Compromise Planning : A Theoretical Approach from a Distant Corner of Europe Louis C.

Wassenhoven,2022-03-28 The purpose of the book is to elaborate a planning theory which departs from the plethora of theories which reflect the conditions of developed countries of the North West The empirical material of this effort is derived from a country Greece which sits on the edge between North West and South East at the corner of Europe No doubt there is extensive international literature on planning theory in general from a bewildering variety of viewpoints The interested professional or student of urban and regional planning is certainly aware of the dizzying flood of books articles and research reports on planning theory and of their never ending borrowing of obscure concepts from more respectable scientific disciplines from mathematics to philosophy and from physics to economics human geography and sociology He or she probably observed that there is a growing interest in theoretical approaches from the viewpoint of the so called Global South The author of the present book has for many decades faced the impasse of attempting to transplant theories founded on the experience of the North West to countries with a totally different historical political social and geographical background He learned that the reality that planners face is unpredictable patchy and responsive to social processes frequently of a very pedestrian nature Planning strives to deal with private interests which planners are keen to envelop in a single public

interest which is extremely hard to define The behaviour of the average citizen far from being that of the neoclassical model of the homo economicus is that of an individual a kind of homo individualis who interacts with the state and the public administration within a complex web of mutual dependence and negotiation The state and its administrative apparatus i e the key determinants and fixers of urban and regional planning policy bargain with this individual offer inducements exemptions derogations and privileges deviate unhesitatingly from their grand policy pronouncements but still defend the rationality and comprehensiveness of the planning system they have legislated and operationalized It is by and large a successful *modus vivendi* but only thanks to a constant practice of compromise Hence the term compromise planning which the author coined as an alternative to all the existing theoretical forms of planning This is the sort of planning and of the accompanying theory with which he deals in this book It is the outcome of experience and knowledge accumulated in a long personal journey of academic teaching in England and Greece research and professional involvement

International Public Policy and Management David Levi-Faur, Eran Vigoda-Gadot, 2004-11-30 An impressive study of economic state social and international restructuring *International Public Policy and Management* explores new patterns and advances in the global integration of policies that result from an ever increasing pace of shared knowledge regulations and norms in countries around the globe It considers the impact of globalized

Urban Theory Beyond the West Tim Edensor, Mark Jayne, 2012-03-12 Since the late eighteenth century academic engagement with political economic social cultural and spatial changes in our cities has been dominated by theoretical frameworks crafted with reference to just a small number of cities in the Global North This volume seeks to redress that balance and focuses on theoretical engagements with cities beyond the West

through female perspectives It reveals the importance of having female lenses on certain societal debates Twenty five leading female urban scholars draw on principles concepts and positions that are foundational to other frameworks and fields specifically critical studies indigenous and ethnic studies postcolonial theory queer theory feminist theory progressive urban theory social ecology urban planning and design architecture urban economics and urban social geography landscape urbanism new urbanism heritage management and urbanism political ecology and cultural studies to present alternatives to the current classical theories and conceptualizations that have failed to engage a truly intersectional analysis of dominant city and urban discourses policies and practices The book is intended for scholars of urban studies policy makers and city planning professionals

Untamed Urbanisms Adriana Allen,Andrea Lampis,Mark Swilling,2015-07-30 An electronic version of this book is available Open Access at www.tandfebooks.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 3.0 license One of the major challenges of urban development has been reconciling the way cities develop with the mounting evidence of resource depletion and the negative environmental impacts of predominantly urban based modes of production and consumption This book aims to re politicise the relationship between urban development sustainability and justice and to explore the tensions emerging under real circumstances as well as their potential for transformative change For some cities are the root of all that is unsustainable while for others cities provide unique opportunities for sustainability oriented innovations that address equity and ecological challenges This book is rooted in the latter category but recognises that if cities continue to evolve along current trajectories they will be where the large bulk of the most unsustainable and inequitable human activities are concentrated By drawing on a range of case studies from both the global South and global North this book is unique in its aim to develop an integrated social ecological perspective on the challenge of sustainable urban development Through the interdisciplinary and original research of a new generation of urban researchers across the global South and North this book addresses old debates in new ways and raises new questions about sustainable urban development
