Ready, Set, Green Graham Hill, Meaghan O'Neill, 2008. The time to save the planet is now. Ready, Set, Green. Living green means reversing climate change, but it also means protecting your kids and pets, improving your own health, and saving money. And it doesn't necessarily demand a radical overhaul of your life; just some simple adjustments such as switching to healthier cleaning products and driving fewer miles each week. Written by the visionaries at Treehugger.com, the most heavily trafficked site of its kind, **Ready, Set, Green** is the definitive and recyclable guide to modern green living. It offers solutions to make your home, office, car, and vacation more eco-friendly. For example, using a dishwasher instead of hand washing will save you 5,000 gallons of water annually. Eating less beef will save you 250 pounds of CO₂ per year. Washing your clothes in cold water instead of hot will save 200 pounds of CO₂ annually. Replacing three of your home's most frequently used lightbulbs with compact fluorescent bulbs will save 300 pounds of CO₂ every year. Including advice on how to properly insulate your house, cancel junk mail, and choose fruits and veggies wisely, **Ready, Set, Green** will help you change the future of the planet and restore balance to your daily life.

Sustainable Green Fleets Sustainable Green Fleets, 2007. **Brave Green World** Chris Forman, Claire Asher, 2021-03-30. How we can harness cutting-edge biology and manufacturing to fight waste and pollution. In nature, there is little chemical waste; nearly every atom is a resource to be utilized by organisms, ensuring that all the available matter remains in a perpetual cycle. By contrast, human systems of energy production and manufacturing are linear; the end product is waste. In **Brave Green World**, Chris Forman and Claire Asher show what our linear systems can learn from the efficient circularity of ecosystems. They offer an unblinkered yet realistic and positive vision of a future in which we can combine biology and manufacturing to solve our central problems of waste and pollution.
