**Educational Psychology in Context** Bruce A. Marlowe,Alan S. Canestrari,2006 Educational Psychology in Context Readings for Future Teachers takes an exciting new approach to educational psychology by addressing the questions that real teachers in real schools ask about real students This book s purpose is to provide a stimulating alternative to traditional texts by helping teachers develop a strong theoretical and research based understanding of how their students learn and develop Unlike other texts this book of major readings is an anthology of primary source readings selected for students entering the teaching profession and for teachers interested in examining learning and development Readings in Psychology for the Teacher Dennis Child,1977 **Readings in Educational Psychology** Edgar Stones,2012 The papers in this volume relate to the nature and conditions of classroom learning with particular emphasis on the cognitive aspects They are concerned with the question of concept formation and stress the importance of the teacher s function in ensuring that the child really has assimilated the ideas and not merely the words for the concepts The role of language is fundamental to this theme and the interaction of language thinking and learning is dealt with in the first section of the book This section also provides a context within which subsequent discussions of classroom learning problems can be viewed Some problems concerning the elaboration of a general theory of teaching are then examined with particular reference to possible methods of bridging the gap between research and implementation Readings in Educational Psychology E. **Teaching Reading** Emerald Dechant, 2013-09-13 In the words of Aldous Huxley Every man who knows how to read has it in his power to magnify himself to multiply the ways in which he exists to make his life full significant and interesting Few people question the value of reading in fact most extol its virtues As our culture becomes more complex reading plays an increasingly greater role in satisfying personal needs and in promoting social awareness and growth In the last 20 years the teaching of this invaluable skill has focused so intensely on comprehension and prediction from context that it has lost sight of the significance of automaticity and fluency in the word identification process Reading is a synthesis of word recognition and comprehension thus this text is about these basic processes and their integration A common plea from teachers today is that research and psychology be translated into teaching behavior Therefore the aim of this book is twofold one to identify report organize and discuss those bits of data research and theory that are most relevant to the teacher's understanding of the reading process and two to help educators to interpret and apply theory and research data to everyday classroom teaching as well as to the problems encountered frequently in developmental and remedial teaching

**Research on Writing Instruction Practices for Equitable and Effective Teaching** Hodges, Tracey S.,2022-05-27

Writing is a critical component for teaching children about advocacy and empowering student voice as well as an essential tool for learning in many disciplines Yet writing instruction in schools often focuses on traditional methods such as the composition of five paragraph essays or the adherence to proper grammatical conventions While these are two components of writing instruction and preparation in education they only provide a small glimpse into the depth and breadth of writing As such writing instruction is increasingly complex and requires multiple perspectives and levels of skill among teachers The Handbook of Research on Writing Instruction Practices for Equitable and Effective Teaching serves as a comprehensive reference of issues related to writing instruction and leading research about perspectives methods and approaches for equitable and effective writing instruction It includes practices beyond K 12 including best writing practices at the college level as well as the development of future teachers Providing unique coverage on culturally relevant writing socio and racio linguistic justice and urgent writing pedagogies this major reference work is an indispensable resource for administrators and educators of both K 12 and higher education pre service teachers teacher educators libraries government officials researchers and academicians
