Ready For Europe Public Administration Reform And European Accession In Central And Eastern Europe:

Ready for Europe Barbara Nunberg, 2000-01-01 As the ongoing political and economic transition in the Central and Eastern Europe countries CEE moves into the next century the most advanced countries in the region are preparing to deal with their prospective entry into the European Union More a process than an event joining the EU is likely to place heightened demands on public administrations throughout the region To assist these countries with their efforts the Bank conducted a study of the regions The results of that study are included in this volume *Ready for Europe* specifies and clarifies the administrative requirements of accession The author uses in depth case studies for three pre accession countries Estonia Hungary and the Czech Republic to make these specifications The book defines the performance level countries will need to attain for a range of administrative tasks so the countries may reach a minimal threshold for EU membership It applies selected standards to determine each country s readiness for accession and for the longer term transition agenda The author focuses on these three critical areas of administrative performance in the context of EU accession How advanced is the development of a politically neutral professional human resource cadre in the civil service Do countries have the necessary institutional infrastructure at the government s core that is cabinet level to formulate and coordinate policymaking in an efficient and democratic manner How well are the dedicated institutional structures and processes established to shepherd countries through the accession process working

Central and Eastern Europe After Transition Wojciech Sadurski, 2016-04-08 How have national identities changed developed and reacted in the wake of transition from communism to democracy in Central and Eastern Europe *Central and Eastern Europe After Transition* defines and examines new autonomous differences adopted at the state and the supranational level in the post transitional phase of the post Communist area and considers their impact on constitutions democracy and legal culture With representative contributions from older and newer EU members the book provides a broad set of cultural points for reference Its comparative and interdisciplinary approach includes a useful selection of bibliographical resources specifically devoted to the Central Eastern European countries transitions

Progress Toward the Unification of Europe Helena Tang, 2000-01-01 Ten countries of Central and Eastern Europe and the Baltic CEECs are candidates to join an enlarged European Union EU in the years to come The ten are Bulgaria the Czech Republic Estonia Hungary Latvia Lithuania Poland Romania the Slovak Republic and Slovenia This enlargement will bring many opportunities to the both the EU and the candidate countries For the EU it will bring enhanced weight and influence For the candidate countries it should mean an improvement of their long term growth prospects by providing access to an open single market The accession process is providing the impetus for the acceleration of much needed economic political institutional and social reforms in some of the CEECs as they strive to meet EU membership requirements The key for the CEECs is to achieve sustained high long term growth in order to meet their ultimate objective of accession The EU has already concluded agreements with the CEECs which went beyond the narrowly conceived ideas of

market access to include the alignment of the CEEC economic system with that of the EU s This report sets out the future agenda for the successful integration of the CEECs into an enlarged EU The first priority is for each country to complete its own process of transition to a free market democratic state In short this will mean that many will have to address their fiscal challenges and ensure fiscal sustainability the challenge of global financial integration opening of their capital accounts the strengthening of their administrative capacity the reduction of unemployment and the promotion of social inclusion

Structural Reforms in Southeastern Europe Since the Kosovo Conflict Daniela Gressani, Saumya Mitra, 2002-01-01 This study examines the progress made by the countries of south east Europe Albania Bosnia and Herzegovina Bulgaria Croatia FYR Macedonia Romania and the Federal Republic of Yugoslavia towards implementing structural economic reforms in the three years since the end of the Kosovo conflict as well as considering the challenges that lie ahead It discusses four key areas of reform strengthening public finances and fighting corruption creating a liberal trade environment encouraging foreign investment and fostering the growth of private markets

EU Funds in the New Member States Christian Hagemann, 2018-12-07 This book examines new member states problems with the absorption of EU funds Since accession many new member states from Central and Eastern Europe struggle to access their billions of development funds from Brussels While existing research mostly emphasizes the role of states administrative capacities to account for absorption problems this study adds the so far neglected role of politics as party politicization to the equation The argument is tested using a combination of fuzzy set Qualitative Comparative Analysis fsQCA with two detailed process tracing case studies This book will appeal to scholars interested in EU cohesion policy post accession compliance and post communist politics

EU Enlargement and the Failure of Conditionality Dimitry Kochenov, 2008-01-01 Among the criteria for accession to the European Union are democracy and the Rule of Law In the insightful analysis offered by the author of this book these concepts while admirable and even necessary criteria in principle are almost impossible to measure and any judgement grounded in them will always be difficult to justify In his words by including analysis of democracy and the Rule of Law within the field of the EU enlargement law the Union entered an unstable terrain of vague causal connections and blurred definitions Dr Kochenov addresses this problem by proceeding as follows 1 Outlining EU enlargement law in general including the principle of conditionality and the role played by the analysis of democracy and the Rule of Law in enlargement preparation 2 Focusing on the role actually played by the monitoring of democracy and the Rule of Law in ten candidate countries scrutinizing the way the EU used the legal tools and competences outlined in its enlargement law The book adopts the EU s own understanding of democracy and the Rule of Law as derived directly from the substance of the numerous legal and political instruments issued by the Community Institutions and especially the Commission in the course of the pre accession process In this way it demonstrates the actual as opposed to the officially announced role played by the assessment of democracy and the Rule of Law in the candidate countries in the regulation of enlargement Many formidable

inconsistencies in the application of the conditionality principle are thus laid bare This leads the author to a series of recommendations on policy and procedure that he demonstrates could be profitably applied to the regulation of current and future accessions using the Commission's own structure of monitoring pre accession reforms in the three areas of the legislature executive and judiciary in candidate countries The probity and soundness of these recommendations firmly grounded as they are in the actual pre accession monitoring and its consequences for the pre accession progress of ten Eastern European countries admitted to the EU in 2004 and 2007 will greatly interest policymakers and scholars concerned with the future of European integration *Armenia* Gillian Perkins,Ruslan Yemtsov,2001-01-01 This book compares the recent evolution of the structure of inputs and expenditure in Armenia's general education with international norms and practice In the context of the government's sectoral reform strategy it also outlines various proposals for restructuring the system The study clarifies what inefficiencies might mean for future costs and performance of the system highlights the trade offs involved and identifies measures needed to overcome constraints to rationalization **The Development of Electricity**

Markets in the Euro-Mediterranean Area Daniel Müller-Jentsch,2001-01-01 Annotation The main objective of this report is to outline key policy issues that need to be addressed in order to achieve energy sector reform at the national and regional levels *The TB and HIV/AIDS Epidemics in the Russian Federation* ,2001-01-01 The TB and HIV AIDS Epidemics in the Russian Federation describes the socioeconomic conditions in the Russian Federation and examines how they are influencing infectious disease epidemics It also discusses the impact of the epidemics on the population including the incidence and prevalence in the general and prison populations Finally this paper presents a description of a mathematical model of improvements in health status possible under various TB control strategies with implications for HIV AIDS as well

Subsidies in World Fisheries Matteo Milazzo,1998-01-01 In the past six years the world's fishery sector has reached a turning point with global fish production reaching a plateau of approximately 100 million tons annually While aquaculture output continued to grow yields from capture fisheries were uneven and showed increasing signs of stagnation because of widespread overfishing and overcapitalization ineffective management deteriorating resource health declining or flat global harvests and inefficient economic and trade policies This paper examines the role of subsidies in fisheries **Household**

Welfare, the Labor Market, and Social Programs in Albania Mansoor Rashid,Vajeera Dorabawila,Richard Adams,2001-01-01 The main focus of this paper is to assess household welfare in Albania describe the labor market and evaluate the equity and efficiency of public expenditures on cash benefits and education This report provides a benchmark against which future welfare developments of the population can be measured It also includes a statistical annex

National Parliaments Within the Enlarged European Union John O'Brennan,Tapio Raunio,2007-06-11 This book presents a wide range of perspectives on the role of national parliaments in EU politics and policy making looking at efforts to address perceived democratic and information deficits **Measurement and Meaning** Estanislao

Gacitúa-Marió, Quentin Wodon, 2001-01-01 This year's Global Economic Prospects argues for reshaping the global architecture of world trade to promote development and poverty reduction The report focuses on four policy areas Using the WTO ministerial to launch a development round of trade negotiations that would reduce global trade barriers Engaging in global collective action to promote trade outside the negotiating framework of the WTO Adopting pro trade development policies of high income countries unilaterally Enacting new trade reform in developing countries The report contends that the policies recommended in these four areas would reshape the global trade architecture in a way that would enhance the prospects of developing countries and reduce world poverty While the most likely scenario is for recovery beginning in 2002 today's slow growth of global trade and weakening financial flows to all but the most creditworthy countries has impeded growth in developing countries Global Economic Prospects 2002 concludes that the long term promise of well implemented trade reform is therefore tangible a world with a much higher standard of living hundreds of millions lifted out of poverty and a sharp increase in children living beyond their fifth birthday to become productive citizens of the world Treasury Reference Model Ali Hashim, Bill Allan, 2001-01-01 The World Bank and IMF are placing increasing emphasis on projects aimed at improving the management of public finances An integrated treasury system forms the backbone for recording and processing all transactions This book provides a treasury reference model TRM to give guidelines for the design of automated treasury systems for governments It provides detailed flow charts of the functional processes associated with Treasury systems This book also includes a diagnostic questionnaire that could be used to evaluate country specific requirements as well as a set of sample functional specifications that could be used for procurement and or development of the application software that would be required to implement these systems Europa Giuseppe Casale, 2002 *Enlargement of the European Union* Allan F. Tatham, 2009-01-01 The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty A significant upshot of these issues is that the concept of European identity defined in terms of such factors as culture history and economics has supplanted the long dominant theme of widening and deepening particularly since the Union's expansion has become primarily eastward The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view focusing on the concerns of stakeholders and the identity conflicts and uncertainties incurred by enlargement initiatives In the course of its presentation it details the actual pre accession Europeanization process and its complex history Among the key elements discussed are the following the conflict between widening and deepening and the effect on EU institutional reform institutional requirements on candidate countries pre accession criteria and negotiations administrative capacity judicial capacity and legal approximation in accession states capacity of the EU to absorb new Member States and EC law as part of European identity Also covered are specific historical details of particular pre accession negotiations e g Greece Spain Portugal Malta and Cyprus the still inconclusive negotiations with Turkey and the Western Balkan states and political factors

involved in the non accession of Norway Iceland and Switzerland Assembling powerful evidence and applying incisive analysis the author s conclusion shows that absent further and major EU institutional reform it will be difficult for an enlarging Union to continue to deliver the goods A watershed in the continuing great debate on the fulfilment of the EC Treaty s determination to foster and promote an ever closer union of the peoples of Europe this book will prove invaluable to anybody interested in the European integration project particularly lawyers academics officials and policymakers in the EU Member States

Building Democracy and Civil Society East of the Elbe Sven Eliaeson,2006-04-18 This book explores the idea of civil society and how it is being implemented in Eastern Europe The implosion of the Russian empire fifteen years ago and the new wave of democratization opened a new field of inquiry The wide ranging debate on the transition became focused on a conceptual battle the question of how to define civil society Because totalitarian systems shun self organization real existing civil society barely existed East of the Elbe and the emergence of civil society took unusually complex and puzzling forms which varied with national culture and reflected the deep historical past of these societies This insightful text relates the concept of civil society and developments in Eastern Europe to wider sociological theories and makes international comparisons where appropriate It discusses particular aspects of civil society and examines the difficulties of establishing civil society It concludes by assessing the problems and prospects for civil society in Eastern Europe going forward

The Emerging Industrial Structure of the Wider Europe F. McGowan,S. Radosevic,Nick Von Tunzelman,2004-05-06 This informative new book analyses the extent and major determinants of the east and west European industrial networks in reinforcing the competitive advantages of the EU and CEECs

[Making Reform Happen Lessons from OECD Countries](#) OECD,2010-05-26 This collection of essays analyses the reform experiences of the 30 OECD countries in nine major policy domains in order to identify lessons pitfalls and strategies that may help foster policy reform in the future

Runaway State-Building Conor O'Dwyer,2006-09-14 Here Conor O Dwyer introduces the phenomenon of runaway state building as a consequence of patronage politics in underdeveloped noncompetitive party systems Analyzing the cases of three newly democratized nations in Eastern Europe Poland the Czech Republic and Slovakia O Dwyer argues that competition among political parties constrains patronage led state expansion O Dwyer uses democratization as a starting point examining its effects on other aspects of political development Focusing on the link between electoral competition and state building he is able to draw parallels between the problems faced by these three nations and broader historical and contemporary problems of patronage politics such as urban machines in nineteenth century America and the Philippines after Marcos This timely study provides political scientists and political reformers with insights into points in the democratization process where appropriate intervention can minimize runaway state building and cultivate efficient bureaucracy within a robust and competitive democratic system
