Hearings on Measures to Protect the Physical Integrity of the American Flag United States. Congress. Senate. Committee on the Judiciary, 1989 The Constitution and the Flag: The flag salute cases Michael Kent Curtis, 1993 First Published in 1993 Routledge is an imprint of Taylor Francis an informa company *The Road to Stockholm* István Hargittai, 2002 The Nobel Prize is by far the highest recognition a scientist may receive and the only one with which the general public is familiar Its prestige has reached improbable heights At the same time a lot of myth surrounds the Nobel Prize and this is compounded by the fact that people tend to view scientists with some bewilderment This book introduces the process of selection of the laureates discusses the ingredients for scientific discovery and for getting recognition It reviews the decisive moments of scientific careers en route to the Nobel Prize points to characteristic features of the laureates the importance of mentors and venues in scientific careers and other components of success It also covers some discoverers and discoveries for whom and for which the Nobel Prize never materialized Whereas there is no general recipe for receiving the Nobel Prize there are common features of successful scientific careers The book reveals some information about the scientists lives and careers that may guide other scientists in increasing their chances of becoming more effective

and better recognized players although it is not expected to help anyone to receive the Nobel Prize For the general reader The Road to Stockholm reveals the human face of scientists and the human side of their endeavours The Nobel Prize has served as inspiration for scientists and the general public for a hundred years this book discusses its problems and celebrates its triumphs

Blackfoot Physics F. David Peat,2006-01-01 The modern version of The Tao of Physics We gain tantalizing glimpses of an elusive alternative to the thing we know as science Above all Peat s book is an eloquent plea for a fair go for the modes of enquiry of other cultures New Scientist One summer in the 1980s theoretical physicist F David Peat went to a Blackfoot Sun Dance ceremony Having spent all of his life steeped in and influenced by linear Western science he was entranced by the Native American worldview and through dialogue circles between scientists and native elders he began to explore it in greater depth Blackfoot Physics is the account of his discoveries In an edifying synthesis of anthropology history metaphysics cosmology and quantum theory Peat compares the medicines the myths the languages the entire perceptions of reality of the Western and indigenous peoples What becomes apparent is the amazing resemblance between indigenous teachings and some of the insights that are emerging from modern science a congruence that is as enlightening about the physical universe as it is about the circular evolution of humanity s understanding Through Peat s insightful observations he extends our understanding of ourselves our understanding of the universe and how the two intersect in a meaningful vision of human life in relation to a greater reality
