the Sasanian period to around the 17th century The work provides new insights into regional settlement patterns and changing ceramic distribution trade and use A large amount of primary data is presented covering an extensive area from Minab to Bushehr along the coast and inland as far as Sirjan This includes information on a number of previously undocumented archaeological sites as well as a detailed description and analysis of the ceramic finds which underpin the settlement evidence and provide a wider source of reference By collecting carefully controlled archaeological evidence related to the size distribution and period of occupation of urban and rural settlements distributed across southern Iran Williamson aimed to reconstruct the broader historical development of the region Due to his early death the work was never completed The key aims of the authors of this volume were to do justice to Williamson's remarkable vision and efforts on the one hand and at the same time to bring this important new evidence to ongoing discussions about the development of southern Iran through the Sasanian and Islamic periods

Archaeological Theory and Scientific Practice Andrew

Jones, 2001-12-06 Is archaeology an art or a science This question has been hotly debated over the last few decades with the rise of archaeological science At the same time archaeologists have seen a change in the intellectual character of their discipline as many writers have adopted approaches influenced by social theory The discipline now encompasses both archaeological scientists and archaeological theorists and discussion regarding the status of archaeology remains polarised In this 2001 book Andrew Jones argues that we need to analyse the practice of archaeology Through an analysis of archaeological practice influenced by recent developments in the field of science studies and with the aid of extensive case studies he develops a new framework which allows the interpretative and methodological components of the discipline to work in tandem His reassessment of the status and character of archaeology will be of interest to students scholars and professionals
