

Redirecting Behavior

At a given point you have all kinds of behaviors that you don't like, but do you know why? What, and how do we make those decisions? Here are some factors that go into the assessment of choosing what behaviors to target and why!

1

DANGEROUS

If the behavior is dangerous to the child, such as climbing, running away, throwing objects, etc., then it qualifies as a target behavior for redirection and/or replacement.

2

HURTING SELF OR OTHERS

If the behavior results in injury or danger to the child or others, such as hitting, kicking or biting, then these behaviors are targeted for reduction and/or replacement depending on function.

3

INAPPROPRIATE

If the behavior is physically inappropriate, for example, self stimulation or head banging, then it is targeted for reduction, for either reduction or teaching appropriate items or places to engage in such behavior.

4

INTERFERING WITH LEARNING

If the behavior interferes with a child's learning program, it qualifies for reduction and replacement depending on function.

REMEMBER TO: COMMUNICATE WITH YOUR TEAM

Decisions for targeting behaviors to change are made following detailed assessments and data collection. Each behavior has a scientific function it serves, and to correctly get to the bottom of it, those assessments are key in making effective plans!

5

OPPORTUNITY FOR FUNCTIONAL COMMUNICATION

If the child has the ability to communicate appropriately, then the behavior is then replaced with functional communication. If not, functional communication is targeted as a skill to teach.
