Hungary's most prominent film director written by a scholar who has known Béla Tarr personally and professionally for more than 25 years. Tracing the evolution of the director's unique characters, themes, and style, the text locates the significance of Tarr's films in their powerful vision of an entire region and its history. Tarr's films express in their universalistic language the shared feelings and experiences of millions of Eastern Europeans. *The Writer*, 1917 Story Proof Kendall Haven, 2007-10-30 Like Stephen Krashen's important work in *The Power of Reading*, *Story Proof* collects and analyzes the research that validates the importance of story, story reading, and storytelling to the brain development and education of children and adults. Accomplished researcher and storyteller Kendall Haven establishes the need for understanding the research findings in neural psychology and brain development and the value of a common definition of story if one is to fully grasp the importance and necessity of story to the development of the human mind. To support his case, he reviews a wealth of research from storytellers, teachers, and others who have experienced the power of story firsthand. The author has collected anecdotal experiences from over 100 performing storytellers and from 1,800 story practitioners, mostly teachers who have made extensive use of stories. He has read more than 150 qualitative and quantitative research studies that discuss the effectiveness of stories and/or storytelling for one or more specific applications: education, organizational management, knowledge management, medical, and narrative therapy, etc. Forty of these studies were literature reviews and comparative studies including analysis of over 1,000 studies and descriptive articles. He has also gathered research evidence from his own story performances for total audiences of over 4 million and from conducting story writing workshops with 200,000 students and 40,000 teachers. **Using Story** Jennifer A. Moon, 2010-06-28 Story is everywhere in human lives and cultures, and it features strongly in the processes of teaching and learning. Story can be called narrative, case study, critical incident, life history, anecdote, scenario, illustration, or example. Creative writing, storytelling, it is a unit of communication; it is in the products of the media industries, in therapy, and in our daily acts of reflecting. Stories are told in many ways: they are spoken, written, filmed, mimed, or acted, presented as cartoons, and in new media formats, and through all these they are associated with both teaching and learning processes, but in different ways and at different levels. As a result of growing interest and simultaneous confusion about story, it is timely to untangle the various meanings of story so that we can draw out and extend its value and use. *Using Story* aims to clarify what we mean by story, to seek out where story occurs in education and life, and to explore the processes by which we learn from story. In this way, the book intends to bring story into the open and improve its use. Building on her wealth of experience in the field, Jenny Moon explores the theory of story and demonstrates both its current uses and new ways in which to enrich and enliven teaching, learning, and research processes. Ideal for anyone involved in education, personal or professional development, or with a more general interest in story, the book begins by considering the range of what is meant by story and then considers the theory behind the meanings. In the large final part of the book, Jenny provides a rich patchwork of different uses of story in education that cut across forms of story, story activities.

Yang,2009-10-02 The X Files and Literature Unweaving the Story Unraveling the Lie to find the Truth provides an innovative and valuable exploration of the groundbreaking television program Although much academic work has been devoted to the social psychological and spiritual significance of The X Files until this collection none has fully addressed the series rich adaptation of literature to interrogate our perception definition or recounting of the truth This collection not only unveils new twists and insights into expected connections between The X Files and Gothic writers or with its modernist and post modernist slants on narrative plot and characterization The X Files and Literature also delves into some unexpected literary sources shaping the series such as the Arthurian quest Catholic and Biblical mythology folkloristics and James Fennimore Cooper and the vanishing American mythos This collection of essays covers both how The X Files works with literature s own constantly morphing definition and portrayal of truth through form and content as well as how the television program may or may not subvert our own contradictory expectations and distrust of literature s providing us with enlightenment As television becomes more and more literary with shows like Lost and Gilmore Girls sending us off to the bookstore and the library so we might read them more carefully a book like The X Files and Literature is welcome indeed Sharon R Yang s diverse collection
