legislative mandates administrative policies teaching practices parenting beliefs and adherence to strict psychological constructs Each of these factors has created a pervasive psycho educational belief of average ability The authors challenge what they consider as a pseudo definition of average that was brought about as an attempt by policymakers to test their way out of addressing the true inequities found in society Further the authors identify how educational policymakers have sacrificed the education of an entire class of students by creating the illusion that underachievement can be eliminated simply through lowering standards and examination pass rates In chronicling the plight of average students the authors capture the emotions and attitudes of teachers parents and students whose frustrations have been set aside in order to meet other special interests The authors explore methods that provide students of average knowledge in any given area with the appropriate tools necessary for succeeding in school Finally the authors argue that there is no such thing as average intelligence
