Redefining Culture Conceptualizing Culture Across Disciplines:

Redefining Culture John R. Baldwin, Sandra L. Faulkner, Michael L. Hecht, Sheryl L. Lindsley, 2006-08-15 Redefining Culture Perspectives Across the Disciplines argues that culture is one of the most important factors we need to know when we interact as well as in our discussions of social problems and their solutions This book picks up the dialogue where Kroeber and Kluckhohn left off in their classic 1952 collection and analysis of definitions of culture As a resource for personal and academic libraries this volume provides an updated listing of over 300 definitions of culture from a wide array of disciplines Chapters examine how the definition of culture has changed historically consider themes that cut across the definitions and provide models for organizing approaches to defining culture To round out this multi disciplinary perspective Renato Rosaldo provides a foreword and prominent authors from six disciplines write about how they conceptualize culture and use it in their research and practice This resource is an indispensable reference for scholars studying or integrating culture into their work It will appeal to anyone interested in culture particularly students and scholars in anthropology intercultural and international communication cultural studies cultural and social psychology linguistics sociology family studies political science intergroup relations cultural geography and multicultural education **Redefining Culture** John R. Baldwin, Sandra L. Faulkner, Michael L. Hecht, Sheryl L. Lindsley, 2006-08-15 Argues that culture is perhaps the most important thing to know about people if one wants to make predictions about their behavior The goal of this volume is to present a theoretically exhaustive integration of multidisciplinary approaches **A Communication Universe** Igor E. Klyukanov, 2010-09-02 A Communication Universe Manifestations of Meaning Stagings of Significance presents a new theoretical understanding of communication Igor E Klyukanov conceptualizes the process of communication in terms of space and time i e as a continuous process of meaningful spatiotemporal transformation He goes on to examine four fundamental transformations and the four theoretical perspectives on the nature of communication From the first perspective communication appears to be pure space then time comes into play more and more actively and from the fourth perspective communication appears to be pure time Following the fourth transformation communication is seen as returning back to the first stage where it again appears as pure space however now its reality contains all meanings created in the process of the previous transformations Based on these four transformations the process of communication is understood as a universe meaning whole entire turned into one School Culture Development in China - Perceptions of Teachers and Principals Kai Yu, Xiangyun Du, Xiaoju Duan, 2022-09-01 School culture is playing an increasingly important role in school performance and educational development Within the national campaign in China for the innovative and sustainable development of education local governments in Beijing Municipality have encouraged and facilitated educational innovation toward better school culture In recent years various initiatives have been undertaken by a select group of schools to develop strategies and further action toward innovation and change This book documents an investigation of how teachers and principals perceive school

culture development in China A survey was conducted among 1 992 informants from 37 schools located in four different districts in Beijing Municipality The results of this study indicated that the respondents had overall positive perceptions of school culture construction and development in the educational change process In general they showed a positive attitude toward the school culture improvement initiatives reported satisfaction about their current school culture and held confidence in the direction their school culture is heading The study demonstrated that certain factors such as school geographical location and respondents job duty job title and gender make a difference in how participants perceive their school s culture Teachers and principals from a less economically developed district had less awareness of involvement in and understanding of school culture development in all its aspects A notable gap between teachers and principals was identified in their perception of the core values and norms of the school and of communication between teachers and principals This study suggests that for educational development to be further carried forward successfully there is an urgent need for better distribution of educational resources both financial and leadership common understanding agreed upon goals and efficient communication between principals and teachers

Conceptions of Culture Thomas E. Wren, 2012-07-16 The concept of culture stands clearly but unsteadily at the heart of multicultural

education This book provides a systematic in depth understanding of the role that culture plays in the massive literature of multicultural education as multiple and antithetical definitions of culture exist The book also shows multicultural educators how to discern the definition used in any particular book or article Thomas Wren deploys methods and concepts from philosophy and the social sciences to provide an analytic framework within which the history and current state of culture theory can be understood both for its own sake and for its educational significance Although the book is full of theory it is not a theoretical book in the usual sense It is a road map accompanied by the related theoretical information and tools that graduate students and faculty need to 1 navigate the complex terrain of multicultural education literature 2 apply the book s analytical framework to that literature and to their own future practice and 3 anticipate the social changes and accompanying conceptual changes in our notions of culture that are now occurring as part of the cultural hybridity of today s students
