Readings In The Humanities First Year Program:

Readings in Writing Courses Richard C. Raymond, 2010-12-01 As the title suggests this six chapter book responds to a question which in Western culture goes back to Plato Aristotle Cicero and Quintilian namely What should rhetoric teachers ask their students to read Primarily historical the first two chapters trace conflicting answers to the question above focusing on two constructive results of the debate the re invention of rhetoric and writing as a discipline a coherent and growing body of knowledge and as a result the emergence of independent departments of writing free from departments of English free therefore to develop their own curriculum and to manage their own budgets Additionally the second chapter examines two destructive consequences of this debate the ban of literature from writing courses where students might profitably study both and as a result the often painful departmental splits which not only separate former colleagues but also cramp the pedagogy of those trained to teach both writing and literature More than a survey of key publications this chapter encourages readers to honor the discipline of rhetoric but to make a place for literature on their composition syllabi The next four chapters provide pedagogical support for these chief claims that literature can and should be taught in writing courses and that such readings need not distract students from the primary text their own writing On the contrary these readings motivate serious writing when students feel invited into a conversation on issues that touch their lives These pedagogical chapters then move entering professionals from the theoretical debate to the application of theory therefore the book would serve well professors of courses in composition theory particularly those who enjoy teaching the conflicts and preparing their graduate students to design assignments and courses that apply theories of learning reading and composing Readings in the Humanities Saint Anselm College (Manchester, N.H.), 1996 **Slacking** Adam Kissel, Rachel Alexander Cambre, Madison Marino Doan, 2025-05-06 Prestige no longer ensures substance at Ivy League schools students must navigate a maze of shallow politicized courses to uncover the rare gems of a classical education exposing the need for academic renewal This book is a banquet of the absurdities that Ivy League universities serve up to their students under the rubric of general education Anyone who wonders how the graduates of America's elite institutions come by their jaundiced view of our country should start here The few who refuse to slack are limited to the hard sciences and the few remaining excellent courses in the humanities Peter Wood President National Association of Scholars Ivy League universities can no longer be trusted to produce well educated students Even a cursory review of the course titles at top schools shows that these 320 000 plus diplomas may confer legacy prestige to graduates but not necessarily knowledge or wisdom At Cornell for example students can take Queer Girlhood Beyoncé Nation and Intersectional Disability Studies The course list at Yale includes Pop Sapphism and Comparative Settler Geographies At Princeton Shoes Penn offers Reality TV and Gender and Decolonizing French Food Even worse these courses actually fulfill general education requirements It is still possible to earn a great education at Princeton Harvard Yale Penn Columbia Brown Cornell or Dartmouth but doing so requires prudence and persistence In

Slacking Adam Kissel Rachel Alexander Cambre and Madison Marino Doan dedicate one chapter to each Ivy League college providing specific information about the coursework that serious students should pursue to extract a real education from these decaying institutions Every chapter concludes with two course lists both of which meet the school s general education requirements One displays the worst collection of courses that an inveterate slacker could take to skate through the requirements for entertainment reinforcement of political biases and narrow specialization The other lists the best choice of courses a dedicated striver could take to acquire a well rounded content rich liberal education The contrast between the two sounds a rousing alarm bell for curriculum reform at America s best known colleges *Integrating the First-year*
