Mengele: Unmasking the "Angel of Death" David G. Marwell,2020-01-28 A gripping sober and meticulous David Margolick Wall Street Journal biography of the infamous Nazi doctor from a former Justice Department official tasked with uncovering his fate Perhaps the most notorious war criminal of all time Josef Mengele was the embodiment of bloodless efficiency and passionate devotion to a grotesque worldview Aided by the role he has assumed in works of popular culture Mengele has come to symbolize the Holocaust itself as well as the failure of justice that allowed countless Nazi murderers and their accomplices to escape justice Whether as the demonic doctor who directed mass killings or the elusive fugitive who escaped capture Mengele has loomed so large that even with conclusive proof many refused to believe that he had died As chief of investigative research at the Justice Department s Office of Special Investigations in the 1980s David G Marwell worked on the Mengele case interviewing his victims visiting the scenes of his crimes and ultimately holding his bones in his hands Drawing on his own experience as well as new scholarship and sources Marwell examines in scrupulous detail Mengele s life and career He chronicles Mengele s university studies which led to two PhDs and a promising career as a scientist his wartime service both in frontline combat and at Auschwitz where his selections sent innumerable innocents to their deaths and his scientific pursuits including his studies of twins and eye color traumatized or killed countless more and his postwar flight from Europe and refuge in South America Mengele describes the international search for the Nazi doctor in 1985 that ended in a cemetery in Sao Paulo Brazil and the dogged forensic investigation that produced overwhelming evidence that Mengele had died but failed to convince those who arguably most wanted him dead This is the riveting story of science without limits escape without freedom and resolution without justice

Unmasking Valerie Harms Sheehan,1973 **The Culture of Property** LeeAnn Lands,2011-08-15 This history of the idea of neighborhood in a major American city examines the transition of Atlanta Georgia from a place little concerned with residential segregation tasteful surroundings and property control to one marked by extreme concentrations of poverty and racial and class exclusion Using Atlanta as a lens to view the wider nation LeeAnn Lands shows how assumptions about race and class have coalesced with attitudes toward residential landscape aesthetics and home ownership to shape public policies that promote and protect white privilege Lands studies the diffusion of property ideologies on two separate but related levels within academic professional and bureaucratic circles and within circles comprising civic elites and rank and file residents By the 1920s following the establishment of park neighborhoods such as Druid Hills and Ansley Park white home owners approached housing and neighborhoods with a particular collection of desires and sensibilities architectural and landscape

continuity a narrow range of housing values orderliness and separation from undesirable land uses and undesirable people By the 1950s these desires and sensibilities had been codified in federal state and local standards practices and laws Today Lands argues far more is at stake than issues of access to particular neighborhoods because housing location is tied to the allocation of a broad range of resources including school funding infrastructure and law enforcement Long after racial segregation has been outlawed white privilege remains embedded in our culture of home ownership **Unmasking Japan Today** Fumie Kumagai, Donna Keyser, 1996-02-16 This book the product of a joint project between a Japanese and an American scholar successfully addresses the issues important to Americans and others interested in contemporary Japan

Unmasking Social Science Imperialism Tatah Mentan, 2015-02-02 Contemporary social science is a product of the capitalist world system and Eurocentrism is constitutive of the geoculture of this system characterized by the parochiality of its universalism assumptions about the superiority of Western civilization and imposition as the sole theory of global progress The creation of these structures of knowledge specifically the institutionalization of the social sciences is a phenomenon that is inextricably linked to the very formation and maturation of Europes capitalist world system or imperialism There is therefore nothing that is natural logical or accidental about the institutionalization of the social sciences These Europeanized structures of knowledge are imposed ways of producing knowledge of the world This Eurocentrism of social science has justifiably come under increasingly vigorous scrutiny especially in the period since 1945 with the formal decolonization of Africa Asia and much of the Caribbean This book forcefully argues that if social science is to make any progress in the twenty first century it must overcome its Eurocentric heritage that has distorted social analyses and its capacity to deal with the problems of the contemporary world and embrace other non Western funds of knowledge production
