economy and international business      Emerging Issues in the Global Economy Silvia Cristina Mărginean, Claudia Ogorean, Ramona Orăștean, 2018-01-11 This proceedings volume provides current research on emerging issues in business economics and finance in the global economy with particular emphasis on Eastern Europe Featuring selected papers from the 2017 International Economics Conference in Sibiu IECS organized by the Lucian Blaga University of Sibiu Romania the contributing chapters consider new business models theories practices and instruments from advanced and emerging economies in the context of recent global trends After over 20 years of increasing openness and liberation of the world economy recent events in regions such as Europe USA and Asia have created challenges to the idea of globalization and integration There is a delay between the real world economic changes and the reflection of such changes in the economic research literature The 2017 IECS conference and the enclosed papers aim to fill this gap in the study of globalization covering diverse topics such as business administration sustainability corporate social responsibility finance accounting tourism and business informatics      **Carbon Technocracy** Victor Seow, 2022-04-08 A forceful reckoning with the relationship between energy and power through the history of what was once East Asia s largest coal mine The coal mining town of Fushun in China s Northeast is home to a monstrous open pit First excavated in the early twentieth century this pit grew like a widening maw over the ensuing decades as various Chinese and Japanese states endeavored to unearth Fushun s purportedly inexhaustible carbon resources Today the depleted mine that remains is a wondrous and terrifying monument to fantasies of a fossil fueled future and the technologies mobilized in attempts to turn those developmentalist dreams into reality In Carbon Technocracy Victor Seow uses the remarkable story of the Fushun colliery to chart how the fossil fuel economy emerged in tandem with the rise of the modern technocratic state Taking coal as an essential feedstock of national wealth and power Chinese and Japanese bureaucrats engineers and industrialists deployed new technologies like open pit mining and hydraulic stowage in pursuit of intensive energy extraction But as much as these mine operators idealized the might of fossil fuel driven machines their extractive efforts nevertheless relied heavily on the human labor that those devices were expected to displace Under the carbon energy regime countless workers here and elsewhere would be subjected to invasive techniques of labor control ever escalating output targets and the dangers of an increasingly exploited earth Although Fushun is no longer the coal capital it once was the pattern of aggressive fossil fueled development that led to its ascent endures As we confront a planetary crisis precipitated by our extravagant consumption of carbon it holds urgent lessons This is a groundbreaking exploration of how the mutual production of energy and power came to define industrial modernity and the wider world that carbon made      **Come Closer** Anita Mendiratta, 2011 An invaluable resource for tourism leaders policy makers and stakeholders as they drive the global tourism economy forward Covering topics from the role of government diplomacy tourism investment and destination branding to niche tourism development media tourism safety and green tourism COME CLOSER offers a framework for strategic and practical tourism economy management and

**Global Cities and Global Order** Simon Curtis, 2016-11-24 The re emergence of the city from the long shadow of the state in the late twentieth century was facilitated by the state itself The unprecedented size and scale of today's global cities and mega cities owe their conditions of possibility to a fundamental shift in the character of political order at the level of the international system This book argues that we must understand the rise of the global city as part of a wider process of the transformation of international political order and of the character of international society Global cities are an inscription of the ideals of a market society in space constructed and defended at the level of international society They embody the ascendance of a set of liberal principles at a certain moment in history a moment related to the hegemonic status of leading states in the second half of the twentieth century and the ability of those states to shape international norms But the evolution of these urban forms has also reflected the tendency for deregulated

markets to generate inequality and polarisation these features are also inscribed in the spaces of global cities Global cities focus and amplify the tensions and contradictions within the contemporary international system and become key strategic sites for struggles over social justice and the character of political life in the twenty first century Global Cities and Global Order demonstrates the significance of the re emergence of cities from the long shadow of the nation state is far reaching Only by examining the mechanisms by which cities have become empowered in the last few decades can we understand their new functions and capabilities in global politics
