Recent Perspectives In American Philosop:

Recent Perspectives in American Philosophy Yervant Hovhannes Krikorian, 1973 The essays in this book analyze significant perspectives of the recent past in American philosophy they represent some of the major trends of this period Alfred North Whitehead is included with the recent American philosophers since his major philosophic ideas were fully developed in this country There has been no attempt to deal comprehensively with this period Several philosophers of equal importance who also deserve attention C I Lewis A O Lovejoy W F Montague R B Perry F J E Woodbridge and others have not been discussed Most of the essays were published at various times in various journals Though all of the perspectives are presented with sympathetic understanding they are also critically evaluated 2 AMERICAN PHILOSOPHY OF THE RECENT PAST But even more than individual philosophers and schools of philosophy the larger background of contemporary American life has nourished the empirical spirit Science as the most pervasive climate of our intellectual and practical activity has enhanced the empirical attitude The great development in this country of business and technological industry has encouraged the pragmatic empirical outlook Empiricism however is an ambiguous term and its different meanings have different philosophic consequences For some it means that only concrete personal experience can be accepted as reality for others it means the succession of sense impressions The more recent usage the one that has been dominant in American philosophy identifies empiricism with objectively and socially verifiable pronouncements that is with experimentalism or confirmation through demonstrable evidence *Recent Perspectives in American Philosophy. by Yervant H. Krikorian* Yervant Hovhannes Krikorian, 1973 *New Perspectives on Anarchism* Nathan J. Jun, Shane Wahl, 2010-01-01 The study of anarchism as a philosophical political and social movement has burgeoned both in the academy and in the global activist community in recent years Taking advantage of this boom in anarchist scholarship Nathan J Jun and Shane Wahl have compiled twenty six cutting edge essays on this timely topic in *New Perspectives on Anarchism* *E.A. Burtt, Historian and Philosopher* D. Villemaire, 2013-04-17 Burtt's book *The Metaphysical Foundations of Modern Physical Science* is something of a puzzle within the context of twentieth century intellectual history especially American intellectual history Burtt's pioneering study of the scientific revolution has proved to be prophetic in its rejection of both scientism and positivism Published in 1924 Burtt's book continues to be read in educated circles and remains both the rose and the thorn on university reading lists raising skeptical questions about science methods and science knowledge just as it did seventy five years ago This book examines Burtt's public academic and personal life From his politics of conscience after World War I on through the Cold War Burtt is shown to be a man of unparalleled integrity whose relentless search for philosophic understanding drove his more quixotic philosophical quests and steered his personal life including its tragic dimension toward simple virtue The many who have been affected by *The Metaphysical Foundations* will be especially interested in this new perspective on the life and thought of its author Those who have not read Burtt's books might be inspired to study this

unusual American thinker *Nature's Primal Self* Nam T. Nguyen, 2011-12-28 *Nature's Primal Self* examines Corrington's thought called ecstatic naturalism in juxtaposition to both C S Peirce's pragmatic and semiotic concept of the self and Karl Jaspers' existential elucidation of Existenz. Peirce's and Jaspers' anthropocentrism is thus corrected by Corrington's ecstatic naturalism. Ecstatic naturalism as a new movement is both a semiotic theoretical method and a metaphysics that probes deeply into the ontological divide between nature naturing and nature natured. Author Nam T. Nguyen attempts to achieve three goals: first to present and elucidate the underlying philosophical concepts of Charles Peirce, Karl Jaspers, and Robert Corrington; second to critique the anthropocentric self of Peirce's semiotic pragmatism and of Jaspers' existential anthropology; and third to introduce the concept of nature's primal self radically grounded in the perspective of ecstatic naturalism as a judicious, more encompassing and richer framework compared to Peirce's semiotic construction of the self and Jaspers' existential concept of Existenz. **New**

Perspectives on Technology, Values, and Ethics Wenceslao J. Gonzalez, 2015-10-08 This book focuses on a key issue today: the role of values in technology, with special emphasis on ethical values. This topic involves the analysis of internal values in technology as they affect objectives, processes, and outcomes, and the study of external values in technology: social, cultural, economic, ecological, etc. These values, internal and external, are crucial to the decision making of engineers. In addition, they have increasing relevance for citizens concerned with the present and future state of technology, which gives society a leading position in technological issues. The book follows three main lines of research: 1) new perspectives on technology, values, and ethics; 2) rationality and responsibility in technology; and 3) technology and risks. This volume analyzes the two main sides involved here: the theoretical basis for the role of values in technology and a practical discussion on how to implement them in our society. Thus, the book is of interest for philosophers, engineers, academics of different fields, and policy makers. The style used lends itself to a broad audience. Pragmatism and Phenomenology Sandra B. Rosenthal, Patrick L. Bourgeois, 1980-01-01 In the philosophic world today, pragmatism and phenomenology can be found standing at a crossroad. Though each has arrived there via divergent paths and for very different reasons, the direction that each takes in the future may be significantly influenced by the suggestions the other has to offer. The intention of this book is to parallel the two positions in such a way that basic points of convergence and divergence are noted and accounted for in terms of their systematic significance. Each position is presented in such a manner that philosophers engrossed in one movement can enter into the other in a way which allows a real encounter to develop. **The Economic Mind in America** Malcolm

Rutherford, 1998-03-05 This volume demonstrates the variety and creativity of American economics and the links between American economic thought and its non-European context. It contains selected papers from the 1996 History of Economics Society Conference. **New Perspectives on Sartre** Adrian van den Hoven, Adrian Mirvish, 2010-05-11 This volume deals with a number of topics that have not previously been specifically addressed before in a single text. A chapter on Sartre and

religion talks about his thought in relation to Christianity Judaism and Buddhism while one on Sartre and children discusses his work in relation to the issues of freedom pregnancy and autism Beyond this there are an additional seven chapters covering a wide variety of topics by leading scholars in the fields of philosophy literature psychology history and political thought While prior publications on Sartre have generally divided his work into two periods pre and post Marxist this volume deliberately stresses a middle and final period as well As representative of the middle period there is an emphasis on Notebooks for an Ethics while Sartre s last work Hope Now is also treated as being philosophically significant in its own right This approach helps to cast a new light on what Sartre has to say about authenticity childhood and consciousness as embodied among other subjects The volume also addresses many and diverse issues of current interest including those of freedom Marxism and Sartre s relation to ethics There are sections of the book that deal with history and the historical situations that helped to shape Sartre s thought as well as articles that deal with Sartre as a specifically French thinker A chapter deals with Sartre s relation to women and here the issues of maternity as problematic plus authentic adult relationships are discussed Finally in addition to authors in philosophy and literature there are articles by a child psychiatrist and a clinical psychologist to help to provide new insights on Sartre s work Even as an academic philosopher Sartre always remained an iconoclast and the aim of this book is at least partially to capture and provide the reader with insight into this spirit

New Perspectives on Distributive Justice Manuel Knoll,Stephen Snyder,Nurdane Şimsek,2018-11-19 Distributive justice is one of the most discussed topics in political philosophy Focusing on the plurality of irreconcilable conceptions of social and political justice this book presents an array of new perspectives on the topic Bringing together 30 original essays of well established and young international scholars the volume is essential reading for anyone interested in social and political justice
