Rebuilding Mostar Urban Reconstruction In A War Zone:

Rebuilding Mostar John R. Yarwood, Andreas Seebacher, Niels Strufe, Hedwig Wolfram, 1999-01-01 Dr Yarwood and his collaborators describe reconstruction of the city of Mostar in Bosnia from a general technical standpoint The book shows what was done how it was done and considers the problems issues failures and successes *Urban Planning after War, Disaster and Disintegration* John Yarwood, 2010-07-12 This book concerns the relationship between urban planning and similar things on the one hand and war natural disaster and societal or political disintegration on the other The supposition is that one may mitigate the other The book recounts the author s professional experience of specific cases of disaster earthquake and flood in the Philippines war in Bosnia Afghanistan and South Sudan and disintegration in Albania and Ireland He identifies the key themes in urban and regional planning which these case studies illustrate The themes include a the delivery of building land with site preparation infrastructure and property rights b the size and amount of plots able to match both demographic projections and wealth distribution c the creation of a property market able to deliver affordable land and buildings to match demand encourage investment and further the development of the economy d the spatial or geographic adjustment of institutional patterns to reflect the components of identity making for fuzzy sovereignty e a form of organisation which leads to effective project management and implementation and so on The view is taken that lack of suitable development land supply a land market unable to deliver affordable property to the people and unable to support economic growth and a spatial institutional pattern unable to match key aspects of identity are all causes of war as well as societal or political decline The book contains many drawings prepared by the author including plans of urban projects described in the text It will be of interest particularly to architects town planners municipal engineers and civil engineers urban administrators urban economists politicians diplomats soldiers and staff of NGOs and international agencies **The Old Bridge of Mostar and Increasing Respect for Cultural Property in Armed Conflict** Jadranka Petrovic, 2012-11-01 Based on the study of the Old Bridge of Mostar this book concerns the adequacy of the international humanitarian law regime relating to the targeting and destruction of immovable cultural property in armed conflict at both normative and enforcement level *Bosnia and the Destruction of Cultural Heritage* Helen Walasek, contributions by Richard Carlton, Amra Hadžimuhamedović, Valery Perry, Tina Wik, 2016-03-03 The massive intentional destruction of cultural heritage during the 1992 1995 Bosnian War targeting a historically diverse identity provoked global condemnation and became a seminal marker in the discourse on cultural heritage It prompted an urgent reassessment of how cultural property could be protected in times of conflict and led to a more definitive recognition in international humanitarian law that destruction of a people s cultural heritage is an aspect of genocide Yet surprisingly little has been published on the subject This wide ranging book provides the first comprehensive overview and critical analysis of the destruction of Bosnia Herzegovina s cultural heritage and its far reaching impact Scrutinizing the responses of the international community during the war including bodies like

UNESCO and the Council of Europe the volume also analyses how after the conflict ended external agendas impinged on heritage reconstruction to the detriment of the broader peace process and refugee return It assesses implementation of Annex 8 of the Dayton Peace Agreement a unique attempt to address the devastation to Bosnia s cultural heritage and examines the treatment of war crimes involving cultural property at the International Criminal Tribunal for the former Yugoslavia ICTY With numerous case studies and plentiful illustrations this important volume considers questions which have moved to the foreground with the inclusion of cultural heritage preservation in discussions of the right to culture in human rights discourse and as a vital element of post conflict and development aid Challenging the Representation of Ethnically Divided Cities Giulia Carabelli,Aleksandra Djurasovic,Renata Summa,2021-05-25 The book Challenging the Representation of Ethnically Divided Cities Perspectives from Mostar questions the existing overrepresentation of Mostar as an ethnically divided city While acknowledging the existence of internal borders the chapters in this book assert that they are not solid nor fixed and by exploring how they become material or immaterial the book offers a deeper understanding of the city s complex dynamics Accordingly the chapters in this book are attentive to how ethnic divides materialise or lose importance because of socio political contingencies Events groups and spaces that promote reconciliation from the bottom up are examined not necessarily to assess their success and failures but rather to look at how they create networks gain trust and form platforms that generate novel understandings of ethnic loyalties and party memberships Further and drawing both on the empirical data and theoretical reflections this volume contributes to broader debates about divided cities by suggesting the need to engage with these cities in their complexities rather than reducing them to their ethno national divisions The book engages with socio political and economic complexities in order to shed light on how ethnic conflicts and resulting spatial partitioning are often just the surface of much more complex dynamics that are far less easy to disentangle and represent The chapters in this book were originally published in *Space and Polity* **Papers in ITJEMAST 11(12) 2020** , International Transaction Journal of Engineering Management Applied Sciences Technologies publishes a wide spectrum of research and technical articles as well as reviews experiments experiences modelings simulations designs and innovations from engineering sciences life sciences and related disciplines as well as interdisciplinary cross disciplinary multidisciplinary subjects Original work is required Article submitted must not be under consideration of other publishers for publications

support or oppose Europeanisation The contributors focus on how and why memory is renegotiated exhibited adjusted or ignored in the Europeanisation process *Stategraphy* Tatjana Thelen,Larissa Vetters,Keebet von Benda-Beckmann,2017-11-30 *Stategraphy* the ethnographic exploration of relational modes boundary work and forms of embeddedness of actors offers crucial analytical avenues for researching the state By exploring interactions and negotiations of local actors in different institutional settings the contributors explore state transformations in relation to social security in a variety of locations spanning from Russia Eastern Europe and the Balkans to the United Kingdom and France Fusing grounded empirical studies with rigorous theorizing the volume provides new perspectives to broader related debates in social research and political analysis *The Political Life of Urban Streetscapes* Reuben Rose-Redwood,Derek Alderman,Maoz Azaryahu,2017-07-06 *Streetscapes* are part of the taken for granted spaces of everyday urban life yet they are also contested arenas in which struggles over identity memory and place shape the social production of urban space This book examines the role that street naming has played in the political life of urban streetscapes in both historical and contemporary cities The renaming of streets and remaking of urban commemorative landscapes have long been key strategies that different political regimes have employed to legitimize spatial assertions of sovereign authority ideological hegemony and symbolic power Over the past few decades a rich body of critical scholarship has explored the politics of urban toponymy and the present collection brings together the works of geographers anthropologists historians linguists planners and political scientists to examine the power of street naming as an urban place making practice Covering a wide range of case studies from cities in Europe North America Sub Saharan Africa and Asia the contributions to this volume illustrate how the naming of streets has been instrumental to the reshaping of urban spatial imaginaries and the cultural politics of place *Movement as Conflict Transformation* Susan Forde,2018-07-21 This book presents narratives of the social use of space in the divided city of Mostar Bosnia Herzegovina Through the narratives of movement in the city the work demonstrates how residents engage informally with conflict transformation through new movement and use of spaces This book will appeal across the social sciences and in particular to students academics and researchers in the fields of peace and conflict studies political sociology and human geography
