what discipline you teach learn how to use complexity as a dynamic powerful tool for sliding the right text in front of your students at just the right time Updates to this new edition include How to s for measuring countable features of any written work A rubric for analyzing the complexity of both literary and informational texts Classroom scenarios that show the difference between a healthy struggle and frustration The authors latest thinking on teacher modeling close reading scaffolded small group reading and independent reading     **The Christian's penny magazine, and friend of the people [ed. by J. *Absolute War* Mark Hewitson, 2017-02-09 Wars have played a fundamental part in modern German history Although infrequent conflicts involving German states have usually been extensive and often catastrophic constituting turning points for Europe as a whole *Absolute War* is the first in a series of studies from Mark Hewitson that explore how such conflicts were experienced by soldiers and civilians during wartime and how they were subsequently imagined and understood during peacetime from Clausewitz and Kleist to J nger and Adorno Without such an understanding it is difficult to make sense of the dramatic shifts characterising the politics of Germany and Europe over the

past two centuries The studies argue that the ease or reluctance with which Germans went to war and the far reaching consequences of such wars on domestic politics were related to soldiers and civilians attitudes to violence and death as well as to long term transformations in contemporaries conceptualisation of conflict Absolute War reassesses the meaning of military conflict for the millions of German subjects who were directly implicated in the Revolutionary and Napoleonic Wars Based on a re reading of contemporary diaries letters memoirs official correspondence press reports pamphlets treatises plays and cartoons this volume refocuses attention on combat and conscription as the central components of new forms of mass warfare It concentrates in particular on the impact of violence killing and death on many soldiers and some civilians experiences and subsequent memories of conflict War has often been conceived of as an act of violence pushed to its utmost bounds as Clausewitz put it but the relationship between military conflicts and violent acts remains a problematic one
