## Readings In Values Clarification:

**Readings in Values Clarification** Sidney B. Simon, Howard Kirschenbaum, 1973      **Values Clarification** Sidney B. Simon, Leland W. Howe, 2025-05-01 Are you getting what you want out of life? Do you know where you draw the line when it comes to sex, money, cheating on your income tax, or accepting an indecent proposal? Becoming aware of your values is the key to making wise choices in all aspects of your life, from picking a partner to buying a house. Created by Dr. Sidney Simon, coauthor of the bestselling *Getting Unstuck* and two other leading professionals, this workbook has already had an impact on hundreds of thousands of lives. Its scores of intriguing interactive exercises were designed to uncover the hidden beliefs that reveal what matters most to you, how you deal with life-changing conflicts, which career choices will make you happiest, what leisure time activities provide you with the most pleasure, where you honestly stand on controversial issues, what day-to-day events are likely to make you angry, excited, anxious, confident, how best to motivate yourself, and what beliefs can cause conflict in your family or love relationship.      **Values Clarification** Sidney B. Simon, Leland Howe, Howard Kirschenbaum, 1991-06-01      *Philosophical Foundations for Moral Education and Character Development* George F. McLean, Frederick Edward Ellrod, 1992      **Values Education** John R. Meyer, 1975-09-01 Values, those intangible guideposts, serve as standards and perceptual screens which assist us in selecting our priorities for reflection and action. Our quest is to clarify, compare, and form values expressed in defensible and consistent value judgements and actions.      Reconstructing Education Greta Hofman Nemiroff, 1992-05-30 Drawing on elements of progressive education, existential theory, feminist pedagogy, and values education, critical humanism combines the holistic psychological concerns of humanistic education with the sociopolitical contextualization of critical pedagogy. Developed over the past seventeen years in one of North America's most experimental postsecondary programs, The New School of Dawson College, this theory and practice responds to both the personal and the political needs of students. *Reconstructing Education* is at once a review of this century's educational theories, an account of the work at the school, and an empowering illustration of the way in which schools can incite the motivation of students and encourage them to become active members in a truly democratic society. The case study chapters on The New School give concrete examples of how this philosophy is manifested in the school's methodology, structure, and pedagogy, and draws heavily on the written work of teachers and students. To formulate a similar approach for a specific school, it is essential to combine a rigorous analysis of existing educational models with the dialectical process of creating and recreating a new model defined by the articulation of both learners and teachers' affective, cognitive, and socially constructed needs. This is a valuable book for anyone concerned with alternative approaches to education and for courses on educational theory or the philosophy of education.      Moral Education F. Clark Power, Ronald J. Nuzzi, Darcia Narvaez, Daniel K. Lapsley, Thomas C. Hunt, Terry L. Hunt, 2007-12-30 This work delves into the topic of moral education in America's K-12 schools. Following an introductory historical chapter, it analyzes salient topics and notable leaders in the field of moral

education It treats the issues thoroughly and fairly providing a heightened understanding of both the major and minor themes in moral education      **Understanding Human Values** Milton Rokeach,2008-06-30 This volume presents theoretical methodological and empirical advances in understanding and also in the effects of understanding individual and societal values      **Readings in Philosophy of Education** Evelina M. *Character Education* Wouter Sanderse, 2012 Many teachers want to contribute to children's moral development but this desire has not always resulted in a profound grasp of what moral education really means why it would be desirable and how it can best be achieved This book confronts these questions by examining what Aristotelian virtue ethics can illuminate about moral education At the same time it evaluates whether Aristotelian theory can still be useful for contemporary educational practice The argument culminates in a morally justified and psychologically realistic account of how virtue can best be taught in schools The approach called character education sees moral education not as enforcing rules or transferring values in separate subjects Instead it encourages teachers to be a morally exemplary teacher which is revealed through all kinds of small decisions and emotional reactions This philosophical essay takes a constructive but critical stance towards empirical research about the effectiveness of teaching methods and the realism of character traits

Bringing in a New Era in Character Education William Damon, 2013-09-01 The educational system in the United States has ended its failed experiment with separating the intellectual from the moral Schools from K 12 to colleges and universities are increasingly paying attention to students values and character But how can we ensure this new era in character education makes the right kind of difference to young people What obstacles in our

current educational system must we overcome and what new opportunities can we create This anthology offers unique perspectives on what is needed to make character education an effective lasting part of our educational agenda Each chapter points out the directions that character education must take today and offers strategies essential for progress The expert contributors reveal why relativism has threatened the moral development of young people in our time and how we can pass core values down to new generations of students in ways that will elevate their conduct and their life goals And they show the critical importance of reestablishing student morality and character as targets of higher education s central mission Perhaps most important they clarify the necessity of authority in any moral education endeavor and show how it is a powerful force for developing personal freedom and building character
