Recession The Western Economies And The Changing World Order:

Recession, the Western Economies, and the Changing World Order Lars Anell, 1981 Monograph examining issues relating to international economic relations trends and economic recession in OECD countries examines causes and significance of the crisis increasing interdependence changing international division of labour and relations with newly industrializing countries and discusses the prerequisites for and role of OECD countries in a new international economic order Graphs illustrations references and statistical tables

Demand for New International Economic Order Sandeep Chauhan, 1997 The emergence of the Demand for New International Economic Order as a result of growing discontent among the Third World countries due to global inequalities has been traced through recent history till present The book also discusses the effect of the collapse of the Soviet Union and the economic manifestation of Communist Cooperation and the emergence of New Regional Economic Blocs like EU NAFTA SAPTA APEC etc

Capitalism, Dependency and Ultra-Imperialism Hartmut Elsenhans, 2023-10-13 This book assembles main contributions to an alternative explanation of globalisation and the political economic structures of the international system As the result of capitalism globalisation does not transfer basic capitalist structures from the Centre to the Periphery Capitalism is based on rising mass incomes that create investment opportunities and thus the possibility of profit A structurally homogeneous and ultraimperialist Centre dominates a deeply fissured Periphery of structurally heterogeneous societies and economies Capitalism penetrates underdeveloped regions and deforms them through rent which obstructs expanding internal mass markets while labour goes unempowered Rent constitutes the basis for state operations and the role of emerging state classes While globalisation disempowers labour in both the West and in the South it has given new comparative advantage to the South The shift from rent appropriation in the South via raw material exports to export led manufacturing is based on devaluation below purchasing power parity and hence on a rent from agriculture that is based on the Green Revolution Its impact is however not always sufficient to compensate for the loss of influence experienced by social reformist forces A novel multipolar system based on the balance power has emerged Multiethnic empires are held together with large varieties of however always identitarian ideologies This global system is composed of powers that are internally and externally opposed to peaceful change Across the globe there is an impending danger of globalisation of rent Print edition not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan

A Contemporary Critique of Historical Materialism Anthony Giddens, 1981 The social sciences have long been based upon contrasts drawn between the militaristic societies of the past and the capitalist or industrial societies of the present But how valid are such contrasts given that the current era is one stamped by the impact of war and by the intensive development of sophisticated weaponry In setting out to address this and similar questions this book investigates issues that have been substantially neglected by those working in sociology and social theory Anthony Giddens offers a sociological analysis of the nature of the modern nation state and its association with the means of waging war His analysis is connected

in a detailed way to problems that have traditionally preoccupied sociologists the impact of capitalism and industrialism upon social development in the modern period The result is a theory both of the institutional parameters of modernity and of the nature of international relations Provided by publisher The Nation-State and Violence Anthony Giddens, 2013-06-12 The social sciences have long been based upon contrasts drawn between the militaristic societies of the past and the capitalist or industrial societies of the present But how valid are such contrasts given that the current era is one stamped by the impact of war and by the intensive development of sophisticated weaponry In setting out to address this and similar questions this book investigates issues that have been substantially neglected by those working in sociology and social theory Anthony Giddens offers a sociological analysis of the nature of the modern nation state and its association with the means of waging war His analysis is connected in a detailed way to problems that have traditionally preoccupied sociologists the impact of capitalism and industrialism upon social development in the modern period The result is a theory both of the institutional parameters of modernity and of the nature of international relations The book is a sequel to the author's much discussed *Contemporary Critique of Historical Materialism* The framework of social theory outlined in that work is here elucidated in a systematic and thoroughgoing fashion The novel and provocative ideas which the author develops will interest those working in a wide variety of disciplines sociology politics geography and international affairs

Transformations in the Global Political Economy Dennis Clark Pirages, Christine Sylvester, Dennis C. Pirages, 2016-01-03 This book brings together a collection of essays that focus on the various dimensions of this transformation and prospects for future changes The book begins with an analytical essay that offers an overview of causes of change in the global political economy

A Sociology of Modernity Peter Wagner, 2002-11-01 First Published in 2004 Confusion reigns in sociological accounts of the current condition of modernity The story lines from the end of the subject to a new individualism from the dissolution of society to the re emergence of civil society from the end of modernity to an other modernity to neo modernization This book offers a sociology of modernity in terms of a historical account of social transformations over the past two centuries focusing on Western Europe but also looking at the USA and at Soviet socialism as distinct variants of modernity A fundamental ambivalence of modernity is captured by the double notion of liberty and discipline in its three major dimensions the relations between individual liberty and political community between agency and structure and between locally situated human lives and widely extended social institutions Two major historical transformations of modernity are distinguished the first one beginning in the late nineteenth century and leading to a social formation that can be called organized modernity and the second being the one that dissolves organized modernity It is this current transformation which revives some key concerns of the modern project ideas of liberty plurality and individual autonomy But it imperils others especially the creation of social identities as ties between human beings that allow meaningful and socially viable development of individual autonomy and the possibility of politics as communicative interaction and collaborative deliberation about what human

beings have in common Conflict and Consensus in South/North Security Caroline Thomas, Paikiasothy Saravanamuttu, 1989-11-23 Thirteen distinguished contributors address and re evaluate the security relations between the South and North boundaries The Political Economy of International Relations Robert G. Gilpin, 2016-03-30 After the end of World War II the United States by far the dominant economic and military power at that time joined with the surviving capitalist democracies to create an unprecedented institutional framework By the 1980s many contended that these institutions the General Agreement on Tariffs and Trade now the World Trade Organization the World Bank and the International Monetary Fund were threatened by growing economic nationalism in the United States as demonstrated by increased trade protection and growing budget deficits In this book Robert Gilpin argues that American power had been essential for establishing these institutions and waning American support threatened the basis of postwar cooperation and the great prosperity of the period For Gilpin a great power such as the United States is essential to fostering international cooperation Exploring the relationship between politics and economics first highlighted by Adam Smith Karl Marx and other thinkers of the eighteenth and nineteenth centuries Gilpin demonstrated the close ties between politics and economics in international relations outlining the key role played by the creative use of power in the support of an institutional framework that created a world economy Gilpin's exposition of the influence of politics on the international economy was a model of clarity making the book the centerpiece of many courses in international political economy At the beginning of the twenty first century when American support for international cooperation is once again in question Gilpin's warnings about the risks of American unilateralism sound ever clearer **Multinational Business and Labour (RLE International Business)** Peter Enderwick, 2013-01-17 Aimed at senior undergraduate and post graduate students following courses in International Business and Industrial Relations this book examines the labour market effects of multinational business In reflecting the complexity and dynamism of developments in this area the book makes clear the need to underpin analysis of the labour market effects of multinational business with conceptual understanding of the theory of multinational enterprise
