This is a volume that can be productively consulted by practicing lawyers and college university teachers in the fields of antitrust law, regulation, both lawyers and economists and public policy. Meessen, Marc Bungenberg, Adelheid Puttler, 2009-07-29. Governments or at least the clever ones among them are aware of the factors guiding business activities. In the course of adopting and enforcing economic legislation, they seek to attract business activities in order to increase national income and fiscal revenues, generate employment opportunities and very generally please voters. Hence economic law may be considered an economic good as suggested by the title of this book. That function which most rules of economic law have in the competition of systems was strengthened by the worldwide liberalization of trade. Today it is of greater significance than ever before. Lawyers and economists, academics and practitioners from inside and outside Germany have taken a look at the facts and discussed approaches to conceptualizing them. The resulting thirty essays collected in this volume contribute to the interpretation of existing and the making of new economic law. **The Economics of Regulation** Alfred E. Kahn, 1988-06-22. As Chairman of the Civil Aeronautics Board in the late 1970s, Alfred E. Kahn presided over the deregulation of the airlines, and his book, published earlier in that decade, presented the first comprehensive integration of the economic theory and institutional practice of economic regulation. In his lengthy new introduction to this edition, Kahn surveys and analyzes the deregulation revolution that has not only swept the airlines but has transformed American public utilities and private industries generally over the past seventeen years. While attitudes toward regulation have changed several times in the intervening years and government regulation has waxed and waned, the question of whether to regulate more or to regulate less is a topic of constant debate, one that *The Economics of Regulation* addresses incisively. It clearly remains the standard work in the field, a starting point and reference tool for anyone working in regulation. Kahn points out that while dramatic changes have come about in the structurally competitive industries—the airlines, trucking, stock exchange, brokerage services, railroads, buses, cable, television, oil, and natural gas—the consensus about the desirability and necessity for regulated monopoly in public utilities has likewise been dissolving under the burdens of inflation, fuel crises, and the traumatic experience with nuclear plants. Kahn reviews and assesses the changes in both areas; he is particularly frank in his appraisal of the effect of deregulation on the airlines. His conclusion today mirrors that of his original seminal work: that different industries need different mixes of institutional arrangements that cannot be decided on the basis of ideology. **Kyoto University Economic Review**, 1926. *Megaregulation Contested* Benedict Kingsbury, David M. Malone, Paul Mertenskötter, Richard B. Stewart, Thomas Streinz, Atsushi Sunami, 2019-06-06. The Japan-led Trans-Pacific Partnership (CPTPPA) of 2018 is the most far-reaching megaregional economic agreement in force with several major countries beyond its eleven negotiating countries, also

interested Still bearing the stamp of the original US involvement before the Trump era reversal TPP is the first instance of megaregulation a demanding combination of inter state economic ordering and national regulatory governance on a highly ambitious substantive and trans regional scale Its text and ambition have influenced other negotiations ranging from the Japan EU Agreement JEEPA and the US Mexico Canada Agreement USMCA to the projected Pan Asian Regional Comprehensive Economic Partnership RCEP This book provides an extensive analysis of TPP as a megaregulatory project for channelling and managing new pressures of globalization and of core critical arguments made against economic megaregulation from standpoints of development inequality labour rights environmental interests corporate capture and elite governance Specialized chapters cover supply chains digital economy trade facilitation intellectual property currency levels competition and state owned enterprises government procurement investment prescriptions for national regulation and the TPP institutions Country studies include detailed analyses of TPP related politics and approaches in Japan Mexico Brazil China India Indonesia and Thailand Contributors include leading practitioners and scholars in law economics and political science At a time when the WTO and other global scale institutions are struggling with economic nationalism and geopolitics and bilateral and regional agreements are pressed by public disagreement and incompatibility with digital and capital and value chain flows the megaregional ambition of TPP is increasingly important as a precedent requiring the close scrutiny this book presents

Environmental Law, Policy, and Economics Nicholas Askounes Ashford, Charles C. Caldart, 2008 The past twenty five years have seen a significant evolution in environmental policy with new environmental legislation and substantive amendments to earlier laws significant advances in environmental science and changes in the treatment of science and scientific uncertainty by the courts This book offers a detailed discussion of the important issues in environmental law policy and economics tracing their development over the past few decades through an examination of environmental law cases and commentaries by leading scholars The authors focus on pollution addressing both pollution control and prevention but also emphasize the evaluation design and use of the law to stimulate technical change and industrial transformation arguing that there is a need to address broader issues of sustainable development Environmental Law Policy and Economics which grew out of courses taught by the authors at MIT treats the traditional topics covered in most classes in environmental law and policy including common law and administrative law concepts and the primary federal legislation But it goes beyond these to address topics not often found in a single volume the information based obligations of industry enforcement of environmental law market based and voluntary alternatives to traditional regulation risk assessment environmental economics and technological innovation and diffusion Countering arguments found in other texts that government should play a reduced role in environmental protection this book argues that clear stringent legal requirements coupled with flexible means for meeting them and meaningful stakeholder participation are necessary for bringing about environmental improvements and technological transformations

Public Procurement and the EU Competition Rules

Albert Sánchez Graells, 2011-01-29 Shortlisted for the 2012 Prix Vogel in Economic Law Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This new work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market In this process of convergence between competition and public procurement law the need for this joint study is clearly apparent As such the book asks whether competition law principles inform or condition public procurement rules and whether they are adequate to ensure that competition is not distorted in markets where public procurement is particularly significant The book moves away from the classical focus of public procurement on the activities of private actors developing instead an analytical framework for the appraisal of the market behaviour of the public buyer from a competition perspective The analysis is both legal and economic Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of the rules in competition and public procurement against a standard of the proper functioning of undistorted competition in the market for public procurement **Elgar Encyclopedia on the Economics of Competition, Regulation and Antitrust** Michael D. Noel, 2024-12-09 Providing an extensive overview of the literature the Elgar Encyclopedia on the Economics of Competition Regulation and Antitrust examines perspectives on the many interrelated issues in competition economics **Netherlands Yearbook of International Law 2017** Fabian Amtenbrink, Denise Prévost, Ramses A. Wessel, 2018-06-21 This Volume of the Netherlands Yearbook of International Law explores emerging trends and key developments in international economic law It examines shifts in the levels of cooperation from multilateral to plurilateral regional or bilateral or vice versa and shifts in the forms of cooperation new types of actors and instruments These trends are analysed both from a conceptual and a practical perspective with contributions addressing drivers for change historical perspectives future developments and evolutions in specific policy fields While a focus on international economic law may certainly not tell the whole story in relation to shifts in levels and forms of international cooperation it does allow for a more detailed analysis of some of the important trends we currently witness The Netherlands Yearbook of International Law was first published in 1970 It offers a forum for the publication of scholarly articles in a varying thematic area of public international law **Reading Hayek in the 21st Century** T. Papaioannou, 2012-09-18 Papaioannou offers a radical new reading of Hayek in the 21st century arguing that the moral dimension of his political theory is based on the methodological implications of an epistemologically founded morality a morality that must respect the natural limits of human knowledge **Library of Congress Subject Headings** Library of Congress, Library of Congress.
