package size In general the higher pin count and smaller package size are accomplished by reducing the bond pad size and spacing pitch on the chip level and the lead pin solder dimensions and pitch on the chip carrier module level The last few years have witnessed an explosive growth in the research and development efforts devoted to FPT as a direct result of the rapid growth of SMT and miniaturization Some examples are hand held lightweight video recorders that can take sharp pictures hand held lightweight devices that can track the worldwide package movements and portable computers with tiny yet powerful microprocessors and large memory capability that can fit into a briefcase or into the palm of your hand
