Realism in 20th Century Painting/Brendan Prendeville Brendan Prendeville, 2000 **AngloModern** Janet Wolff, 2018-05-31 Early twentieth century art and art practice in Britain and the United States were Janet Wolff asserts marginalized by critics and historians in very similar ways after the rise of post Cubist modern art In a masterly book on the sociology of modernism Wolff explores work that was primarily realist and figurative and investigates the social institutional political and aesthetic processes by which that art fell by the wayside in the postwar period Throughout she shows that questions of gender and ethnicity play an important role in critical curatorial and historical evaluations For example Wolff finds that the work of the artists central to the development of the Whitney Museum was relegated to a secondary status in the postwar period when realism was labeled feminine in contrast to the aggressive masculinity of abstract expressionism The three key periods considered in *AngloModern* are the early twentieth century when modernist art and existing and new realist traditions coexisted in a certain tension the postwar period in which modernism claimed superiority over realism and the late twentieth century when a retrieval of the realist and figurative traditions seemed to occur Wolff concludes by considering this re emergence as well as the limitations of earlier discussions of the struggles of realist and figurative art to endure the currents of modernism **1920-40 Realism and Surrealism** Jackie Gaff, 2000 Looks at the work of 20th Century artists from around the world *The Rise and Fall of American Art, 1940s-1980s* Assoc Prof Catherine Dossin, 2015-03-28 This book challenges the perception of New York as the undisputed center of the art world between the end of World War II and the fall of the Berlin Wall a position of power that brought the city prestige money and historical recognition In her transnational and interdisciplinary study Dossin analyses changing distributions of geopolitical and symbolic power in the Western art worlds a story that spans two continents forty years and hundreds of actors **The Rise and Fall of American Art, 1940s-1980s** Catherine Dossin, 2016-03-03 In *The Rise and Fall of American Art 1940s 1980s* Catherine Dossin challenges the now mythic perception of New York as the undisputed center of the art world between the end of World War II and the fall of the Berlin Wall a position of power that brought the city prestige money and historical recognition Dossin reconstructs the concrete factors that led to the shift of international attention from Paris to New York in the 1950s and documents how peripheries such as Italy Belgium and West Germany exerted a decisive influence on this displacement of power As the US economy sank into recession in the 1970s however American artists and dealers became increasingly dependent on the support of Western Europeans and cities like Cologne and Turin emerged as major commercial and artistic hubs a development that enabled European artists to return to the forefront of the international art scene in the

1980s Dossin analyses in detail these changing distributions of geopolitical and symbolic power in the Western art worlds a story that spans two continents forty years and hundreds of actors Her transnational and interdisciplinary study provides an original and welcome supplement to more traditional formal and national readings of the period **Library of Congress Subject Headings** Library of Congress, Library of Congress.
