Reading Saussure A Critical Commentary On The Cours De Linguistique Generale:

   Reading Saussure Roy Harris,1987   *Re-reading Saussure* Paul J. Thibault,2013-01-11 Through a detailed re reading of Saussures s work in the light of contemporary developments in the human life and physical sciences Paul Thibault provides us with the means to redefine and refocus our theories of social meaning making Saussure s theory of language is generally considered to be a formal theory of abstract sign types and sign systems separate from our individual and social practices of making meaning In this challenging book Thibault presents a different view of Saussure Paying close attention to the original texts including the Cours de Linguistic Generale he demonstrates that Saussure was centrally concerned with trying to formulate a theory of how meanings are made Re reading Saussure does more than simply engage with Saussure s theory in a new and up to date way however In addition to demonstrating the continuing viability of Saussure s thinking through a range of examples it makes an important intervention in contemporary linguistic and semiotic debate   **The Literary-Linguistic Analysis of the Bible** ,2024-09-16 This collection of essays explores the rich intellectual heritage of Russian Formalism and the Prague School of Linguistics to illuminate their influence on the field of biblical studies and apply their constructive and creative potential for advancing linguistic theory discourse analysis and literary interpretation of the texts of the Old and New Testaments in their original languages   **Ideologies of Language** John E. Joseph,Talbot J. Taylor,2014-02-03 Is the study of language ideologically neutral If so is this study objective and autonomous One of the most cherished assumptions of modern academic linguistics is that the study of language is or should be ideologically neutral This professed ideological neutrality goes hand in hand with claims of scientific objectivity and explanatory autonomy Ideologies of Language counters these claims and assumptions by demonstrating not only their descriptive inaccuracy but also their conceptual incoherence   **Rhetoric and Pedagogy** Winifred Bryan Horner,Michael Leff,Robert Gaines,Jean Dietz Moss,Beth S. Bennett,2013-12-02 To provide a view of the history of western rhetoric this volume presents original articles by a number of world renowned scholars representing different countries and varying viewpoints In discussing the status of the historical perspectives on rhetoric these international scholars also present a tribute to James J Murphy whose scholarship and service did much to shape the field The book will introduce new insights into western European rhetoric and its connections with English rhetoric   **The Linguistics of Speech** William A. Kretzschmar,2009-03-19 This insightful study proposes a unified theory of speech through which conflicting ideas about language might be understood It is founded on a number of key points such as the continuum of linguistic behaviour extensive variation in language features the importance of regional and social proximity to shared linguistic production and differential frequency as a key factor in linguistic production both in regional and social groups and in text corpora The study shows how this new linguistics of speech does not reject rules in favour of language use or reject language use in favour of rules rather it shows how rules can come from language as people use it Written in a clear engaging style and containing invaluably accessible introductions to

complex theoretical concepts this work will be of great interest to students and scholars of sociolinguistics dialectology and corpus linguistics   Reader's Guide to the History of Science Arne Hessenbruch,2013-12-16 The Reader s Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn   **Saussure's Philosophy of Language as Phenomenology** Beata Stawarska,2015-02-12 This book draws on recent developments in research on Ferdinand de Saussure s general linguistics to challenge the structuralist doctrine associated with the posthumous Course in General Linguistics 1916 and to develop a new philosophical interpretation of Saussure s conception of language based solely on authentic source materials This project follows two new editorial paradigms 1 a critical re examination of the 1916 Course in light of the relevant sources and 2 a reclamation of the historically authentic materials from Saussure s Nachlass some of them recently discovered In Stawarska s book this editorial paradigm shift serves to expose the difficulties surrounding the official Saussurean doctrine with its sets of oppositional pairings the signifier and the signified la langue and la parole synchrony and diachrony The book therefore puts pressure not only on the validity of the posthumous editorial redaction of Saussure s course in general linguistics in the Course but also on its structuralist and post structuralist legacy within the works of Levi Strauss Lacan and Derrida Its constructive contribution consists in reclaiming the writings from Saussure s Nachlass in the service of a linguistic phenomenology which intersects individual expression in the present with historically sedimented social conventions Stawarska develops such a conception of language by engaging Saussure s own reflections with relevant writings by Hegel Husserl Roman Jakobson and Merleau Ponty Finally she enriches her philosophical critique with a detailed historical account of the material and institutional processes that led to the ghostwriting and legitimizing the Course as official Saussurean doctrine   *Performative Linguistics* Douglas Robinson,2003-09-02 In this book Douglas Robinson introduces a new distinction between constative and performative linguistics arguing that Austin s distinction can be used to understand linguistic methodologies Constative linguistics Robinson suggests includes methodologies aimed at freezing language as an abstract sign system while performative linguistics explores how language is used or performed in those speech situations Robinson then tests his hypothesis on the act of translation Drawing on a range of language scholars and theorists Performative Linguistics consolidates the many disparate action approaches to language into a new paradigm for the study of language   **The Phenomenology of Modern Legal Discourse** William E. Conklin,2024-05-01 Originally published in 1998 The Phenomenology of Modern Legal Discourse recovers the suffering which is concealed as lawyers judges and other legal officials resignify a harm through the special vocabulary and grammar which constitutes legal language At the moment of re signification an untranslatable gap erupts between the knowers special language and the embodied meanings of the non

knower The Phenomenology claims that the gap can be unconcealed if the knowers of the special language reconsider their assumptions about legal meaning the body and desire With a broad grasp of diverse problematics from the legal procedures legal discourses and legal theory of three jurisdictions to exemplify his claims the author interweaves arguments which draw from Edmund Husserl s and Maurice Merleau Ponty s insights about meaning The author s effort demonstrates how one may unconceal lived laws through a re reading of the role of the experiential body in legal signification The author s effort to retrieve the embodiment of legal meaning de stabilizes deep assumptions of contemporary lawyers and legal theorists

    Encyclopedia of Library and Information Science Allen Kent,1994-05-12 The Encyclopedia of Library and Information Science provides an outstanding resource in 33 published volumes with 2 helpful indexes This thorough reference set written by 1300 eminent international experts offers librarians information computer scientists bibliographers documentalists systems analysts and students convenient access to the techniques and tools of both library and information science Impeccably researched cross referenced alphabetized by subject and generously illustrated the Encyclopedia of Library and Information Science integrates the essential theoretical and practical information accumulating in this rapidly growing field

    Inscribing Science Timothy Lenoir,1998 Metaphors of inscription and writing figure prominently in all levels of discourse in and about science The description of nature as a book written in the language of mathematics has been a common trope since at least the time of Galileo a metaphor supplemented in our own day by the characterization of DNA sequences as the code for the book of life decipherable in terms of protein semantic units An important recent direction in the fields of science and literature studies is to consider such descriptions as more than metaphoric as revelatory of the processes of signification in science more generally Nearly everywhere we look the semiotic turn is upon us Recent science and technology studies have been characterized by a rich diversity of research directions manifesting several trends apparently counter to one another On the one hand stands the rich tradition of detailed microstudies of experiments instruments and scientific practice on the other hand are grouped studies grander in scope aimed at examining science within the framework of cultural production This volume of sixteen essays seeks common ground among these different approaches by juxtaposing work from historically focused science and literature studies with work inspired by poststructuralist philosophy and semiotics The contributors are Gillian Beer Lisa Bloom Robert Brain Lorraine Daston Richard M Doyle David Gugerli Hans Ulrich Gumbrecht Friedrich Kittler Timothy Lenoir Alex Pang Philip Prodger Hans J rg Rheinberger Robin Rider Brian Rotman Simon Schaffer and Bernhard Siegert   **African Philosophy and the Quest for Autonomy** Leonhard Praeg,2022-06-08 As academic subject African philosophy is predominantly concerned with epistemology It aims at re presenting a lost body of authentic African thought This apparently austere a historical concern is framed by a grand narrative of liberation that cannot but politicise the quest for epistemological autonomy By politicise I mean that the desire to re cover an authentic African epistemology in order to establish African philosophy as autonomous

subject ironically re iterates Western enlightenment notions of the autonomous subject Here in the pursuit of an autonomous subject the terms of historical oppression are necessarily duplicated in the terms of liberation In this study I use the term disfigurement to refer to the double bind peculiar to post coloniality in which the African subject finds itself when it has to establish and affirm a sense of apartheid in order to confirm the assumption of difference by inventing its own autonomy in a way that ironically conflicts with an African conception of the autonomous subject The transcendental concern with epistemological authenticity and autonomy indicative of an oppressive desire for Western style autonomy necessary as it may be in a post colonial context is placed in an ethical framework that seeks to remain faithful to the African dictum of identity and autonomy I am because we are Whereas the first three chapters are concerned with the transcendental question what is African philosophy the fourth and last chapter situates the ethical framework within which this question arises in the context of the recently completed South African Truth and Reconciliation Commission **Interpreting Justice** Moira Inghilleri,2013-03-01 In this timely study Inghilleri examines the interface between ethics language and politics during acts of interpreting with reference to two particular sites of transnational conflict the political and judicial context of asylum adjudication and the geo political context of war The book characterizes the social and moral spaces in which the translation of the spoken word occurs in ways that reflect the realities of the trans nationally constituted locally and globally informed environments in which interpreters work alongside others One of the core arguments is that the rather restricted notion of neutrality that remains central to translator and interpreter practices does not adequately reflect the complex and paradoxical nature of these socially and politically inscribed encounters and others like them This study offers an alternative theoretical perspective on language and ethics to those which have shaped and informed translation and interpreting theory and practice in recent years   Annual Review of Information Science and Technology Information Today Inc,2005-10 ARIST published annually since 1966 is a landmark publication within the information science community It surveys the landscape of information science and technology providing an analytical authoritative and accessible overview of recent trends and significant developments The range of topics varies considerably reflecting the dynamism of the discipline and the diversity of theoretical and applied perspectives While ARIST continues to cover key topics associated with classical information science e g bibliometrics information retrieval editor Blaise Cronin is selectively expanding its footprint in an effort to connect information science more tightly with cognate academic and professional communities Contents of Volume 40 2006 SECTION I Information and Society Chapter 1 The Micro and Macroeconomics of Information Sandra Braman Chapter 2 The Geographies of the Internet Matthew Zook Chapter 3 Open Access M Carl Drott SECTION II Technologies and Systems Chapter 4 TREC An Overview Donna K Harman and Ellen M Voorhees Chapter 5 Semantic Relations in Information Science Christopher S G Khoo and Jin Cheon Na Chapter 6 Intelligence and Security Informatics Hsinchun Chen and Jennifer Xu SECTION III Information Needs and Use Chapter 7 Information Behavior Donald O Case Chapter 8 Collaborative Information

Browne,2014-12-17 Interweaving phenomenological hermeneutical and sociopolitical analyses this book considers the ways in which feminists conceptualize and produce the temporalities of feminism including the time of the trace narrative time calendar time and generational time   *Irresistible Dictation* Steven Meyer,2001 Before Gertrude Stein became the twentieth century s preeminent experimental writer she spent a decade conducting research at Harvard s psychological laboratory and the Johns Hopkins Medical School This book shows how her extensive scientific training continued to exert a profound influence on the development of her extraordinary literary practices   Training for Performance John Matthews,2011-06-01 Training for Performance is the first work of its kind not in the sense that it addresses training for performance but in that it invites a critical questioning of the imperatives and the rhetoric which govern academic and practical concerns for training alike Dr Martin Welton Queen Mary University of London Training for Performance a Meta disciplinary Account is an innovative contribution to the field of work on contemporary actor and performer training John Matthews introduces the concept of askeology a field of study that dissolves divisions between disciplines and their exercises and identifies four meta disciplinary categories in the process of training that are common to all institutional contexts Vocation Obedience Formation and Automatisation Through the exploration of contrasting accounts of training and the differing cultural politics within which they operate Matthews provides a highly original and comprehensive approach to defining one of the most frequently used terms in theatre and performance studies Training for Performance encourages performers to think afresh about how they understand and engage in their training and is an invaluable resource for any actor student or professional interested in the process of performance   **Lexicology** M.A.K. Halliday,Colin Yallop,2007-03-08 This readable introductory textbook presents a concise survey of lexicology The first section of the book is a survey of the study of words providing students with an overview of basic issues in defining and understanding the word as a unit of language This section also examines the history of lexicology the evolution of dictionaries and recent developments in the field The second section extends this study of lexicology into the relationship between words and meaning etymology prescription language as social phenomenon and translation Lexicology A Short Introduction will be of interest to undergraduate students of linguistics   Semiotica ,1996
