Reducing Risks To Life:

Product Life Cycle Assessment to Reduce Health Risks and Environmental Impacts Gregory A. Keoleian, 1994-12-31 Life cycle design is a proactive approach for integrating pollution prevention and resource conservation strategies into the development of more ecologically and economically sustainable product systems Cross media pollutant transfer and the shifting of other impacts can be avoided by addressing the entire life cycle which includes raw materials acquisition materials processing manufacturing and assembly use and service retirement disposal and the ultimate fate of residuals The goal of life cycle design is to minimize aggregate risks and impacts over this life cycle This goal can only be attained through the balancing of environmental performance cost cultural legal and technical requirements of the product system Concepts such as concurrent design total quality management cross disciplinary teams and multi attribute decision making are essential elements of life cycle design that help meet these goals The framework for life cycle design was developed to be applicable for all product domains It was written to assist not only design professionals but all other constituents who have an important role in life cycle design including corporate executives product managers production workers distributors environmental health and safety staff purchasers accountants marketers salespersons legal staff consumers and government regulators A coordinated effort is required to institute changes needed for successful implementation of life cycle design Part I seeks to promote the reduction of environmental impacts and health risks through a systems approach to design The approach is based on the product life cycle which includes raw materials acquisition and processing manufacturing use service resource recovery and disposal A life cycle design framework was developed to provide guidance for more effectively conserving resources and energy preventing pollution and reducing the aggregate environmental impacts and health risks associated with a product system This framework addresses the product process distribution and management information components of each product system Part II describes the three components of a life cycle assessment inventory analysis impact analysis and improvement analysis as well as scoping activities presents a brief overview of the development of the life cycle assessment process and develops guidelines and principles for implementation of a product life cycle assessment The major states in a life cycle are raw materials acquisition manufacturing consumer use reuse maintenance and recycle waste management The basic steps of performing a life cycle inventory defining the goals and system boundaries including scoping gathering and developing data presenting and reviewing data and interpreting and communicating results are presented along with the general issues to be addressed The system boundaries assumptions and conventions to be addressed in each stage of the inventory are presented

Reducing Risk in Fertility Treatment Raj Mathur, 2015-03-11 In the last 15 years fertility treatment has become mainstream medical practice With this evolution has come a change in focus from effectiveness success rates to safety patient acceptability and ethical questions It is recognized that effectiveness also depends crucially on safety and good risk management The purpose of this book is to address this wider change in focus

Reducing Risk in Fertility Treatment examines risk in assisted conception covering a wide range of topics and areas Risk refers to situations in which an outcome of value to people is uncertain Specifically for the purpose of this book Risk means situations where patients or professionals or society as a whole is at risk of an adverse outcome in relation to fertility treatment It therefore encompasses clinical complications risks inherent in laboratory practice reputational and business risks to clinics and ethical risks to society as a whole It will be an essential resource for all clinic staff to consult in reducing the risk associated with their work It will provide practical resources such as how to guides but also a theoretical discussion of uncertainty where this exists The book is primarily directed to practitioners in the area of fertility treatment namely clinicians embryologists nurses counsellors and administrators However it is likely also to be relevant to policy makers commissioners of health services researchers in this field and biomedical ethicists **Reducing Risk** United States. Environmental Protection Agency. Relative Risk Reduction Strategies Committee,1990 *Reducing Risks for Mental Disorders* Institute of Medicine,Committee on Prevention of Mental Disorders,1994-01-01 The understanding of how to reduce risk factors for mental disorders has expanded remarkably as a result of recent scientific advances This study mandated by Congress reviews those advances in the context of current research and provides a targeted definition of prevention and a conceptual framework that emphasizes risk reduction Highlighting opportunities for and barriers to interventions the book draws on successful models for the prevention of cardiovascular disease injuries and smoking In addition it reviews the risk factors associated with Alzheimer s disease schizophrenia alcohol abuse and dependence depressive disorders and conduct disorders and evaluates current illustrative prevention programs The models and examination provide a framework for the design application and evaluation of interventions intended to prevent mental disorders and the transfer of knowledge about prevention from research to clinical practice The book presents a focused research agenda with recommendations on how to develop effective intervention programs create a cadre of prevention researchers and improve coordination among federal agencies **Reducing Risk** United States. Subcommittee on Health and the Environment, 1982 **Contingent Valuation, Transport Safety and the Value of Life** Nathalie G. Schwab Christe, Nils C. Soguel, 2012-12-06 Over the past two decades economic theory has extended its field of application to non market goods such as environmental resources and health Although it is impossible to assign a price to these goods on the basis of market mechanisms alone the fact that they have no price does not mean that they have no value One technique in which economists have shown a marked interest is the contingent valuation method CVM which has mainly been used to assign a monetary value to environmental goods It was first applied to natural resources used for recreational purposes CVM has been applied to health only recently so that studies in this field are relatively more scarce than those dealing with the environment although several valuation methodology surveys are available There has hitherto been no book which has drawn together and analyzed recent contingent valuations in the field of transport accidents Contingent Valuation Transport Safety and the Value of Life provides an overview of the experiments conducted in Europe Denmark France the U K Sweden and Switzerland While a number of contributions are critical others show how the estimates obtained in the area of road transport can be used to assess the adverse health effects of other causes such as public transport accidents or air pollution
