Introduction to Sound

Processing Davide Rocchesso, 2003 *Music, Gestalt, and Computing* Marc Leman, 1997-09-10 This book presents a coherent state of the art survey on the area of systematic and cognitive musicology which has enjoyed dynamic growth now for many years It is devoted to exploring the relationships between acoustics human information processing and culture as well as to methodological issues raised by the widespread use of computers as a powerful tool for theory construction theory testing and the manipulation of musical information or any kind of data manipulation related to music *Music and Schema Theory* Marc Leman, 2012-12-06 Music is an important domain of application for schema theory The perceptual structures for pitch and timbre have been mapped via schemata with results that have contributed to a better understanding of music perception Yet we still need to know how a schema comes into existence or how it functions in a particular perception task This book provides a foundation for the understanding of the emergence and functionality of schemata by means of computer based simulations of tone center perception It is about how memory structures self organize and how they use contextual information to guide perception *Rob Milne* Alan Bundy, Sean Wilson, 2006 Rob Milne was a remarkable man He died of a heart attack on the 5th of June 2005 while climbing Mount Everest in Nepal He was a hi tech entrepreneur an AI researcher and a passionate mountaineer This work commemorates and celebrates the life of Rob Milne and covers various facets of Rob Milne s life

Neural Nets Maria Marinaro, Roberto Tagliaferri, 2003-06-30 This book constitutes the thoroughly refereed post proceedings of the 13th Italian Workshop on Neural Nets WIRN VIETRI 2002 held in Vietri sul Mare Italy in May June 2002 The 21 revised full papers presented together with three invited papers were carefully reviewed and revised during two rounds of selection and improvement The papers are organized in topical sections on architectures and algorithms image and signal processing applications and learning in neural networks **Advances in Neural Information Processing Systems**

10 Michael I. Jordan, Michael J. Kearns, Sara A. Solla, 1998 The annual conference on Neural Information Processing Systems NIPS is the flagship conference on neural computation These proceedings contain all of the papers that were presented

Case-Based Reasoning Research and Development Klaus-Dieter Althoff, Ralph Bergmann, L. Karl Branting, 2003-07-31 The biennial International Conference on Case Based Reasoning ICCBR rises which began in Sesimbra Portugal in 1995 was intended to provide an international forum for the best fundamental and applied research in case based reasoning CBR It was hoped that such a forum would encourage the growth and rigor of the field and overcome the previous tendency toward isolated national CBR communities The foresight of the original ICCBR organizers has been rewarded by the growth of a vigorous and cosmopolitan CBR community CBR is now widely recognized as a powerful and important computational technique for a wide range of practical applications By promoting an exchange of ideas among CBR researchers from across the globe the ICCBR

series has facilitated the broader acceptance and use of CBR ICCBR 99 has continued this tradition by attracting high quality research and applications papers from around the world Researchers from 21 countries submitted 80 papers to ICCBR 99 From these submissions 17 papers were selected for long oral presentation 7 were accepted for short oral presentation and 19 papers were accepted as posters This volume sets forth these 43 papers which contain both mature work and innovative new ideas

Electronic and Computer Music Robert L. Wick, 1997-01-28 This work is a handy desk reference for academic and public library music reference collections as well as teachers musicians and composers The more than 250 books discussed represent a core bibliography on this late 20th century phenomenon that is very much in transition as the concepts of electronic and computer merge into a single music whether acoustic or electronic in origin Of special interest is an up to date listing of on line sources found on the Internet including World Wide Web sites and electronic discussion lists Topics represented include history literature on synthesis and synthesizers electronic music instruments and devices electronic music composition MIDI Musical Instrument Digital Interface the teaching of computer and electronic music bibliographies and dictionaries Covered by way of appendices are major dissertations and theses lists of periodicals that have dealt with the subject and a compilation of electronic music instrument and device system manuals currently in print

Multimedia Data Mining and Knowledge Discovery Valery A. Petrushin, Latifur Khan, 2007-10-20 This tightly edited collection of papers from leading researchers worldwide provides an overview of the current state of the art in the field of multimedia data mining and knowledge discovery and discusses the variety of hot topics in multimedia data mining research Consisting of an introductory section and four topical parts the book describes the objectives and current tendencies in multimedia data mining research and their applications Each part contains an overview of its chapters and leads the reader with a structured approach through the diverse subjects in the field Written with graduates in mind this much needed comprehensive reflection of the current state of multimedia data mining and knowledge discovery will also be a valuable resource for researchers in the field This book provides an overview of the current state of the art in the field of multimedia data mining and knowledge discovery and discusses the variety of hot topics in multimedia data mining research Topics and Features Features a comprehensive introduction to multimedia data mining and its relevance today presents a global perspective of the field and its various components provides broad yet thorough and detailed coverage of the subject numerous chapters reference websites with supplementary materials and demonstrations explores multimedia data exploration multimedia data modeling and evaluation and visualization offers an entire part devoted to applications and case studies Written with graduate students in mind this much needed comprehensive survey of the current state of multimedia data mining and knowledge discovery will also serve as a valuable resource for researchers with interests in multimedia data mining summarization indexing and retrieval

Algorithmic Composition Gerhard Nierhaus, 2009-08-28 Algorithmic composition composing by means of formalizable methods has a century old tradition not only in occidental music history

This is the first book to provide a detailed overview of prominent procedures of algorithmic composition in a pragmatic way rather than by treating formalizable aspects in single works. In addition to an historic overview, each chapter presents a specific class of algorithm in a compositional context by providing a general introduction to its development and theoretical basis and describes different musical applications. Each chapter outlines the strengths, weaknesses, and possible aesthetical implications resulting from the application of the treated approaches. Topics covered are Markov models, generative grammars, transition networks, chaos and self-similarity, genetic algorithms, cellular automata, neural networks, and artificial intelligence. The comprehensive bibliography makes this work ideal for the musician and the researcher alike.
