Governance, Natural Resources and Post-Conflict Peacebuilding Carl Bruch, Carroll Muffett, Sandra Nichols, 2016-04-07 When the guns are silenced those who have survived armed conflict need food water shelter the means to earn a living and the promise of safety and a return to civil order Meeting these needs while sustaining peace requires more than simply having governmental structures in place it requires good governance Natural resources are essential to sustaining people and peace in post conflict countries but governance failures often jeopardize such efforts This book examines the theory practice and often surprising realities of post conflict governance natural resource management and peacebuilding in fifty conflict affected countries and territories It includes thirty nine chapters written by more than seventy

researchers diplomats military personnel and practitioners from governmental intergovernmental and nongovernmental organizations The book highlights the mutually reinforcing relationship between natural resource management and good governance Natural resource management is crucial to rebuilding governance and the rule of law combating corruption improving transparency and accountability engaging disenfranchised populations and building confidence after conflict At the same time good governance is essential for ensuring that natural resource management can meet immediate needs for post conflict stability and development while simultaneously laying the foundation for a sustainable peace Drawing on analyses of the close relationship between governance and natural resource management the book explores lessons from past conflicts and ongoing reconstruction efforts illustrates how those lessons may be applied to the formulation and implementation of more effective governance initiatives and presents an emerging theoretical and practical framework for policy makers researchers practitioners and students Governance Natural Resources and Post Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post conflict peacebuilding and natural resource management The project has generated six books of case studies and analyses with contributions from practitioners policy makers and researchers Other books in this series address high value resources land water livelihoods and assessing and restoring natural resources

A Failing Grade ,2004 **The Gower Handbook of Management** Dennis Lock,1998 The Gower Handbook of Management is widely regarded as a manager s bible an authoritative gimmick free and practical guide to best practice in management By covering the broadest possible range of subjects it replicates in book form a forum in which managers can meet experts from a range of professional

disciplines This edition features 36 completely new chapters 65 expert contributors many of them practising managers and many of them new to this edition All of the contributors are recognized authorities in their field **Coercive Sanctions and International Conflicts** Mark Daniel Jaeger, 2018-05-11 Perhaps the most common question raised in the literature on coercive international sanctions is Do sanctions work Unsurprisingly the answer to such a sweeping question remains inconclusive However even the widely presumed logic of coercive sanctions that economic impact translates into effective political pressure is not the primary driver of conflict developments Furthermore existing rationalist economic approaches neglect one of the most striking differences seen across sanctions conflicts the occurrence of positive sanctions or their combination with negative sanctions implicitly taking them as logically indifferent Instead of asking whether sanctions work this book addresses a more basic question How do coercive international sanctions work and more substantially what are the social conditions within sanctions conflicts that are conducive to either cooperation or non cooperation Arguing that coercive sanctions and international conflicts are relational socially constructed facts the author explores the de escalation of sanctions conflicts from a sociological perspective Whether sanctions are conducive to either cooperation or non cooperation depends on the one hand on the meaning they acquire for opponents as inducing decisions upon mutual conflict On the other hand negative sanctions positive sanctions or their combination each contribute differently to the way in which opponents perceive conflict and to its potential transformation Thus it is premature to predict the political effectiveness of sanctions simply based on economic impact The book presents analyses of the sanctions conflicts between China and Taiwan and over Iran's nuclear program illustrating how negative sanctions positive sanctions and their combination made a distinct contribution to conflict development and prospects for cooperation It will be of great interest to researchers postgraduates and academics in the fields of international relations sanctions international security and international political sociology
