Kent, Hebe Hwee-Hong How, 2008-04-15 Real estate activity across national boundaries investment development and asset management is firmly established as a major component of global economic activity International Real Estate provides the understanding of real estate strategies and transactions that cross national boundaries International organizations lament the narrow perspective of professionals in the real estate field which stems from training that takes a parochial rather than international view of the practices and processes of real estate markets This book takes an explicitly international perspective to the decision making process leading to final accept or reject investment decisions It will be the first to adopt an institutional approach that directly addresses the problems of how to identify and avoid the main pitfalls of cross border investment in real estate The key to understanding international real estate comes from understanding the impact on investment and management decisions of differences in the formal and informal rules of the game The authors define the key feature of international real estate as the institutions that frame facilitate or impede investment in land and buildings across national boundaries

Law

and Policy for China's Market Socialism John Garrick, 2012-05-04 This edited volume presents fresh empirical research on the emerging outcomes of China's law reforms. The chapters examine China's going out policy by addressing the ways in which the underpinning legal reforms enable China to pursue its core interests and broad international responsibilities as a rising power. The contributors consider China's civil and commercial law reforms against the economic backdrop of an outflow of Chinese capital into strategic assets outside her own borders. This movement of capital has become an intriguing phenomenon for both ongoing economic reform and its largely unheralded underpinning law reforms. The contributors ask probing questions about doing business with China and highlight the astonishing escalation of China's outbound foreign direct investment (OFDI). *Law and Policy for China's Market Socialism* includes contributions from leading China law scholars and specialist practitioners from the People's Republic of China, Hong Kong, the United States, the United Kingdom, and other countries who all extend the examination of powerful influences on China's law reforms into new areas. Given the forecast for the growth of China's domestic market, those wishing to gain a better understanding and seeking success in the world's most dynamic marketplace will benefit greatly from reading this book. This book is essential reading for anyone interested in Chinese economics and business, Chinese law, Chinese politics, and commercial law.

Real Estate Finance in the New Economy Piyush Tiwari, Michael White, 2014-04-07 The financial deregulation of the last quarter century has meant large flows of funds around the world seeking the highest risk-adjusted return for investors. Real estate is now established as an important asset class, and advances in information technology provide the necessary tools to complement global developments in real estate finance and investment. A variety of investment vehicles have emerged, and *Real Estate Finance in the New Economy* examines these along with financing and risk in the context of globalization, deregulation, and an increasingly integrated international world economy by exploring questions like: How have real estate financial structures evolved as economies grow and become internationalised? What role do economic change and financial systems play in the development of real estate investment? Are the risks associated with the new economy really new? What is the future direction for real estate financing? The authors develop an economic framework for discussions on individual financial products to examine how real estate financial structures change with economic growth and internationalisation, and also to show how developments in real estate finance impact economic growth.

An Empirical Investigation of the Role of Legal Origin on the Performance of Property Stocks Within the Context of a Tactical Asset Allocation Strategy Christopher Shun, 2005-07-06 The role of legal origin was first introduced in the Law and Finance Literature by La Porta et al. 1997 in an original study of legal determinants of

external finance Their study is timely given that investor protection is crucial because in many countries expropriation of minority shareholders and creditors by controlling shareholders or corporate insiders is extensive This dissertation intends to replicate the original La Porta et al 1997 study for Property stocks in 23 countries whose legal jurisdictions falls into the four of the legal fraternities established by La Porta namely English French German and Scandinavian The primary motivations for this thesis is that the Property stocks broadly captures several critical aspects of the original La Porta study Specifically Property stocks are very tangible assets that can easily be collateralised due to the direct property underpinning the net asset backing of Property stocks The end result of this research endeavour is to provide a framework for institutional portfolio investors to determine the appropriate countries whose real estate markets have the most favourable investor climate to facilitate a more attractive environment for institutional investors given the Means Variance Optimisation MVO methodology A tactical asset allocation strategy will be employed to determine the three stages that a global investor should undertake to arrive at the optimum proportions of funds to invest in Common stocks or Real Estate stocks in any country firstly based on an Emerging Developed country analysis then secondly a geographic Regional analysis and finally on Legal Origin analysis to distil the appropriate proportions of funds that should be invested This Dissertation has three original contributions which are as follows 1 An Empirical investigation of role of Legal origin on the performance of Real Estate stocks within the context of a tactical asset allocation strategy This dissertation studies the impact that Developed versus Emerging Regional markets and Legal Origin jurisdictions have on the results of the optimal MVO portfolios based on the highest Sharpe ratio and presents the research findings of this study at the Primary Secondary and Tertiary levels This dissertation is envisaged to fill the research gap between legal origin and the performance of Property stocks across four legal fraternities in 23 countries and make an original contribution in the Law Finance and Portfolio Management Literature 2 ACTIVE Ex Ante versus PASSIVE na ve portfolio management strategy The original contribution is the application of this methodology to property stocks specifically within a Legal Origin and Regional market framework Data is collated from 1984 to 2003 20 years inclusive from 23 countries with specific reference to the Common and Real Estate stocks markets therein A 5 year rolling Ex Post analysis is computed to determine the optimum allocation weights in a multi asset portfolio and subsequently an Ex Ante analysis next immediate year of the portfolio weights applied to an Actively managed portfolio This portfolio will be compared with actual portfolio performance from 1989 to 2002 fifteen subsequent years to determine whether the Ex ANTE methodology which underpinned the Active management strategy is preferred over a Passive equal investment in each asset class strategy for real estate stocks portfolio management The Ex Ante analysis will be undertaken at two stages Firstly Legal Origin markets and Secondly Regional markets 3 A replication of the Gordon et al 1995 study which determined the appropriate percentage based on the Markowitz Portfolio Theory MPT that should be invested in the Real Estate stock markets in 14 countries The original contribution is the application of Gordon s methodology to the Legal
